\*Penghargaan kepada semua Pengarah Bahagian, Pengarah Cawangan (Ibu Pejabat) dan Pengarah Negeri di atas usaha bagi menjamin kualiti dan ketepatan maklumat yang dilaporkan oleh pejabat masing-masing.

\*Sincere gratitude to all Division Directors, Section Directors (Headquarters) and State Directors for their efforts in ensuring the quality and accuracy of information reported by their respective offices.

# Perutusan Ketua Pengarah Message From The Director General

“Saya gembira melaporkan bahawa JMG telah mencapai kejayaan yang memberangsangkan dalam beberapa inisiatif baru di samping melaksanakan tanggungjawab rutin.”

“I am happy to report that JMG has achieved impressive milestones in several new initiatives besides having successfully accomplished its routine responsibility.”

DATO' YUNUS ABD RAZAK  
*Ketua Pengarah / Director General*  
JMG

Bagi tahun 2012, dengan bajet mengurus RM 62.46 juta dan peruntukan pembangunan sebanyak RM 10.23 juta yang diberikan kepada Jabatan, saya gembira melaporkan bahawa JMG telah mencapai kejayaan yang memberangsangkan dalam beberapa inisiatif baru selain telah berjaya melaksanakan tanggungjawab rutin. Pencapaian bajet mengurus dan pembangunan bagi tahun ini ialah masing-masing 99.32% dan 99.62%.

Aktiviti geosains yang dilaksanakan oleh Jabatan ditumpukan ke atas penyiasatan dalam pemetaan geologi, warisan geologi, hidrogeologi, geologi kejuruteraan, geologi alam sekitar dan geologi marin. Pemetaan geologi telah dijalankan di Terengganu dan di kawasan Bukit Bunoh, Lenggong, Perak. Status pemetaan geologi sehingga kini ialah 86.52% dari jumlah kawasan di Semenanjung Malaysia, 29.98% di Sarawak dan 27.9% di Sabah.

Pembangunan sumber air tanah di negeri-negeri juga merupakan sebahagian daripada Projek Bidang Keberhasilan Utama Negara (NKRA). Pembangunan tersebut telah dijalankan melalui kerjasama antara JMG dengan pelbagai agensi kerajaan negeri. JMG juga bekerjasama dengan Jabatan Alam Sekitar dalam menjalankan penggerudian dan pembinaan telaga untuk membekalkan air bagi memadam kebakaran bermusim di kawasan tanah gambut yang kering di negeri Johor, Selangor / Wilayah Persekutuan, Kelantan, Pahang dan Sarawak. Di bawah Projek Khas Bekalan Air, JMG telah menyumbang kepakaran dalam bidang air bawah tanah melalui kerjasama dengan Kementerian Tenaga, Teknologi Hijau dan Air Malaysia (KeTTHA) dan Badan Kawal Selia Air Negeri Sembilan (BKSA) dalam menilai potensi sumber air bawah tanah di kawasan bermasalah bekalan air di Selangor dan Negeri Sembilan. JMG juga bekerjasama dengan Kementerian Kemajuan Luar Bandar dan Wilayah (KKLW) di dalam Projek Bekalan Air Luar Bandar (BALB) di Sarawak.

For the year 2012, with a recurrent budget of RM 62.46 million and a development allocation of RM 10.23 million given to the department, I am happy to report that JMG has achieved impressive milestones in several new initiatives besides having successfully accomplished its routine responsibility. Achievements of the recurrent and development budgets for the year were 99.32% and 99.62% respectively.

Geoscience activities carried out by the department focussed on investigations in geological mapping, geoheritage, hydrogeology, engineering geology, environmental geology and marine geology. Geological mapping was carried out in the state of Terengganu and in Bukit Bunoh area, Lenggong, Perak. The overall status of geological mapping for Peninsular Malaysia is 86.52%, Sarawak 29.98% and Sabah 27.9%.

Groundwater resource development in each state constitutes part of the National Key Result Area (NKRA) project initiatives, and was conducted through the cooperation of JMG with various state agencies. JMG also collaborated with the Department of Environment Malaysia to drill and develop wells for groundwater to extinguish seasonal peatland fires in Johor, Selangor / Federal Territories, Kelantan, Pahang and Sarawak. Under the Water Supply Special Project, JMG has worked together with the Ministry of Energy, Green Technology and Water (KeTTHA) and Badan Kawal Selia Air, Negeri Sembilan (BKSA) and contributed its expertise for the assessment for of potential groundwater resources in Selangor and Negeri Sembilan. JMG has also provided technical assistance to the Ministry of Rural and Regional Development (KKLW) for the Rural Water Supply Project (BALB) in Sarawak.

Sepanjang tahun ini, di bawah Program Eksplorasi Mineral, kajian tinjauan mineral berlogam telah dijalankan di Johor, Negeri Sembilan, Kedah, Kelantan dan Terengganu. Penilaian susulan telah dilaksanakan di Negeri Sembilan, Perak, Kedah, Pahang, Sarawak dan Sabah. Anomali emas, bijih besi, timah dan mangan telah ditemui di negeri-negeri tersebut. Projek Penilaian Sumber Mineral Perindustrian telah dijalankan ke atas mineral-mineral perindustrian iaitu lempung, batuan silika, feldspar, barit, pasir binaan dan batu kapur. Longgokan-longgokan sumber mineral yang berpotensi telah dikenal pasti. Penilaian sumber batu arang telah dilaksanakan di negeri Sarawak dan Sabah dan berhasil menemui lipit batu arang yang mempunyai gred high volatile bituminous coal.

Pada keseluruhannya, industri perlombongan dan pengkuarian bagi tahun 2012 terus menunjukkan prestasi yang memberangsangkan. Sebanyak 178 buah lombong, 312 kuari serta 120 peniaga bijih dan loji pemprosesan mineral beroperasi pada akhir tahun 2012. Bagi menentukan aktiviti perlombongan dan pengkuarian dapat beroperasi di tahap keselamatan yang baik, sebanyak 2,882 pemeriksaan teknikal telah dijalankan ke atas operasi perlombongan, kuari, kilang amang, loji pemprosesan mineral dan pemeriksaan ke atas urusniaga pemegang lesen bijih mineral dan emas mentah.

Selaras dengan kehendak kerajaan bagi menggalak dan mempelbagai penggunaan sumber mineral tempatan bagi menyumbang kepada pembangunan sektor perindustrian negara melalui R&D, JMG terus menjalankan projek-projek R&D berkaitan teknologi berasaskan lempung, silika, batuan dan bahan termaju. Untuk menggalak pengusahahasilan sumber mineral secara mampan, R&D berkaitan teknologi pemprosesan mineral, perlombongan, pengkuarian dan pemulihan lombong dan kuari juga dijalankan.

During the year, reconnaissance evaluation for metallic mineral resources was carried out in Johor, Negeri Sembilan, Kedah, Kelantan and Terengganu under Mineral Exploration Programme. Follow-up metallic mineral resources assessment was carried out in Negeri Sembilan, Perak, Kedah, Pahang, Sarawak and Sabah where gold, iron ore, tin ore and manganese anomalies were identified. The Industrial Mineral Resource Evaluation Project was conducted to delineate clay, silica rock, feldspar, baryte, construction sand and limestone resources where potential deposits have been subsequently identified. Coal evaluation was carried out in Sarawak and Sabah and coal seams of high volatile bituminous grade were encountered.

Generally, the mine and quarry industry continued to perform vibrantly during the year 2012. There were a total of 178 mines, 312 quarries as well as 120 ore dealers and mineral processing plants in operation at the end of 2012. To ensure the safe operation of mines and quarries, a total of 2,882 technical inspections were carried out on the operation of mines, quarries, amang and mineral processing plants and as well as on mineral ore and raw gold license holders.

In line with the government's aspiration to encourage and diversify the use of local mineral resources, and contribute towards development of the country's industrial sector through R&D, JMG continued to carry out research projects related to clay-based, silica-based, rock-based and advanced material technology. R&D on mineral processing, mining and quarrying, and mine and quarry rehabilitation technologies were also conducted to encourage sustainable development of mineral resources in the country.

JMG terus perperanan dalam menyalurkan input berkaitan industri mineral meliputi peringkat antarabangsa di mana input-input telah disediakan bagi membantu kerajaan dalam pelbagai mesyuarat, perjanjian dan misi pelaburan seperti dalam forum Perjanjian Dagangan Bebas, Pertubuhan Dagangan Dunia, dagangan dua hala dan hubungan antarabangsa. Di peringkat ASEAN, JMG telah menghadiri mesyuarat Kumpulan Kerja Teknikal ASOMM Ke-9 dan mesyuarat ASOMM Ke-12 (ASEAN Senior Officials Meeting in Minerals) di Brunei Darussalam.

Kerjasama antarabangsa saintifik 2012 diteruskan dengan Thailand dalam projek pemetaan sempadan bersama. Mesyuarat Pertama Kumpulan Kerja Geologi Kawasan Langkawi-Tarutao Transect telah diadakan di Langkawi manakala kerja lapangan bersama telah dijalankan di Pulau Tarutao-Adang-Rawi, Thailand. Mesyuarat ke-2 Kumpulan Kerja Malaysia-Thailand dan Mesyuarat ke-9 Jawatankuasa Pemetaan Sempadan Geologi Malaysia-Thailand (MT-JGSC) telah diadakan di Wilayah Trang, Thailand.

Dalam hubungan kerjasama dua hala Malaysia-Indonesia, mesyuarat Technical Working Groups dan the 3rd Steering Committee meeting on Scientific and Technical Cooperation in the field of Geology and Mineral Resources di antara Malaysia dan Indonesia telah diadakan di Kota Kinabalu, Sabah. Kerja lapangan bersama Kumpulan Kerja Kajian Hidrogeologi Malaysia-Indonesia telah dijalankan di Pulau Sebatik, Tawau, Sabah.

Dalam tahun 2012, JMG telah diberi penghormatan dan kepercayaan sebagai tuan rumah kepada 48th Coordinating Committee for Geoscience Programmes in East and Southeast Asia (CCOP) Annual Session dan 59th CCOP Steering Committee Meeting yang kedua-duanya diadakan dengan jayanya di Langkawi.

JMG continued to play an active role in the global arena where mineral industry data inputs prepared by JMG were used by the Malaysian government in meetings, agreements and trade missions and in forums such as the Free Trade Agreement, World Trade Organisation, bilateral trade and international cooperation. At the ASEAN level, JMG had attended the 9th ASOMM (ASEAN Senior Officials Meeting in Minerals) Working Group Meeting and the 12th ASOMM Senior Official Meeting which were held in Brunei Darussalam.

International scientific co-operation with Thailand on the joint border mapping project continued in 2012. The First Meeting of the Malaysia-Thailand Working Group on the Geology of Langkawi-Tarutao Transect Area was held in Langkawi while a joint field excursion was conducted in Tarutao-Adang-Rawi Islands, Thailand. The 2nd Malaysia-Thailand Working Group Meeting and the 9th Malaysia-Thailand Border Joint Geological Survey Committee (MT-JGSC) were held in Trang Province, Thailand.

Under the auspices of the bilateral cooperation between Malaysia and Indonesia, both Technical Working Group and the 3rd Steering Committee on Scientific and Technical Cooperation in the field of geology and mineral resources held their meetings respectively in Kota Kinabalu, Sabah. A Malaysia-Indonesia Hydrogeological Study Working Group joint fieldwork was conducted in the Sebatik Island, Tawau, Sabah.

In 2012, JMG was given the honour and trust to host the 48th Coordinating Committee for Geoscience Programmes in East and Southeast Asia (CCOP) Annual Session and 59th CCOP Steering Committee Meeting, both of which were successfully held in Langkawi.

Satu memorandum persefahaman kerjasama saintifik telah dimeterai antara Jabatan Mineral dan Geosains Malaysia (JMG) dan Universiti Malaysia Terengganu (UMT) pada bulan 25 September 2012. MOU ini akan memberi manfaat yang besar kepada kedua-dua pihak dalam pelbagai kajian bersama khasnya dalam kajian perubahan iklim, kenaikan paras laut dan pengurusan pantai. Pada bulan November 2012, satu Program Persampelan Geologi Kuaterner di bawah DelSea II-CCOP telah diadakan di UMT yang melibatkan peserta dari JMG dan UMT.

Saya mengambil peluang ini untuk merakamkan terima kasih kepada Kementerian Sumber Asli dan Alam Sekitar (NRE) di atas peranan kepimpinan dan hubungan erat dengan pihak JMG. Saya juga ingin menyampaikan setinggi-tinggi penghargaan kepada semua staf JMG di atas komitmen dan sumbangan yang telah diberikan. Saya juga memanjangkan penghargaan saya kepada agensi kerajaan yang lain dan sektor swasta di atas kerjasama rapat dan sokongan yang telah diberikan kepada JMG.

A Memorandum of Understanding on scientific cooperation was signed between the Minerals and Geoscience Department Malaysia (JMG) and Universiti Malaysia Terengganu (UMT) on 25th September 2012. The MOU will benefit both parties significantly in a broad scope of joint studies, notably research studies on climate change, sea level rise and coastal management. In November 2012, a Quaternary Geology Sampling Programme under the CCOP-DelSea II Project was held at UMT and involved participants from both JMG and UMT.

I would like to take this opportunity to thank the Ministry of Natural Resources and Environment (NRE) for the leadership and the close rapport with JMG. I would also like to express my deep appreciation to the staff of JMG for their commitment and contributions and to other government agencies and the private sector for their close co-operation and support given to JMG.

**DATO' YUNUS ABD RAZAK**  
Ketua Pengarah / Director General  
JMG

# Profil Korporat Corporate Profile

## Visi / Vision

Peneraju pembangunan mineral dan geosains menjelang 2020  
Leader in mineral and geoscience development by 2020

## Misi / Mission

Menyumbang kepada peningkatan daya saing ekonomi negara dan kualiti hidup melalui penggunaan maklumat, perkhidmatan berkepakaran tinggi serta penyelidikan berkaitan mineral dan geosains yang efektif

To contribute towards enhancement of the nation's economic competitiveness and quality of life through effective usage of mineral and geoscience information, specialised expert services and related research

## Objektif Strategik / Strategic Objectives

1. Memperkasa pengurusan modal insan dan kapasiti organisasi ke arah meningkatkan kecekapan penyampaian perkhidmatan  
To strengthen the management of human capital and organisational capacity towards improving the efficiency of service delivery
2. Memperkuuh keupayaan aktiviti mineral dalam eksplorasi, pembangunan dan promosi untuk memacu ekonomi negara  
To intensify the capability of mineral exploration, development and promotion activities to spearhead the national economy
3. Memantap pelaksanaan perkhidmatan geosains berkepakaran tinggi ke arah pembangunan mampan yang menyumbang kepada kesejahteraan hidup dan pemeliharaan alam sekitar  
To strengthen the implementation of specialised geoscience services towards sustainable development that contributes to the well-being of mankind and conservation of environment
4. Memperkuuh penyelidikan dan pembangunan (R&D) mineral untuk memajukan industri mineral negara  
To intensify research and development (R & D) on minerals for increased growth and advancement in the nation's mineral industry

## Objektif / Objectives

- Menyediakan maklumat komoditi mineral bagi meningkatkan pertumbuhan industri berasaskan mineral  
*To provide mineral commodity information to enhance the growth of mineral-based industries*
- Menggalakkan penggunaan optimum maklumat dan perkhidmatan geosains bagi pembangunan negara yang mapan  
*To encourage the optimal use of geoscience information and services for the sustainable development of the country*
- Memastikan perusahaan sumber mineral berkembang secara teratur, selamat, cekap dan mesra alam serta mendatangkan pulangan yang maksimum kepada negara  
*To ensure that mineral resources are exploited in a systematic, safe, efficient and environmentally friendly manner as well as to secure their maximum returns to the country*
- Menggalak dan mempelbagaikan penggunaan sumber mineral tempatan bagi menyumbang kepada pembangunan sektor perindustrian negara melalui aktiviti-aktiviti penyelidikan dan pembangunan (R&D)  
*To encourage and diversify the use of local mineral resources so as to contribute towards the development of the country's industrialisation through research and development (R&D) activities*
- Menyediakan perkhidmatan kepakaran dalam bidang mineral, geosains dan perlombongan di peringkat nasional dan antarabangsa bagi menggalakkan pelaburan dalam sektor mineral dan perancangan pembangunan negara  
*To provide expert services in the fields of mineral, geoscience and mining at national and international levels so as to promote investments in the mineral sector and for national development planning*

## Fungsi / Functions

- Mengendali eksplorasi mineral secara sistematik  
*To undertake systematic mineral exploration*
- Mengendali penyiasatan pelbagai bidang geosains seperti pemetaan geologi, sumber air bawah tanah, geologi kejuruteraan, bencana geologi, geologi alam sekitar, geologi marin, geofizik, dan bidang-bidang geosains lain secara sistematik  
*To undertake systematic investigations in various geoscience disciplines such as geological mapping, groundwater resources, engineering geology, geological hazards, environmental geology, marine geology, geophysics, and others*
- Menyedia perkhidmatan analisis geokimia dan ujian fizikal bahan batuan dan mineral  
*To provide geochemical analyses and physical tests on rock materials and minerals*
- Bertindak sebagai bank data nasional bagi semua maklumat berkaitan dengan geosains dan sumber mineral negara  
*To act as the national depository for all information related to geoscience and mineral resources of the country*
- Mengumpul, menganalisis dan menyebarkan data dan maklumat berkaitan eksplorasi mineral, perlombongan dan aktiviti yang berkaitan  
*To collect, analyse and disseminate data and information pertaining to mineral exploration, mining and related activities*
- Menyedia perkhidmatan nasihat teknikal dan kepakaran dalam bidang mineral, geosains, perlombongan dan pengkuarian  
*To provide technical advisory and expert services in the fields of mineral, geoscience, mining and quarrying*
- Membantu dan bekerjasama dengan pihak swasta dan industri dalam usaha pembangunan sektor mineral  
*To assist and co-operate with the private sector and industry to develop further the mineral sector*
- Menentukan supaya aktiviti perlombongan mineral serta aktiviti lain yang berkaitan dengannya dijalankan dengan cara yang selamat, cekap dan sistematis  
*To ensure that mining of minerals and related activities are carried out safely, efficiently and systematically*
- Melaksana dasar dan arahan Kerajaan berhubung dengan industri mineral dan geosains, disamping mentadbir dan menguatkuasakan undang-undang yang berkaitan  
*To implement government policies and directives with regards to the mineral industry and geoscience, besides administration and enforcement of regulations*
- Menjalankan penyelidikan dan pembangunan (R&D), pemindahan teknologi, pembangunan sumber mineral serta mempromosi hasil penyelidikan supaya digunakan oleh pihak industri  
*To carry out research and development (R&D), technology transfer, mineral resources development and promotion of research products so that they are acceptable to the industry*

# Piagam Pelanggan / Client's Charter

## Maklumat Mineral dan Geosains / Mineral and Geoscience Information

- Membekalkan laporan geologi (termasuk peta), mineral dan bidang-bidang geosains lain yang telah diterbitkan dan sedia ada, dalam masa 1 hari selepas permohonan diterima  
*To supply available and published geological (including maps), mineral and other geoscience reports within 1 day upon receipt of request*
- Membekalkan laporan dan peta geologi, mineral dan bidang-bidang geosains lain yang belum diterbitkan dan sedia ada, dalam masa 1 minggu selepas permohonan diterima  
*To supply available but unpublished geological maps, mineral and other geoscience reports within 1 week upon receipt of request*
- Membekalkan maklumat berdigit sedia ada dalam masa 3 hari selepas permohonan diterima  
*To supply available digital information within 3 days upon receipt of request*

## Perkhidmatan Kepakaran / Expert Services

- Menyediakan perkhidmatan kepakaran apabila diminta dalam rangka masa yang ditetapkan atau dipersetujui bersama dengan pelanggan, terutamanya bagi bidang-bidang:  
*To provide expert services upon request, within the time frame stipulated or mutually agreed upon with the client, especially in the fields of:*
  - Pemetaan geologi  
*Geological mapping*
  - Siasatan mineral  
*Mineral investigation*
  - Siasatan air bawah tanah  
*Groundwater investigation*
  - Siasatan geofizik  
*Geophysical investigation*
  - Siasatan geologi kejuruteraan  
*Engineering geology investigation*
  - Siasatan geologi alam sekitar  
*Environmental geology investigation*

## Perkhidmatan Perlombongan dan Pengkuarian Mining and Quarrying Services

### Perkhidmatan Makmal Laboratory Services

- Menyediakan perkhidmatan makmal apabila diminta bagi bidang berikut:  
**To provide laboratory services upon request for**
  - Kajian mineralogi dan petrologi  
**Mineralogical and petrological studies**
  - Analisis sampel bijih, mineral, aloi, batuan, kelodak, konsentrat, tanah dan air  
**Analyses of ores, minerals, rocks, silts, concentrates, rocks and water samples**
  - Ujian mineral perindustrian  
**Industrial mineral tests**
  - Ujian sedimentologi  
**Sedimentological tests**
  - Ujian geologi kejuruteraan  
**Engineering geology tests**

dalam tempoh yang dipersetujui, sekiranya mandatori, atau jika rutin, dalam tempoh 2 minggu selepas sampel diterima  
**within the time frame stipulated or mutually agreed upon with the client if it is mandatory, or within 2 weeks if it is routine, upon receipt of samples**

- Mengeluarkan Lesen Melombong / Lesen Kuari dalam tempoh 30 hari dari tarikh penerimaan permohonan yang lengkap  
**To issue Mining Licences or Quarrying Licences within 30 days upon receipt of duly completed application forms**
- Menyediakan laporan-laporan teknikal yang tepat dan lengkap berkaitan dengan kepentingan perlombongan, dalam tempoh 30 hari dari tarikh penerimaan permohonan yang disertakan dengan dokumen-dokumen yang lengkap  
**To prepare comprehensive technical reports relating to mining interest within 30 days upon receipt of application supported by duly completed documents**

### Perkhidmatan Dagangan Mineral Mineral Commerce Services

- Memberi ulasan ke atas permohonan untuk mengeksport mineral dalam tempoh 5 hari dari tarikh penerimaan permohonan yang disertakan dengan dokumen-dokumen yang lengkap  
**To provide comments on mineral export applications within 5 days upon receipt of applications accompanied by duly completed documents**
- Mengeluarkan Lesen Bijih Mineral dalam tempoh 30 hari dari tarikh penerimaan permohonan yang lengkap  
**To issue Mineral Ore Licences within 30 days upon receipt of duly completed application forms**
- Mengeluarkan dan membaharukan permit pengangkutan konsentrat timah dalam tempoh 1 jam  
**To issue and renew permits for transportation of tin concentrates within 1 hour**

## Dasar Kualiti / Quality Policy

Jabatan Mineral dan Geosains Malaysia komited untuk memastikan produk dan perkhidmatannya sentiasa memenuhi keperluan pelanggan. Untuk mencapai matlamat ini, pengurusan jabatan serta seluruh warga JMG adalah komited untuk:

*The Minerals and Geoscience Department Malaysia is committed to ensuring customer satisfaction in its products and services. To achieve this goal, the JMG management as well as the constituents are committed to:*

- Melaksanakan sistem kualiti berdasarkan kepada keperluan MS ISO 9002;  
*Implementing a quality system based on MS ISO 9002 qualifications;*
- Memastikan bahawa produk dan perkhidmatan tepat pada masanya;  
*Ensuring that datelines are met in both products and services;*
- Memastikan bahawa peningkatan kualiti dilaksanakan secara berterusan;  
*Continuance of quality improvement is implemented;*
- Membina pasukan kerja yang kuat, responsif dan mempunyai etika kerja yang positif, dan  
*Building of a strong and responsive work force with positive work ethics;*
- Meningkatkan pengetahuan dan kemahiran melalui latihan.  
*Development of knowledge and skills through training.*

## Pembangunan Sumber Manusia Human Resource Development

Dalam meneruskan usaha untuk mencapai visi dan misi jabatan, proses memperkasa pengurusan modal insan dan kapasiti organisasi ke arah meningkatkan kecekapan penyampaian perkhidmatan terus mendapat perhatian pengurusan jabatan. Oleh itu, pembangunan modal insan dijadikan objektif strategi yang utama dalam hala tuju JMG 2011-2015 bagi melahirkan insan yang berkepakaran tinggi, berdaya saing, kreatif dan berinovasi serta sikap positif dan memiliki nilai insaniah. Sehubungan dengan itu, pelbagai program terus dilaksanakan, antaranya ialah program latihan modul jabatan, luar jabatan dan luar Negara, di samping pengajian ijazah lanjutan.

In pursuing the vision and mission of the department, it is important for the department to strengthen the human capital management and the organisational capacity so as to improve the efficiency of service delivery of the department. The development of human capital is one of the major strategic objectives of the JMG 2011-2015 Strategic Plans for nurturing highly specialised, competent, creative and innovative personnels with positive attitude and intrinsic value. Accordingly, many training programmes were implemented including the departmental training module programmes, local and overseas programmes, as well as post-graduate studies programme.

<b>Program latihan Training programme</b>	<b>Dalam jabatan In-house</b>	<b>Luar jabatan Local</b>	<b>Luar negara Overseas</b>	<b>Jumlah Total</b>

## Program Latihan Dalam Jabatan In-House Training Programme

Sebanyak 263 program latihan dalam Jabatan melibatkan kursus, bengkel, taklimat, seminar, persidangan dan ceramah telah dilaksanakan oleh semua pejabat sepanjang 2012. Seramai 9,811 peserta telah menghadirinya. Sebahagian besar daripadanya merupakan program yang terdapat dalam takwim latihan yang dirancang.

A total of 263 in-house programmes involving courses, workshops, briefings and seminars were conducted during 2012. A total of 9,811 participants were involved in these programmes. Most of these programmes were scheduled in the planned training calendar.

## Program Latihan Luar Jabatan (Tempatan) Local Training Programme

Sebanyak 542 kursus, bengkel dan seminar telah dihadiri oleh 2,095 kakitangan Jabatan. Program ini melibatkan agensi pengajur seperti INSTUN, NRE, INTAN, INTIM, JPM, AKAUNTAN NEGARA, INSPIN, AKADEMI SAINS, MIMA, USM, INTAN, FRIM, JANM, JPA, SUK, NAHRIM, LPPKN, SIRIM, UNIMAS, LHDN, USM, UTP, IGM dan lain-lain.

A total of 542 courses, workshops and seminars were attended by a total of 2,095 participants. These programmes involved organising agencies such as INSTUN, NRE, INTAN, INTIM, JPM, AKAUNTAN NEGARA, INSPIN, AKADEMI SAINS, MIMA, USM, INTAN, FRIM, JANM, JPA, SUK, NAHRIM, LPPKN, SIRIM, UNIMAS, LHDN, USM, UTP, IGM and others.

## Program Latihan Luar Negara Overseas Training Programme

Sebanyak 43 program latihan, mesyuarat dan lawatan di luar negara iaitu ke Jepun, Korea Selatan, Indonesia, Filipina, Rusia, Vietnam, Singapura, Australia, Brunei, Sri Lanka, Switzerland, Kemboja, China dan Thailand telah dianjurkan oleh CABIS, APEC, ASOMM, AUSTRALIAN TRADE COMMISSION, KIGAM, AOTS, AMMIN, GAI, CCOP, JPA, GS of China dan pelbagai agensi luar negara. Seramai 103 anggota jabatan telah mengikuti program ini.

A total of 43 training programmes, meetings and overseas visits to Japan, South Korea, Indonesia, The Philippines, Russia, Vietnam, Singapore, Australia, Brunei, Sri Lanka, Switzerland, Cambodia, China and Thailand were organised by the CABIS, APEC, ASOMM, AUSTRALIAN TRADE COMMISSION, KIGAM, AOTS, AMMIN, GAI, CCOP, JPA, GS of China and other overseas agencies. A total of 103 staff of the department attended these programmes.

# Pembangunan Dasar / Policy Development

## Dasar Geosains Negara National Geoscience Policy

Jabatan bekerjasama erat dengan Kementerian Sumber Asli dan Alam Sekitar (NRE) bagi menggubal Dasar Geosains Negara. Beberapa siri Seminar Peringkat Kebangsaan dan Perundingan Pihak Berkepentingan telah diadakan sepanjang tahun 2012. Dasar ini dijangka siap pada tahun 2013. Ianya diharap akan menjadi panduan bagi menentukan halatuju dan strategi pengurusan geosains negara ke arah mencapai negara berpendapatan tinggi dan kehidupan rakyat yang sejahtera serta alam sekitar yang terpelihara.

The Department is working very closely with the Ministry of Natural Resources and Environment (NRE) to formulate the National Geoscience Policy. A series of National Level Seminar and Stakeholders Consultation was held during the year 2012. This policy is expected to be completed by the year 2013. Hopefully, it will serve as a guide for determining the direction and management strategies for national geoscience sector in moving towards high-income country and achieving peaceful living as well as environmental sustainability.

## Pernyataan Dasar Policy Statement

Untuk menerajui pembangunan lestari sumber asli bumi melalui pembangunan dan aplikasi geosains bagi melindungi dan memulihara alam sekitar; pembangunan sosio-ekonomi dan kesejahteraan negara; dan memartabatkan kedaulatan negara.

To spearhead the sustainable development of the earth's natural resources through the development and application of geoscience for the protection and conservation of the environment; the socio-economic development and wellbeing of the nation; and to uphold the sovereignty of the country.

### Objektif

### Objective

1. Memartabatkan keselamatan dan kedaulatan negara melalui pengurusan sumber asli bumi yang berkesan.
2. Memacu transformasi ekonomi negara dan meningkatkan kesejahteraan masyarakat melalui pembangunan dan pengurusan guna tanah yang berkesan, cekap, ekonomik, dan lestari.
3. Memupuk dan meningkatkan budaya kreatif, inovatif dan keusahawanan dalam pengurusan sumber asli bumi, pembangunan teknologi dan pengkomersialan.
4. Memperkasakan modal insan, institusi dan penyelidikan sumber asli bumi untuk meningkatkan pembangunan sosio-ekonomi dan kesejahteraan negara.
5. Memperkuuhkan kerangka institusi berteraskan geosains yang berkaitan sumber, proses dan sistem bumi bagi pembangunan lestari.
1. To uphold the national security and sovereignty through an effective management of the earth's natural resources.
2. To drive the economic transformation of the nation and improve the wellbeing of the community through effective, efficient, economic, and sustainable land use management and development.
3. To foster and enhance a culture of creativity, innovation and entrepreneurship in the management of the earth's natural resources, the development of technology and commercialisation.
4. To strengthen human capital, institutions and research on earth's natural resources to enhance the socio-economic development and wellbeing of the nation.
5. To strengthen geoscience institutional framework for sustainable development of the earth's resources, processes and systems.

## Kerjasama Antarabangsa International Cooperation

### Kerjasama Teknikal dan Saintifik Malaysia-Indonesia dalam bidang Geologi dan Sumber Mineral / Malaysia-Indonesia Scientific and Technical Cooperation in the field of Geology and Mineral Resources

**21-23.02.2012**

- Mesyuarat Pertama Kumpulan Kerja Kajian Hidrogeologi dan kerja lapangan di Pulau Sebatik, Tawau, Sabah.  
First Interim Working Group Meeting on Hydrogeological Study and fieldwork in Sebatik Island, Tawau, Sabah.

**03-08.07.2012**

- Mesyuarat Kumpulan Kerja Hidrogeologi di Kota Kinabalu, Sabah.  
Hydrogeology Working Group Meeting in Kota Kinabalu, Sabah.

**26-30.11.2012**

- Kumpulan Kerja Teknikal ke-2 (TWG2) - Sumber Mineral dan Tenaga  
Technical Working Group 2 (TWG2) - Mineral and Energy Resources

Mesyuarat di JMG Kuching, Sarawak.  
Meeting at JMG Kuching, Sarawak.

- Mesyuarat Pertama Kumpulan Kerja Geologi Kawasan Langkawi-Tarutao Transect di Hotel De Baron, Langkawi. / [First Interim Meeting of the Working Group on the Geology of Langkawi-Tarutao Transect Area and Geological Conservation and Geological Tourism in Langkawi-Tarutao Islands in Hotel De Baron, Langkawi.](#)

Pengerusi Bersama En. Mior Sallehuddin Mior Jadid, Pengarah Bahagian Perkhidmatan Teknikal, JMG dan En. Montri Luengingkasoot, Pengarah Biro Penyiasatan Kajibumi, DMR, Thailand.

Joint Chairmen Mr. Mior Sallehuddin Mior Jadid, Director Technical Services Division, JMG and Mr. Montri Luengingkasoot, Director, Bureau of Geological Survey, DMR, Thailand.

**11-12.09.2012**

- Mesyuarat ke-2 Kumpulan Kerja Malaysia-Thailand dan Mesyuarat ke-9 Jawatankuasa Pemetaan Sempadan Geologi Malaysia-Thailand (MT-JGSC) di Wilayah Trang, Thailand. / [2<sup>nd</sup> Malaysia-Thailand Working Group Meeting and 9<sup>th</sup> Malaysia-Thailand Border Joint Geological Survey Committee \(MT-JGSC\) Meeting in Trang Province, Thailand.](#)

Mesyuarat dirasmikan oleh Timbalan Gabenor Wilayah Trang, Thailand, En. Chaiyot Thongchai pada 12 September 2012.

[The meeting was officiated by the Deputy Governor of Trang Province, Thailand, Mr. Chaiyot Thongchai on 12 September 2012.](#)

Ahli Mesyuarat MT-JGSC.  
[Members attending the MT-JGSC meeting.](#)

**13-15.09.2012**

- Kerja lapangan bersama di Wilayah Trang, Nakhon Si Thammarat, Surat Thani dan Koh Samui, Thailand. / [Joint field excursion in Trang Province, Nakhon Si Thammarat, Surat Thani and Koh Samui, Thailand.](#)

## Projek kerjasama JMG-Agensia Mine Reclamation Corporation (MIRECO), Republik Korea untuk rawatan Acid Mine Drainage (AMD) / **JMG-Mine Reclamation Corporation (MIRECO), Republic of Korea cooperation project on Acid Mine Drainage (AMD)**

**26.04. 2012**

- Perjanjian projek kerjasama untuk rawatan "Acid Mine Drainage" tapak bekas Lombong Mamut di Kota Kinabalu, Sabah. / *Joint project agreement on the Acid Mine Drainage (AMD) treatment of ex-Mamut Copper Mine in Kota Kinabalu, Sabah.*

Wakil dari JMG Malaysia dan MIRECO, Korea.  
Representatives from JMG Malaysia and MIRECO, Republic of Korea.

Lawatan oleh rombongan MIRECO, Korea ke tapak bekas Lombong Mamut, Sabah.  
Visit by MIRECO, Korea to the ex-Mamut Copper Mine, Sabah.

**24.05.2012**

- Ceramah teknikal berkenaan AMD oleh Dr. Min Jang (MIRECO) di Pusat Penyelidikan Mineral, Ipoh.  
[Technical Talk on AMD by Dr. Min Jang \(MIRECO\) at Mineral Research Centre, Ipoh.](#)

**01.07.2012**

- Lawatan tapak oleh rombongan MIRECO di bekas lombong Mamut, Sabah. / [Site visit by MIRECO to the ex-Mamut Copper Mine, Sabah.](#)

## Mesyuarat Pegawai-pegawai Kanan Asean berkaitan Mineral ASEAN Senior Officials Meeting on Minerals (ASOMM)

**25-29.06.2012**

- Program Latihan Pangkalan Data Sumber Mineral di Yogyakarta, Indonesia.  
*Training Programme on Mineral Resources Database in Yogyakarta, Indonesia.*

**05-06.12.2012**

- Mesyuarat ASOMM ke-12 di Brunei Darussalam. / *12<sup>th</sup> ASOMM meeting in Brunei Darussalam.*

## Coordinating Committee for Geoscience Programmes in East and Southeast Asia (CCOP)

04-08.11.2012

➤ 48<sup>th</sup> CCOP Annual Session.

**09-10.11.2012**

➤ 59th CCOP Steering Committee Meeting.

## JMG-China ASEAN Business Investment Summit (CABIS)

**12.03.2012**

- Lawatan Sekretariat CABIS. / Visit of the CABIS Secretariat.

Ketua Pengarah JMG dan  
Mr. Hu Fuzhang, Assistant  
Inspector of CCPIT Guangxi  
Committee, Deputy Secretary  
General of CABIS.  
Director General JMG and  
Mr. Hu Fuzhang, Assistant  
Inspector of CCPIT Guangxi  
Committee, Deputy Secretary  
General CABIS.

Taklimat dan perbincangan bersama delegasi  
CABIS dan pegawai-pegawai JMG Malaysia.  
Briefing and discussion session with CABIS  
delegation and JMG Malaysia.

Delegasi CABIS bersama pegawai-pegawai JMG,  
NRE dan Dewan Perlombongan Malaysia.  
CABIS delegation with JMG, NRE and Malaysian  
Chamber of Mines.

**11-13.05.2012**

- Forum Kerjasama Perlombongan dan Pameran China-ASEAN 2012 di Nanning, China.  
*China-ASEAN Mining Cooperation Forum and Exhibition 2012, Nanning, China.*

Sesi forum.

*Forum session.*

Mesyuarat delegasi Malaysia dengan usahawan-usahawan China.  
*Meeting between Malaysian delegation and Entrepreneurs from China.*

## Pelawat luar negara / Overseas visitors

**22-24.02.2012**

- Lawatan kerja delegasi Department of Geology and Minerals, Lao PDR.  
Visit of delegation from Department of Geology and Minerals, Lao PDR.

Ketua Pengarah JMG dan Mrs. Chansarath BOUPHA, Deputy Director General Department of Geology and Minerals, Ministry of Natural Resources and Environment of Lao PDR.

Director General of JMG and Mrs. Chansarath BOUPHA, Deputy Director General Department of Geology and Minerals, Ministry of Natural Resources and Environment of Lao PDR.

Lawatan ke Unit Geographical Information System (GIS), Cawangan Pengurusan Maklumat.

Visit to Geographical Information System (GIS) Unit, Information Management Division.

Delegasi Lao PDR dan pegawai-pegawai JMG Malaysia.  
Lao PDR delegation and JMG Malaysia officers.

**26.06.2012 - 9.08.2012**

- Lawatan dan latihan delegasi Geological Survey of Bangladesh.  
Training and visit of delegation from Geological Survey of Bangladesh.

Lawatan ke Muzium Geologi, Ipoh  
Visit to the Geology Museum, Ipoh.

Lawatan ke Pusat  
Penyelidikan Mineral, Ipoh.  
Visit to the Mineral Research  
Centre, Ipoh.

**27-28.08.2012**

- Lawatan delegasi Ketua Pengarah, Department of Mineral Resources of Thailand (DMR) ke JMG Malaysia.  
[Visit of Director General, Department of Mineral Resources of Thailand \(DMR\) delegation to JMG Malaysia.](#)

**02.10.2012**

- Lawatan delegasi Her Excellency The High Commission of The Kingdom of Lesotho.  
Visit of Her Excellency The High Commission of The Kingdom of Lesotho delegation.

# Aktiviti Geosains Geoscience Activities

Aktiviti geosains yang merupakan teras utama JMG dilaksanakan berterusan oleh Jabatan dengan menyediakan pelbagai maklumat geologi melalui kegiatan pemetaan geologi, warisan geologi, hidrogeologi, geologi kejuruteraan, geologi alam sekitar dan geologi marin. Maklumat geosains yang berkualiti serta memenuhi kehendak *stake holder* dan pelanggan adalah input penting yang dapat digunakan secara efektif dalam perancangan guna tanah bagi mencapai pembangunan mampan serta mengurangkan risiko bencana dan memelihara alam sekitar.

Pemetaan geologi dijalankan bagi mengumpul, menyelia dan menyebarkan maklumat asas geologi yang amat diperlukan dalam kerja-kerja carigali sumber mineral dan perancangan gunatanah serta kesesuaian tapak untuk pembangunan. Pemetaan warisan geologi pula dapat menilai dan memulihara tapak geologi yang berpotensi sebagai warisan negara di samping dapat mempromosikannya sebagai kawasan geopelancongan bagi menjana sosioekonomi serta kelestarian alam sekitar. Maklumat hidrogeologi merupakan input penting di dalam pengurusan sumber air bawah tanah bagi memastikan ia dapat terus diguna sebagai bekalan air negara manakala maklumat pemetaan geobencana dan penilaian risiko bencana terutama di kawasan perbandaran dan penempatan amat berguna kepada pihak berkuasa tempatan dalam merancang pembangunan yang lebih sistematis.

Geoscience activities which constitute one of the main thrusts of JMG were conducted continuously by the Department to provide necessary geological information through various activities like geological mapping, geological heritage, hydrogeology, engineering geology, environmental geology and marine geology. Quality geoscience information that meet the requirements of stakeholders and customers are important inputs as they can be used effectively in land use planning to achieve sustainable development and reduction in the risk of disasters as well as protection of the environment.

Geological mapping is carried out to collect, collate and disseminate basic geological information which is very much needed in the exploration of mineral resources and land use planning as well as in the determination of the suitability of the site for development. Geological heritage mapping is carried out to assess and conserve potential geological sites as national heritages as well as to promote geotourism that would enhance the socio-economic status and environmental sustainability. Hydrogeological information is important in the management of groundwater resources to ensure that it can be used continuously as one of the nation's water supply while information from geohazard mapping and disaster risk assessment, especially in urban and settlement areas is very useful to the local authorities in systematic development planning.

# Pemetaan Geologi / Geological Mapping

Status pemetaan geologi sehingga kini ialah 86.52% dari jumlah kawasan di Semenanjung, 29.98% di Sarawak dan 27.9% di Sabah. Pemetaan geologi rantau pada skala 1:63,360 dan pemetaan geologi Kuaterner telah dijalankan di Terengganu. Selain daripada itu, pemetaan geologi khusus juga dijalankan di kawasan Bukit Bunoh, Lenggong, Perak.

The status of geological mapping for Peninsular is 86.52%, Sarawak 29.98% and Sabah 27.9%. Regional geological mapping on the scale of 1:63,360 and Quaternary geological mapping were carried out in the state of Terengganu. Specific geological mapping was also carried out in Bukit Bunoh, Lenggong, Perak.

## Pemetaan geologi rantau Regional geological mapping

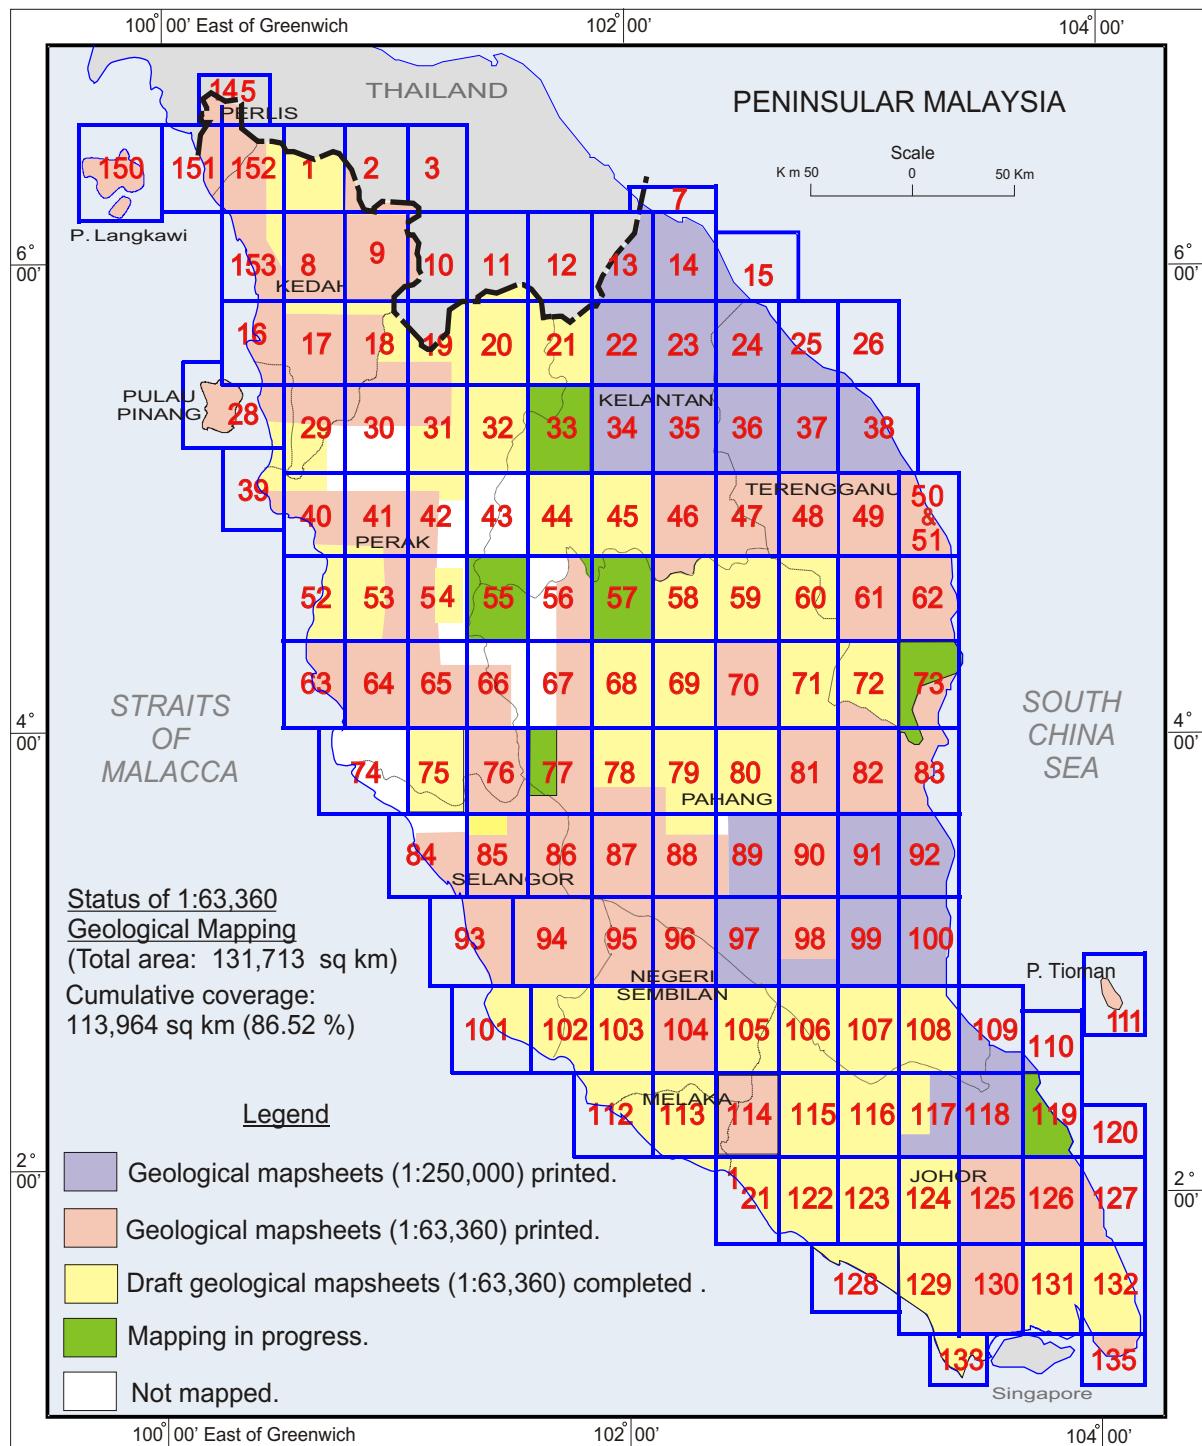

Negeri State	Kawasan Area	Liputan Coverage (km <sup>2</sup> )	Penemuan / Catatan Findings / Remarks
Terengganu	Chukai & Kuantan	100	Laporan pemetaan geologi meliputi Syit 73 (Chukai) dan sebahagian Syit 83 (Kuantan) telah siap dalam bentuk manuskrip. / <a href="#">The draft geological mapping report covering Sheet 73 (Chukai) and part of Sheet 83 (Kuantan) was completed.</a>
Pahang	Kuala Tembeling	-	Laporan peta berjudul Geologi dan Sumber Mineral Kawasan Kuala Tembeling, Pahang telah diterbitkan. / <a href="#">A map report entitled Geology and Mineral Resources of Kuala Tembeling Area was published.</a>
Jumlah : Total :		100	

## Pemetaan geologi Kuaterner Quaternary geological mapping

Negeri State	Kawasan Area	Liputan Coverage (km <sup>2</sup> )	Penemuan / Catatan Findings / Remarks
Terengganu	Merang	90	Kajian perubahan aras laut kuno. Analisis mikrofosil dan penentuan usia dijalankan terhadap sampel gambut dari lubang gerimik manakala sampel permukaan pantai dianalisis untuk diatom. Paleo sea level change study. Augered peat sample were analysed for microfossils and dating was conducted. Surface samples from the beach were analysed for diatom.
Jumlah : Total :		90

## Warisan Geologi / Geological Heritage

Kajian warisan geologi telah dijalankan bagi memastikan khazanah alam semulajadi yang sangat berharga dapat dipulihara bagi tatapan generasi akan datang. Menerusi kajian ini, konsep tapak terpelihara, monumen geologi dan lanskap berpemandangan indah dapat diperkenalkan kepada orang awam. Pencirian warisan geologi telah dijalankan di tapak-tapak terpilih bagi cadangan dan penarafan samada sebagai geotapak, tapak warisan geologi kebangsaan atau geopolik.

Geological heritage studies were carried out to ensure that the wealth of nature can be conserved for future generations. Through these studies, the concept of site conservation, geological monument, and beautiful landscape can be promoted to the public. Characterisation on the geological heritage has also been carried out at the selected sites in order to propose and promote the sites to either geosite, national geological heritage site or geopolik status.

## Hidrogeologi / Hydrogeology

Aktiviti hidrogeologi dilaksanakan di bawah Projek Pembangunan Air Bawah Tanah RMKe-10. Projek ini dijalankan oleh pejabat-pejabat negeri bagi mendapatkan maklumat air bawah tanah untuk tujuan pemodelan kawasan lembangan, menilai potensi sumber air bawah tanah dan membekalkan air bersih kepada penduduk di kawasan yang menghadapi masalah bekalan air.

Pembangunan air bawah tanah di negeri-negeri juga merupakan sebahagian daripada Projek Bidang Keberhasilan Utama Negara (NKRA) yang telah dijalankan melalui kerjasama antara JMG dengan beberapa agensi kerajaan. JMG Johor, Selangor / Wilayah Persekutuan, Kelantan, Pahang dan Sarawak telah menjalin kerjasama dengan Jabatan Alam Sekitar dalam menjalankan penggerudian dan pembinaan telaga untuk memadam kebakaran bermusim di kawasan tanah gambut yang kering.

Di bawah Projek Khas Bekalan Air, Jabatan telah menyumbang kepakaran dalam bidang air bawah tanah melalui kerjasama dengan pelbagai agensi seperti Kementerian Tenaga, Teknologi Hijau dan Air Malaysia (KeTTHA). Badan Kawal Selia Air Negeri Sembilan (BKSA) dan Kementerian Kemajuan Luar Bandar dan Wilayah (KKLW).

Pemantauan air bawah tanah dijalankan sepanjang tahun untuk memantau kualiti air, memelihara dan mengelakkan pengurangan sumber air bawah tanah yang disebabkan oleh pengepaman berlebihan dan percemaran. Pemantauan di kawasan akuifer cetek seperti di kawasan gambut pula dijalankan untuk memantau penurunan paras air bawah tanah terutama yang berkaitan dengan aktiviti pertanian yang menyebabkan kawasan tersebut menjadi kering dan terdedah kepada kebakaran semasa musim kemarau. Program pemantauan yang dijalankan meliputi pensampelan dan pengukuran paras air bawah tanah serta penyelenggaraan sistem penaisan air bawah tanah ringkas (SPATR).

Hydrogeology activities undertaken include the implementation of groundwater development projects under the RMKe-10. The projects were carried out by the state offices to acquire groundwater data for the purpose of basin modelling, assessment of potential of groundwater resources at certain areas as well as to provide clean water for the people in areas facing shortage of water supply.

Groundwater development in each state constitutes part of the National Key Result Area (NKRA). The development was carried out through cooperation between JMG and various state agencies. JMG Johor, Selangor / Federal Territories, Kelantan, Pahang and Sarawak have collaborated with Department of Environment Malaysia in carrying out drilling and developing wells to supply water for the seasonal fire-fighting in dry peatland areas.

Under the Water Supply Special Project, JMG has contributed its expertise through collaboration with various such as Ministry of Energy, Green Technology and Water (KeTTHA) and Badan Kawal Selia Air Negeri Sembilan (BKSA) and Ministry of Rural Development (KKLW).

Monitoring of groundwater was carried out in throughout the year to monitor water quality, preserve and prevent reduction of groundwater resources due to over-pumping and contamination. In addition, monitoring of shallow peat aquifers was also carried out to check water levels in peat land used for agricultural purposes, where peat land can become dry, combustible and fire-prone during dry seasonal spells. Monitoring programmes include the measurement of groundwater levels, collection of samples for laboratory analysis and maintenance of Groundwater Filtration Systems (SPATR).

## Pembangunan Air Bawah Tanah

### Groundwater Development

**Penggerudian dan pembinaan telaga**  
**Drilling and well construction**

Negeri State	Lokasi Location	TE* EW*	TP* PW*	TM* MW*	Catatan Remarks
<b>Johor</b>	Muar	1	-	-	Pembinaan telaga untuk projek Penentuan Zon Potensi Air Bawah Tanah Lembangan Sungai Muar yang merupakan projek kerjasama JMG-ARSM. / Well construction for Potential Groundwater Zone of Sungai Muar Basin joint JMG-ARSM project.
	Kg. Sg. Peroh, Kluang	-	1	-	Telaga diguna sebagai sumber bekalan air bersih kepada penduduk kampung. / Supply clean water to villagers.
<b>Negeri Sembilan</b>	Felda Palong 14, Gemas 4	-	1	-	Membekalkan air bersih kepada 100 pengguna. Supply clean water to 100 consumers.
<b>Selangor</b>	Bestari Jaya, Kuala Selangor	8	1	-	Kajian awal potensi air tanah menggunakan sistem susunan tebing sungai. Jangkaan luahan air tanah adalah 30 juta liter sehari. Preliminary study on groundwater potential from river bank infiltration system. Expected yield is about 30 million litres per day.
<b>Perak</b>	Chikus-Sungai Manik	9	-	-	Pembinaan telaga pengejetan untuk tujuan pemantauan air tanah. Construction of jetting well for groundwater monitoring.
	Kinta	-	3	-	Pembinaan telaga pengeluaran bagi membekalkan air kepada Sekolah Rendah Agama Tarbiah Islamiah, Tanjung Rambutan, Maahad Tahfiz, Tambun dan Pusat Pemulihan Jiwa, Bt 8, Ulu Kinta. Construction of production well to supply water to Sekolah Rendah Agama Tarbiah Islamiah, Tanjung Rambutan, Maahad Tahfiz, Tambun and Pusat Pemulihan Jiwa, Bt 8, Ulu Kinta.
<b>Kedah</b>	Melele, Kodiang	-	1	-	Pembinaan telaga pengeluaran dilengkapi sistem SPATR bagi membekalkan air kepada pelajar SMA Nahdah Hasanah, Kodiang. Construction of production well complete with SPATR system to supply water for the students of SMA Nahdah Hasanah, Kodiang.
	Derang, Pokok Sena	1	-	-	Telaga akan dimajukan sebagai telaga pengeluaran bagi membekalkan air kepada pelajar SMA Maahad Tarbiyah. / The well will be developed as a production well to supply water for students of SMA Maahad Tarbiyah.
<b>Pahang</b>	Bukit Ibam, Rompin	1	2	-	Pembinaan telaga tiub dengan sistem bekalan air lengkap di kawasan bermasalah bekalan air. Projek memberi faedah kepada 100 orang penduduk. / Construction of production well to supply water in the water-stress area. The project benefited 100 residents.
	Tg. Lumpur, Kuantan	-	1		Telaga diguna untuk bekalan air kepada jemaah Surau Al-Ubudiyyah. Production well to supply water to Surau Al-Ubudiyyah.
<b>Kelantan</b>	Pasir Puteh, Bachok & Tumpat	-	-	10	Pembinaan telaga untuk pemantauan air tanah dan juga untuk pemodelan Lembangan Sungai Kelantan. Pemodelan menunjukkan luahan selamat akuifer cetek ialah 509 juta liter sehari. / Construction of wells for groundwater monitoring and Sg. Kelantan basin modelling. Modelling indicates a safe yield value for shallow aquifer of 509 million litres per day.

<b>Terengganu</b>	Kemaman	21	-	-	Pembinaan telaga eksplorasi bagi mendapatkan data untuk pemodelan Lembangan Kemaman. / <b>Construction of exploration wells for Kemaman Basin modeling.</b>
	Kg. Pelam, Kuala Berang	-	1	-	Pembinaan telaga untuk tujuan ternakan kambing. <b>Well construction for animal farming project.</b>
	Batu Rakit	-	1	-	Pembinaan telaga pengeluaran di SM Tengku Mizan Zainal Abidin untuk membekalkan air tambahan. / <b>Production well construction for Tengku Mizan Zainal Abidin Secondary School to provide supplementary water supply.</b>
<b>Sabah</b>	Kg. Kuala Punteh, Keningau	-	1	-	Pembinaan telaga pengeluaran yang bermanfaat kepada 800 orang penduduk kampung. / <b>Construction of production well benefited about 800 villagers.</b>

TE\* / EW\* = Telaga Eksplorasi / Exploration Well

TP\* / PW\* = Telaga Pengeluaran / Production Well

TM\* / MW\* = Telaga Pemantauan / Monitoring Well

### **Penggerudian dan pembinaan telaga di kawasan kebakaran tanah gambut Drilling and construction of wells in fire prone peat area**

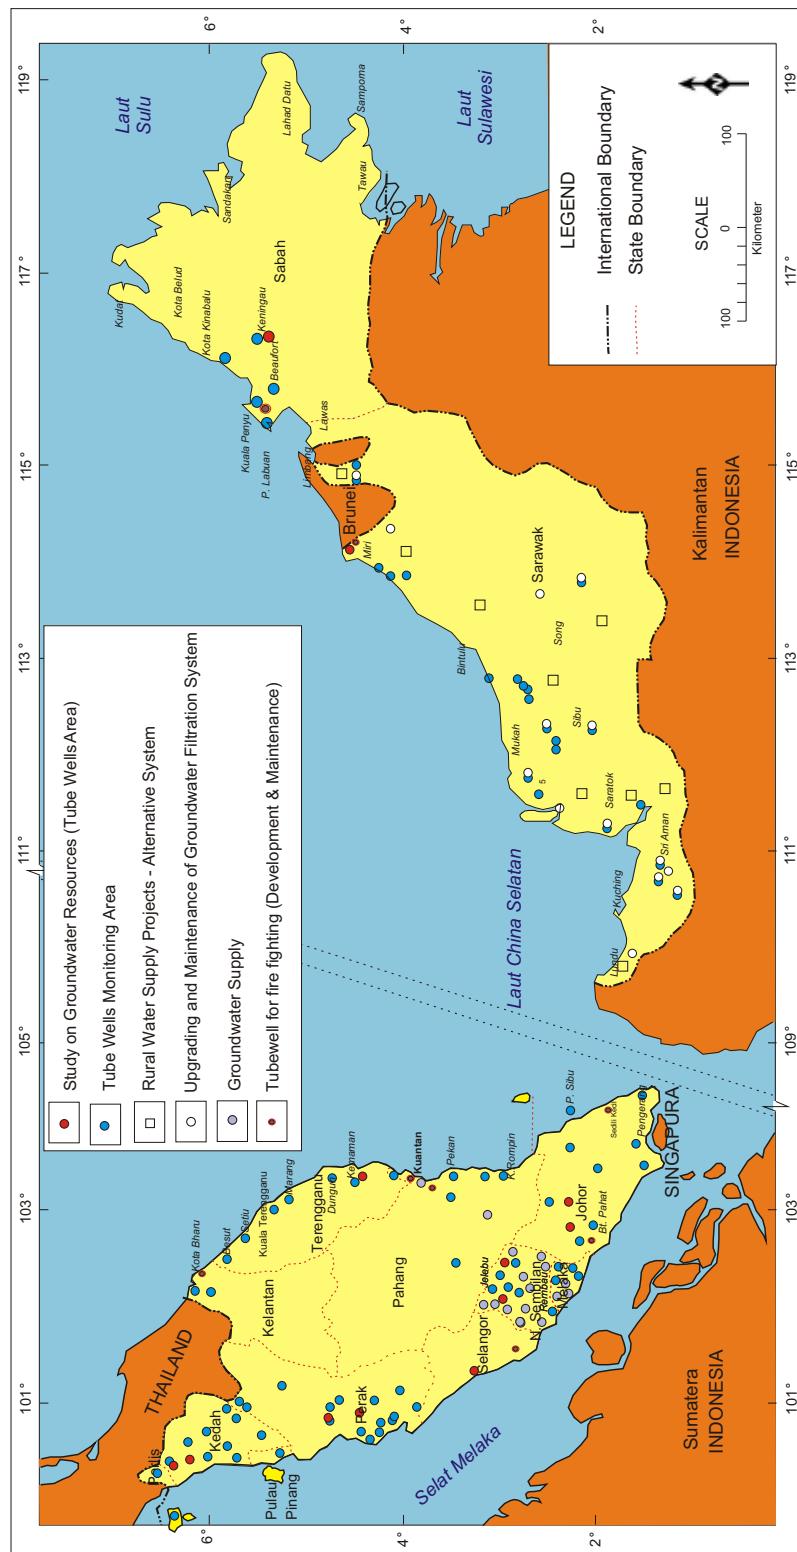

<b>Negeri State</b>	<b>Lokasi Location</b>	<b>Luahan telaga / Yield (m<sup>3</sup>/jam)</b>	<b>Kedalaman Depth (m)</b>	<b>Catatan Remarks</b>
<b>Pahang</b>	Parit Jono, Muar	9.1	60	Telaga telah tersedia untuk digunakan bagi mengawal kebakaran. <b>The wells are ready for use in case of peat fire.</b>
	Kampung Tuanseh, Kota Tinggi	6.4	84	
<b>Selangor</b>	Pulau Kempas, Kuala Langat	38	-	
	Bukit Cheding, Kuala Langat	36	-	
<b>Pahang</b>	Gebeng, Kuantan	16	25	
	Kg. Batu Putih, Penor, Kuantan	30	30	
<b>Kelantan</b>	Kg Kual Kecil, Bachok	42	60

**Projek khas bekalan air**  
**Special water supply project**

Projek Project	Negeri State	Sumber Kewangan Fund Source	Catatan Remarks
Projek Penilaian Potensi Sumber Air Bawah Tanah di Negeri Sembilan	Negeri Sembilan	Badan Kawal Selia Air Negeri Sembilan (BKSA)	Menjalankan penilaian potensi sumber air bawah tanah di kawasan yang menghadapi masalah bekalan air. <i>Carried out groundwater potential assessment in areas with water supply problem.</i>
Projek Menaik Taraf Empangan Mini Air Graviti Kg. Tubiel, Matunggong, Kudat	Sabah	Kementerian Sumber Asli dan Alam Sekitar <i>Ministry of Natural Resources and Environment</i>	Menaik taraf empangan mini air graviti dan sistem pempaihan yang telah memberi manfaat kepada 120 orang penduduk. <i>Upgrading of mini dam and piping system that have benefited 120 villagers.</i>
Projek NKRA <i>Rural Basic Infrastructure</i>	Sarawak	Kementerian Kemajuan Luar Bandar dan Wilayah <i>Ministry of Rural and Regional Development</i>	Menjalankan 61 projek sistem bekalan air graviti, 22 sistem penuaian air hujan, 9 sistem penapisan air sungai atau kolam dan sebuah sistem telaga tiub. Projek ini telah memberi faedah kepada 2,618 keluarga iaitu seramai 13,090 orang yang tinggal di pedalaman Sarawak. <i>Carried out water supply projects that included 61 gravity-feed systems, 22 rain harvesting systems, 9 filtration systems for river and pond water, and one tube well system. A total of 2,618 families with 13,090 people in the rural areas of Sarawak have benefited from the NKRA project.</i>
Penyelenggaraan Sistem Penapisan Air Bawah Tanah Sekolah Sarawak (SPATR)		Kementerian Pelajaran Malaysia <i>Ministry of Education Malaysia</i>	Menjalankan penyelenggaraan sistem SPATR di 14 buah sekolah di sekitar Kuching, Kapit, Sibu, Mukah, Miri, Samarahan, Betong dan Limbang. <i>Carried out maintenance work for the SPATR systems at 14 schools in Kuching, Kapit, Sibu, Mukah, Miri, Samarahan, Betong and Limbang areas.</i>
Projek Bekalan Air Graviti <i>Gravity Water Supply Project</i>			Menyiapkan projek bekalan air graviti yang melibatkan kerja pemasangan paip dan pembinaan takungan air di Sk Telagus, Balai Ringin, Bahagian Kota Samarahan. <i>Completion of water supply project that included laying and installation of pipes for gravity feed system at Sk Telagus, Balai Ringin, Bahagian Kota Samarahan.</i>

**Program pemantauan air bawah tanah  
Groundwater monitoring programme**

<b>Negeri State</b>	<b>Bil. Telaga Dipantau No. of Well Monitored</b>	<b>Catatan Remarks</b>
Johor	40	Pemantauan dijalankan dua kali setahun di seluruh negeri dan pulau-pulau luar pantai dan didapati tidak ada perubahan ketara kualiti air tanah. <i>Monitoring was conducted twice a year throughout the state including offshore islands and there were no significant changes in groundwater quality.</i>
Negeri Sembilan	24	Mendapatkan data sekitaran kualiti air tanah dan paras air bawah tanah. Pemantauan termasuk menyelenggara sistem rawatan air tanah di perkampungan Orang Asli dan menaik taraf sistem pempaipan dan rawatan telaga di Institusi Pemulihan Dadah Jelebu.
Melaka	21	To obtain groundwater quality and groundwater level baseline data. The monitoring involved maintenance of the groundwater treatment system at Orang Asli villages and upgrading of piping and groundwater treatment system at Institusi Pemulihan Dadah Jelebu.
Selangor	40	Pemantauan dijalankan dua kali setahun dan tidak ada perubahan ketara kualiti air tanah. <i>Monitoring was conducted twice a year and there were no significant changes in groundwater quality.</i>
Perak	45	Pemantauan dijalankan dua kali setahun dan tidak ada perubahan ketara kualiti air tanah. <i>Monitoring was conducted twice a year and there were no significant changes in groundwater quality.</i>
Kedah	28	Persampelan dan pengukuran paras air tanah dijalankan sekali setahun dan tidak ada perubahan ketara kualiti air tanah.
Perlis	1	<i>Sampling and water level measurement were carried out once a year and there were no significant changes in groundwater quality.</i>
Pulau Pinang	2	<i>Sampling and water level measurement were carried out once a year and there were no significant changes in groundwater quality.</i>
Pahang	17	Tidak ada perubahan kualiti dan paras air bawah tanah yang ketara. <i>No significant changes in groundwater level and quality.</i>
Kelantan	68	Pengukuran paras air bawah tanah dijalankan sebulan sekali manakala pemantauan kualiti air bawah tanah dua kali setahun. Pemantauan mendapan tanah dijalankan empat kali setahun di kawasan medan telaga pengeluaran Pintu Geng, Wakaf Baru, Pasir Hor dan Kenali. <i>Groundwater level was measured once a month while water sampling was carried out twice a year. Land subsidence monitoring was conducted 4 times a year in Pintu Geng, Wakaf Baru, Pasir Hor and Kenali well fields.</i>
Terengganu	49	Pemantauan dijalankan sekali setahun di seluruh negeri dan pulau-pulau luar pantai dan didapati tidak ada perubahan ketara kualiti air tanah. <i>Monitoring was conducted once a year throughout the state including offshore islands and there were no significant changes in groundwater quality.</i>
Sarawak	22	Tidak ada perubahan ketara kualiti air bawah tanah. <i>There were no major changes in water quality.</i>
Sabah	26	Program pemantauan air bawah tanah tertumpu di kawasan Papar, Kuala Penyu, Menumbok dan Keningau. Meliputi kerja-kerja persampelan dan pengukuran paras air bawah tanah. <i>Groundwater monitoring programme involved the groundwater table measurement and water sampling. Carried out in Papar, Kuala Penyu, Menumbok and Keningau areas.</i>

Demonstration of groundwater pumping for peat fire control at Kg. Kual, Bachok, Kelantan.

# Geologi Kejuruteraan

## Engineering Geology

Pembangunan yang pesat telah menyebabkan kawasan sesuai untuk pembangunan semakin berkurangan sehingga memasuki kawasan sensitif alam sekitar termasuk kawasan lereng bukit. Sehubungan itu, Jabatan telah mengambil langkah-langkah yang proaktif bagi mencegah atau mengurangkan berlakunya kejadian geobencana dengan melaksanakan pemetaan geologi terain dan pemetaan geologi kejuruteraan. Maklumat daripada aktiviti pemetaan tersebut digunakan secara meluas di dalam perancangan guna tanah oleh pihak berkuasa tempatan dan pelbagai agensi kerajaan. Jabatan juga terlibat secara langsung dalam menjalankan siasatan geobencana seperti kejadian tanah runtuh dan lubang benam untuk mengetahui punca kejadian dan faktor-faktor geologi pencetus kejadian dan seterusnya mencadangkan langkah kawalan dan pencegahan kepada pihak berkuasa negeri.

The rapid pace of development has resulted in the corresponding decrease of ideal areas suitable for development and at times the development has encroached into environmentally sensitive areas including hillsides. Accordingly, the department has taken proactive measures to prevent or reduce geohazard incidents by implementing terrain mapping and engineering geology mapping. Information from these mapping activities was extensively referred to in landuse planning by the local authorities and government agencies. The department was also directly involved in geohazard investigations such as landslide and sink hole occurrences in order to determine the possible causes and contributing geological factors and ultimately to proposed viable effective mitigation and prevention measures to the state authorities.

**Pemetaan geologi kejuruteraan**  
**Engineering geological mapping**

Negeri / State	Kawasan / Area	Jenis pemetaan / Type of mapping	Liputan / Coverage	Catatan / Remarks

## Geologi Marin Marine Geology

Aktiviti Geologi Marin dalam tahun ini tertumpu kepada perancangan survei hidrografi dan penyediaan draf laporan submission Projek Pelantar Benua Malaysia Fasa 2 untuk Commission on the Limits of the Continental Shelf (CLCS), survei geofizik dan persampelan bagi Projek Sumber Pasir Laut Yayasan Melaka dan juga pelaksanaan program saintifik bersama dengan Universiti Malaysia Terengganu.

Aktiviti utama Projek Pelantar Benua Malaysia Fasa 2 melibatkan perancangan survei hidrografi di Laut Cina Selatan yang dijangka akan dilaksanakan dalam tahun 2013. Perancangan teliti diperlukan untuk survei ini memandangkan projek ini berkepentingan negara dan berkos tinggi. Kompilasi data telah diuruskan berterusan, di samping itu juga beberapa siri mesyuarat, sesi perbincangan, kursus dan bengkel telah diadakan untuk pasukan kerja teknikal bagi merangka dan menyediakan laporan submission kepada CLCS di Bangsa-Bangsa Bersatu.

Projek kajian sumber pasir laut Yayasan Melaka telah dimulakan pada bulan Jun 2012 dengan pelaksanaan survei geofizik di perairan laut Negeri Melaka untuk memperoleh data seismik, side-scan sonar, batimetri dan navigasi. Sejumlah 455 km garis survei geofizik telah disiapkan, manakala sejumlah 76 sampel cekau dan 76 sampel teras telah dikutip dan selesai pada bulan Disember 2012. Analisis sampel juga telah disiapkan.

Marine Geology activities for the year focussed on hydrographic survey planning and drafting of the Malaysia Continental Shelf Phase 2 submission report for the Commission on the Limits of the Continental Shelf (CLCS), geophysical and sampling survey for the Yayasan Melaka marine sand resource project as well as joint scientific programmes with University Malaysia Terengganu.

The main activity for Phase 2 of the Continental Shelf Project involved planning of the hydrographic survey in the South China Sea which is expected to be carried out in 2013. Careful planning for the survey is necessary as this project is of national interest and incurs high cost. Compilation of data is currently on-going, together with a series of meetings, discussion, courses and workshops which were also conducted for the Technical Working Group in preparation for report submission to CLCS in the United Nations.

Marine sand resource study for Yayasan Melaka was initiated in June 2012 with the conduct of geophysical surveys in offshore Malacca waters to acquire seismic, side-scan sonar, bathymetry and navigation data. A total of 455 km of geophysical survey lines were completed together with the collection of a total of 73 grab and 76 core samples under the sampling programme which was completed in December 2012. Analysis of these samples was also completed.

Satu Memorandum Persefahaman (MOU) telah ditandatangani di antara Jabatan Mineral dan Geosains (JMG) dengan Universiti Malaysia Terengganu (UMT) pada 25hb September 2012. MOU ini akan memberikan manfaat signifikan kepada kedua-dua pihak signatori melalui pelbagai bidang kajian dan penyelidikan bersama terutamanya berkaitan perubahan iklim, kenaikan paras laut dan pengurusan persisiran pantai. Pada bulan November 2012, satu Program Persampelan Geologi Kuaterner di bawah Projek DelSea II telah diadakan di UMT yang melibatkan peserta dari JMG dan UMT.

Sejumlah 25 permohonan dari pelbagai syarikat untuk lesen melombong pasir laut di bawah Seksyen 4 Akta Pelantar Benua 1966 (dipinda 1972) telah dikaji dan ulasan telah dikemukakan kepada Jabatan Ketua Pengarah Tanah dan Galian (JKPTG). Permohonan lesen melibatkan kawasan lepas pantai di Negeri Selangor, Perak, Johor, Pahang, Negeri Sembilan, Melaka dan Labuan. Satu permohonan khidmat nasihat berhubung dengan permohonan pasir laut juga telah diberikan.

A Memorandum of Understanding (MOU) was signed between the Minerals and Geoscience Department (JMG) and University Malaysia Terengganu (UMT) on 25th September 2012. The MOU will benefit both signatories significantly through collaborative research studies notably on climate change, sea level rise and coastal management. In November 2012, a Quaternary Geology Sampling Programme under the auspices of DelSea II Project was held at UMT and involved participants from both JMG and UMT.

A total of 25 applications from various companies for offshore sand mining license under Section 4, Continental Shelf Act 1966 (revised 1972) were reviewed for the Department of Director General of Land and Mines. The applications were from offshore waters of Selangor, Perak, Johore, Pahang, Negeri Sembilan, Malacca and Labuan. One advisory service was also provided on marine sand application.

Pengambilan sampel teras semasa survei untuk Projek Yayasan Melaka.  
Core sampling during the survey for Yayasan Melaka Project.

Interpretasi sampel bersama Dr Yoshiki Saito dari Jepun semasa Program Persampelan Geologi Kuaterner di bawah DelSea II.  
Sample interpretation with Dr Yoshiki Saito from Japan during Quaternary Geology Sampling Program under DelSea II.

## Khidmat Nasihat Geosains Geoscience Advisory Services

JMG secara aktif memberi khidmat nasihat kepada agensi kerajaan, pihak swasta dan individu dalam aspek hidrogeologi, geologi kejuruteraan, ulasan guna tanah dan maklumat geosains.

Khidmat nasihat hidrogeologi merangkumi pelesenan air bawah tanah, kelulusan sumber air mineral semula jadi dan potensi penggunaan sumber air bawah tanah untuk pertanian, industri dan domestik. Umumnya di semua negeri, JMG adalah ahli tetap di dalam Jawatankuasa Penggunaan Sumber Air Peringkat Negeri dan Jawatankuasa Kelulusan Pembungkusan Sumber Air Mineral Semulajadi dan Jawatankuasa Pelesenan Sumber Air Bumi.

Khidmat nasihat geologi kejuruteraan dan guna tanah pula merangkumi aspek perancangan pembangunan bandar baru, penjajaran jalan dan perancangan guna tanah. JMG juga terlibat dalam penilaian kawasan berisiko geobencana melalui keanggotaannya dalam jawatankuasa peringkat negeri seperti Jawatankuasa Perancangan Negeri, Jawatankuasa Bencana Negeri, Jawatankuasa Kawasan Sensitif Alam Sekitar dan Jawatankuasa Tanah Tinggi dan Pembangunan Lereng Bukit.

### Ulasan Pusat Setempat (OSC)

Kawalan pembangunan adalah sangat penting di negara ini untuk memperkasa dan memperkemaskini proses perbandaran. Sehubungan itu, fungsi jabatan menjadi semakin penting dan mencabar, terutamanya bagi cadangan pemajuan yang melibatkan kawasan sensitif alam sekitar dan kawasan sensitif geologi. JMG adalah agensi tunggal kerajaan yang mempunyai kepakaran khusus dalam bidang geologi dan bertanggungjawab membekalkan maklumat geologi bagi menilai risiko geobencana dan kesan pembangunan ke atas alam sekitar.

Sepanjang tahun ini JMG telah memberi khidmat nasihat secara aktif dalam aspek kebenaran merancang untuk Pusat Setempat (OSC) kepada PBT di samping memberikan pandangan teknikal kepada pihak swasta terutama kepada pihak pemaju di mana sebanyak 7,041 ulasan OSC telah dikeluarkan.

JMG gives advisory services to government agencies, private sectors and individuals on the aspects of hydrogeology, engineering geology, reviews of land use planning and geoscience information.

Advisory service on hydrogeology covers the licensing of groundwater extraction, approval on natural mineral water sources and giving advice on the potential use of groundwater resources for agriculture, industry and domestic uses. JMG is also a permanent member in the State Water Resources Management Committee, Licensing of Natural Mineral Water Committee and Licensing of Groundwater Resources Committee.

Advisory service on engineering geology and land use covers the aspects of planning and development of new township, road alignment and land use planning. JMG is also involved in the assessment of areas with geohazard risk and serves as a member in the State Planning Committee, State Disaster Committee, Environmentally Sensitive Areas Committee and High Land and Hillside Development Committee.

### One Stop Centre (OSC) Review

Appropriate control of development is very important in this country in order to strengthen and streamline the process of urbanisation. Accordingly, the functions of the department are becoming increasingly more important and challenging, especially in assessing and approving development proposals involving environmentally and geologically sensitive areas. Among the government agencies, JMG is the sole department with specialised expertise in geology and is responsible in providing geological information to assess geohazard risk and the effect of development on the environment.

During the year, JMG has been actively giving advisory services to local authorities through One Stop Centre (OSC) as well as giving technical support to the private sector mainly to the property developers. A total of 7,041 OSC reviews were completed.

	5	Ulasan bagi Rancangan Tempatan Daerah (RTD) dan pindaan-pindaan RTD. <i>Reviews for Local Plan (RTD) and RTD Revisions.</i>
<b>Sarawak</b>	8	Khidmat nasihat berkaitan maklumat geologi kejuruteraan <i>Advisory services regarding engineering geological information</i>
<b>Sabah</b>	102	Input geologi kejuruteraan bagi siasatan tapak cadangan pembangunan di kawasan sensitif geologi di Sabah. / <i>Engineering geological input for proposed development site investigation in geological sensitive area in Sabah.</i>
<b>Jumlah: Total :</b>	259	

## Khidmat Nasihat Lain

JMG telah dilantik oleh Universiti Sains Malaysia untuk menjalankan kerja-kerja penggerudian di sekitar Bukit Bunuh, Lenggong, Perak bagi menentukan stratigrafi dan ciri-ciri sub-permukaan kesan hentaman meteorit. Sebanyak dua lubang gerudi dengan kedalaman 118 m dan 61.4 m telah berjaya digerudi bagi tujuan tersebut. Teras gerudi yang diperolehi telah dianalisis untuk mengenal pasti jenis batuan dan menentukan perubahan mineral kesan hentaman tersebut.

Khidmat nasihat telah disampaikan melalui Seminar Kajian Geotermal Sebagai Sumber Tenaga Boleh Baharu yang telah dianjurkan di Marriott Hotel, Putrajaya pada 17.02.2012 sebagai kick-off pelaksanaan projek dan untuk memberi kefahaman kepada Ahli Jawatankuasa Pelaksana dan agensi terlibat mengenai kajian geotermal yang akan dilaksanakan. Seminar adalah usahasama JMG Perak, Sustainable Energy Development Authority Malaysia (SEDA) dan Kementerian Sumber Asli dan Alam Sekitar (NRE).

Bagi memberi kefahaman dan meningkatkan kesedaran masyarakat terhadap risiko kejadian batu runtuh berhampiran bukit batu kapur, satu seminar Kesedaran Risiko Batu Runtuh di Kawasan Bukit Batu Kapur Lembah Kinta, Perak telah dianjurkan bersama oleh JMG Perak and Majlis Bandaraya Ipoh (MBI) pada 13 Mac 2012 di Dewan Azlan Shah, MBI.

Seminar Perubahan Aras Laut Kuno – Kefahaman Terhadap Sejarah Pembentukan Bumi telah dianjurkan pada 26 Mac 2012 di Mini Auditorium, Institut Penyelidikan Hidraulik Kebangsaan Malaysia (NAHRIM), Serdang, Selangor. Objektif seminar adalah untuk meningkatkan pengetahuan para peserta terhadap perubahan aras laut kuno implikasi kenaikan aras laut akibat perubahan cuaca. Seminar adalah anjuran bersama JMG Malaysia, Perak, NAHRIM dan Universiti Kebangsaan Malaysia.

## Other Advisory Services

JMG has been appointed by the University Science of Malaysia to carry out drilling works at the vicinity of Bukit Bunuh, Lenggong, Perak to determine the stratigraphy and the characteristics of sub-surface effects of meteorite impact. A total of two deep drill holes with depths of 118 m and 61.4 m have been successfully drilled for these purposes. The drill cores obtained were studied for rock type identification and mineral changes due to the meteorite impact.

Advisory services were delivered through a seminar on Geothermal as Renewable Energy Study which was conducted at Marriott Hotel, Putrajaya as a kick-off for the project implementation and for better understanding for the Implementation Committee Member and related agencies on the geothermal study that will be undertaken. The seminar was jointly organized by JMG Perak, Sustainable Energy Development Authority Malaysia (SEDA) and Ministry of Natural Resource and Environment (NRE).

In order to increase public awareness on rockfall risk near limestone hills, an awareness seminar on Rockfall Risk at Limestone Hills in Kinta Valley was jointly organised by JMG Perak and the Ipoh City Council (MBI) on the 13th March 2012 at Dewan Azlan Shah, MBI.

Seminar On Paleo Sea Level Change – Understanding The Earth Formation History was held on 26th March 2012 at Mini Auditorium, National Hydraulic Research Institute of Malaysia (NAHRIM), Serdang, Selangor. The objective of the seminar is to disseminate information on paleo sea level changes and implication of sea level changes due to climate change.

# Aktiviti Mineral Mineral Activities

Aktiviti-aktiviti mineral yang dijalankan oleh JMG melibatkan penilaian sumber mineral berlogam, mineral perindustrian dan mineral tenaga. Di samping itu, JMG juga berperanan membekalkan maklumat komoditi mineral bagi membantu meningkatkan perkembangan industri mineral negara.

Penilaian sumber mineral berlogam dilaksanakan pada peringkat tinjauan dan juga susulan bagi mineral-mineral terpilih. Kajian telah menemui beberapa kawasan berpotensi emas, bijih besi, timah dan mangan. Penilaian sumber mineral perindustrian di beberapa buah negeri pula telah menggariskan kawasan-kawasan yang mempunyai rizab pasir binaan, feldspar, batuan silika, batu kapur dan lempung. Hasil penilaian sumber mineral tenaga yang dijalankan di Sarawak dan Sabah pula telah mengenal pasti beberapa kewujudan dan rizab batu arang yang berpotensi.

Mineral activities carried out by JMG involve resource evaluation for metallic, industrial and energy minerals. Apart from that, JMG also plays a role in providing mineral commodity information to support the development of the nation's mineral industry.

Metallic mineral resource evaluation for selected minerals involved reconnaissance and follow-up survey. As a result, several localities with potential for gold, iron ore, tin and manganese mineralization were delineated. Resource evaluation for industrial minerals in several states has also delineated areas with significant reserves of construction sand, feldspar, silica rock, limestone and clay. For energy minerals, coal resource evaluation in Sarawak and Sabah has identified several potential coal occurrences and reserves.

## Mineral Berlogam / Metallic Minerals

### Penilaian Sumber Mineral Berlogam

Penilaian tinjauan sumber mineral berlogam telah dijalankan di lima buah negeri iaitu Johor, Negeri Sembilan, Kedah, Kelantan dan Terengganu dengan jumlah liputan kawasan seluas  $135 \text{ km}^2$ . Hasil kajian awalan menunjukkan kewujudan berbagai mineral yang berpotensi di kebanyakan negeri.

Penilaian susulan/terperinci sumber mineral berlogam telah dilaksanakan di enam buah negeri iaitu Negeri Sembilan, Perak, Kedah, Pahang, Sarawak dan Sabah dengan jumlah kawasan liputan seluas  $184 \text{ km}^2$ . Anomali emas, bijih besi, timah dan mangan telah ditemui di negeri-negeri tersebut.

### Metallic Mineral Resources Evaluation

Reconnaissance evaluation for metallic mineral resources was carried out in five states namely Johore, Negeri Sembilan, Kedah, Kelantan and Terengganu covering a total area of  $135 \text{ km}^2$ . Preliminary study showed that there are occurrences of potential minerals in most of these states.

Follow-up metallic mineral resource evaluation was carried out in six states namely Negeri Sembilan, Perak, Kedah, Pahang, Sarawak and Sabah covering a total area of  $184 \text{ km}^2$ . Gold, iron ore, tin ore and manganese anomalies were identified.

**Penilaian sumber mineral berlogam (tinjauan)**

## Mineral Perindustrian / Industrial Minerals

### Penilaian Sumber Mineral Perindustrian

Projek Penilaian Sumber Mineral Perindustrian merupakan sambungan kepada Projek Mineral Perindustrian Semenanjung, Projek Mineral Perindustrian Sarawak dan Projek Mineral Perindustrian Sabah yang telah dijalankan dalam Rancangan Malaysia Ke-9. Kesemua projek telah dilaksanakan secara tinjauan dan susulan bagi kawasan-kawasan yang telah dikenal pasti berpotensi.

Jenis-jenis mineral perindustrian yang dikaji dengan jumlah liputan kawasan masing-masing ialah lempung – 87 km<sup>2</sup>, batuan silika – 56.8 km<sup>2</sup>, feldspar – 1.5 km<sup>2</sup>, Barit – 25 km<sup>2</sup>, pasir binaan – 64 km<sup>2</sup> dan batu kapur – 3.5 km<sup>2</sup>. Kajian yang dijalankan telah mengenal pasti longgokan sumber mineral perindustrian dengan anggaran rizab bagi pasir binaan 185.5 juta tan metrik, batuan silika 413 juta tan metrik, lempung 297 juta tan metrik dan batu kapur 719 juta tan metrik.

### Industrial Mineral Resources Evaluation

The Industrial Mineral Resources Evaluation Projects were continuation of the Peninsular Industrial Mineral Project, Sarawak Industrial Mineral Project and Sabah Industrial Mineral Project that were carried out under the Ninth Malaysian Plan. Both reconnaissance and follow-up surveys were carried out in all potential areas previously identified.

The industrial minerals studied with their respective coverage areas are clay – 87 km<sup>2</sup>, silica rock – 56.8 km<sup>2</sup>, feldspar – 1.5 km<sup>2</sup>, Baryte – 25 km<sup>2</sup>, construction sand – 64 km<sup>2</sup> and limestone – 3.5 km<sup>2</sup>. Estimated reserves for construction sand (185.5 million tonnes), silica rock (413 million tonnes), clay (297 million tonnes) and limestone (719 million tonnes) were identified from these studies.

**Barit  
Baryte**

Negeri State	Kawasan Area	Liputan Coverage (km <sup>2</sup> )	Catatan Remarks
Pahang	Jenderak, Kuala Tembeling, Pulau Tawar	25	Analisis makmal sedang dilakukan. <i>Laboratory analysis in progress.</i>

**Pasir Binaan  
Construction Sand**

Negeri State	Kawasan Area	Liputan Coverage (km <sup>2</sup> )	Catatan Remarks
Sabah	Sandakan	56	Kajian menunjukkan berpotensi digunakan sebagai bahan binaan. Anggaran rizab adalah 70 juta meter padu (185.5 juta tan metrik). <i>The results shows that this area has potential for construction sand. Estimated reserve is about 70 million cubic metres (185.5 million tonnes).</i>
	Sungai Tuaran	8	Tujuh zon dengan jumlah rizab sebanyak 42,000 tan metrik telah dikenal pasti. Keputusan ujian makmal menunjukkan pasir dari Sungai Papar sesuai digunakan sebagai agregat halus dalam kerja-kerja binaan. <i>Seven zones with total reserves of 42,000 tonnes were identified. Results from the laboratory shows that the sand is suitable for use as fine aggregates.</i>
Jumlah : Total :		64	186 juta tan metrik / <i>million tonnes</i>

**Feldspar  
Feldspar**

Negeri State	Kawasan Area	Jenis batuan asal Parent rock type	Liputan Coverage (km <sup>2</sup> )	Catatan Remarks
Kelantan	Gua Musang (Padang Malim)	Tuf riolit <i>Rhyolitic tuff</i>	1.5	Feldspar di kawasan ini mempunyai nilai purata fluks (Na <sub>2</sub> O + K <sub>2</sub> O) 9% <i>Feldspar in this area has an average flux (Na<sub>2</sub>O + K<sub>2</sub>O) value of 9%.</i>

**Batuhan Silika  
Silica Rock**

Negeri State	Kawasan Area	Jenis batuan Rock type	Liputan Coverage (km <sup>2</sup> )	Catatan Remarks
Negeri Sembilan	Kemajuan Kg. Sg. Muntoh, Jelebu	Batuhan kuarza Quartz rock	0.3	Anggaran rizab: 35.2 juta meter padu (93.3 juta tan metrik). Purata SiO <sub>2</sub> 98.8% dan berpotensi sebagai ferrosilikon aloi. <b>Estimated reserve: 35.2 million cubic metres (93.3 million tonnes).</b> <b>Average value of SiO<sub>2</sub> is 98.8% and potential for ferrosilicon alloy.</b>
	Padang Biawas, Kuala Pilah	Batuhan kuarza Quartz rock	0.1	Anggaran rizab: 7.3 juta meter padu (19.3 juta tan metrik). Purata SiO <sub>2</sub> 98.8% dan berpotensi sebagai ferrosilikon aloi. <b>Estimated reserve: 7.3 million cubic metres (19.3 million tonnes).</b> <b>Average value of SiO<sub>2</sub> is 98.8% and potential for ferrosilicon alloy.</b>
	FELCRA Purun, Jelebu	Batuhan kuarza Quartz rock	0.1	Anggaran rizab: 3 juta meter padu (8.0 juta tan metrik). Purata SiO <sub>2</sub> 98.3% dan berpotensi sebagai ferrosilikon aloi. <b>Estimated reserve: 3 million cubic metres (8.0 million tonnes).</b> <b>Average value of SiO<sub>2</sub> is 98.3% and potential for ferrosilicon alloy.</b>
	Bukit Tajam, Port Dickson	Batuhan kuarza Quartz rock	1.2	Anggaran rizab: 102.7 juta meter padu (272.2 juta tan metrik). Purata SiO <sub>2</sub> 97.9% dan berpotensi sebagai ferrosilikon aloi. <b>Estimated reserve: 102.7 million cubic metres (272.2 million tonnes).</b> Average value of SiO <sub>2</sub> is 97.9% and potential for ferrosilicon alloy.
	Ladang Hillside, Seremban	Batuhan kuarza Quartz rock	0.1	Anggaran rizab: 0.1 juta meter padu (0.3 juta tan metrik). Purata SiO <sub>2</sub> 98.6%. <b>Estimated reserve: 0.1 million cubic metres (0.3 million tonnes).</b> <b>Average value of SiO<sub>2</sub> is 98.6%.</b>
Perak	Hulu Lasah (Daerah Kuala Kangsar)	Kuarza Quartz	1	Permatang kuarza mengandungi silika (SiO <sub>2</sub> ) dengan purata 99.1%. Anggaran rizab: 1.13 juta meter padu (3 juta tan metrik). <b>The average of silica (SiO<sub>2</sub>) is 99.1%. Estimated reserve: 1.13 million cubic metres (3 million tonnes).</b>
	Lawin (Daerah Hulu Perak)	Kuarzit Quartzite	2	Permatang kuarzit mengandungi silika (SiO <sub>2</sub> ) dengan purata 97.9%. Anggaran rizab: 1.89 juta meter padu (5 juta tan metrik). <b>The average of silica (SiO<sub>2</sub>) is 97.9%. Estimated reserve: 1.89 million cubic metres (5 million tonnes).</b>
Terengganu	Sg. Mas, Kemaman	Kuarza Quartz	1.5	Kajian tinjauan mendapati kawasan ini berpotensi sebagai sumber batuan silika. <b>Reconnaissance survey indicated that this area has the potential for silica rock resources.</b>
Sarawak	Lundu-Sematan, Kuching	Batu rijang Chert	50.5	Tiga kawasan dikenal pasti mempunyai sumber batuan silika. Anggaran rizab: 4.55 juta meter padu (12.05 juta tan metrik). <b>Three areas for silica rock resources have been identified. Estimated reserve: 4.55 million cubic metres (12.05 million tonnes).</b>
Jumlah: Total:			56.8	413.2 juta tan metrik / <b>million tonnes</b>

**Batu kapur  
Limestone**

Negeri State	Kawasan Area	Liputan Coverage (km <sup>2</sup> )	Catatan Remarks
<b>Kedah</b>	Pulau Timun	3.0	Anggaran rizab adalah sebanyak 596 juta tan metrik dengan beberapa lokaliti berkandungan magnesium tinggi. <i>Estimated reserve is 596 million tonnes where some localities show high magnesium content.</i>
<b>Perlis</b>	Wang Kelian & Kaki Bukit	0.5	Anggaran rizab adalah sebanyak 123 juta tan metrik di mana kebanyakan kandungan CaCO <sub>3</sub> adalah berjulat 80%-95%. <i>Estimated reserve is 123 million tonnes, where most of the CaCO<sub>3</sub> content range from 80% - 95%.</i>
Jumlah: / Total:		3.5	719 juta tan metrik / million tonnes

**Lempung  
Clay**

Negeri State	Kawasan Area	Jenis batuan asal Parent rock type	Liputan Coverage (km <sup>2</sup> )	Catatan Remarks
<b>Johor</b>	Sungai Perepat, Kota Tinggi		10	Anggaran rizab adalah sebanyak 27.3 juta tan metrik lempung marin dan berpotensi sebagai bahan mentah agregat ringan. Lempung yang dibakar menggelembung antara 6.3% hingga 16.4%. <i>Estimated reserve of marine clay is 27.3 million tonnes and can be used for lightweight aggregates. The clay after firing bloat between 6.3% to 16.4%.</i>
<b>Selangor</b>	Kampung Sungai Lang dan Olak Lempit, Daerah Kuala Langat		9	Dua longgokan telah dikenal pasti dengan anggaran rizab 121 juta tan metrik dan 16 juta tan metrik. <i>Two deposits were identified with estimated reserve of 121 million tonnes and 16 million tonnes respectively.</i>
	Ladang Sg. Buloh dan Sg Talang, Daerah Kuala Selangor		14	Dua longgokan telah dikenal pasti dengan anggaran rizab 52 juta tan metrik dan 81 juta tan metrik. <i>Two deposits were identified with an estimated reserve of 52 million tonnes and 81 million tonnes respectively.</i>
<b>Sarawak</b>	Mukah-Balingan, Mukah	Batuan berargilit Argillaceous rock	54	Longgokan kecil lempung dengan anggaran rizab 105,300 tan metrik telah dikenal pasti. <i>A small deposit of fire clay with an estimated reserve of 105,300 tonnes was identified.</i>
Jumlah: / Total:			87	297.4 juta tan metrik / million tonnes

# Mineral Tenaga Energy Mineral

## Penilaian Sumber Batu Arang

Penilaian sumber batu arang telah dilaksanakan di negeri Sarawak dan Sabah yang masing-masing meliputi jumlah kluasan  $60 \text{ km}^2$  dan  $30 \text{ km}^2$ . Eksplorasi batu arang pada peringkat tinjauan di Sarawak melibatkan kawasan Tunoh, Kapit dalam Formasi Nyalau. Ketebalan lapisan batu arang tersebut berjulat dari  $0.2 \text{ m}$  ke  $1.30 \text{ m}$  dan menunjukkan tekstur grafitik.

Di Sabah, kajian batu arang telah dilaksanakan di Blok Susui dan Sg. Naundung, Kalabakan. Unjuruan tambahan lipit batu arang sejauh  $500 \text{ m}$  telah dianggarkan di kawasan Blok Susui berdasarkan tafsiran survei geofizik. Manakala di kawasan Sg. Naundung, satu lipit batu arang telah ditemui berketedebal satu meter yang mempunyai gred *high volatile bituminous coal*.

## Coal Resources Evaluation

Coal evaluation was carried out in Sarawak and Sabah covering a total area of  $60 \text{ km}^2$  and  $30 \text{ km}^2$  respectively. Reconnaissance coal exploration in Sarawak involved re-assessment of coal resources in Nyalau Formation in Tunoh area, Kapit. The thickness of coal seam in this area ranges from  $0.2 \text{ m}$  to  $1.3 \text{ m}$  and the coal shows graphitic textures.

In Sabah, coal exploration was conducted in Susui Block, Pinangah area and in Sg Naundung, Kalabakan area. Based on geophysical interpretation, an additional length of  $500 \text{ m}$  of coal seam in Susui Block was inferred. While in Sg Naundung, a one-metre coal seam of *high volatile bituminous coal* grade was encountered.

### Batu arang Coal

Negeri State	Kawasan Area	Liputan Coverage ( $\text{km}^2$ )	Gred Grade	Catatan Remarks
Sarawak	Tunoh, Kapit	60	Batu arang jenis ' <i>High Volatile Bituminous Coal</i> ' <i>High Volatile Bituminous coal type</i>	22 singkapan batu arang berketedebal antara $0.2 \text{ m}$ sehingga $1.3 \text{ m}$ . 22 coal outcrops with thicknesses ranging from $0.2 \text{ m}$ to $1.3 \text{ m}$ .
Sabah	Blok Susui Pinangah, Sabah	5	Batu arang jenis ' <i>High Volatile Bituminous Coal</i> ' <i>High Volatile Bituminous coal type</i> .	Unjuruan lipit batu arang sejauh $500 \text{ m}$ dijangka wujud di kawasan kajian berdasarkan tafsiran survei geofizik. An additional seam extension of $500 \text{ m}$ is expected in the area based on geophysical survey.
	Sg. Naundung/ Sempadan Sabah-Kalimantan	25	Batu arang jenis ' <i>High Volatile Bituminous Coal</i> ' <i>High Volatile Bituminous coal type</i> .	Satu lipit batu arang setebal satu meter dijumpai di kawasan ini. A one-metre thick bright coal seam encountered in the area.

**AKTIVITI SUMBER MINERAL, 2012  
MINERAL RESOURCES ACTIVITIES, 2012**

## Ekonomi Mineral / Mineral Economics

Pada tahun 2012, Jabatan Mineral dan Geosains Malaysia (JMG) telah menyediakan maklumat dan analisis komoditi mineral yang meliputi pengumpulan, penyusunan dan penyebaran maklumat mengenai eksplorasi, perlombongan, pengkuarian, pengeluaran mineral, dagangan, pelaburan dan status perkembangan industri-industri berasaskan mineral. Seperti tahun-tahun sebelumnya, JMG menerbitkan lima laporan iaitu Malaysian Minerals Yearbook, Industrial Mineral Production Statistics and Directory of Producers in Malaysia, Malaysian Mining Industry, Malaysian Mineral Trade Statistics dan Review of Mineral-Based Industries in Malaysia. Selain dari menjalankan tugas rutin ini, JMG juga menjalankan kajian komoditi mineral untuk bijih besi iaitu di bawah Rolling Plan Pertama (2011/2012) RMKe-10.

Bagi tahun 2012, JMG meneruskan sumbangannya dalam penyediaan input mengenai status mineral kepada agensi-agensi kerajaan untuk digunakan mengikut keperluan masing-masing. Antara tujuannya adalah untuk kiraan sumbangan sektor perlombongan kepada ekonomi negara oleh Bank Negara dan imbalan tenaga negara oleh Pusat Tenaga Negara. JMG juga telah mengedarkan sejumlah 720 naskah laporan berkala Statistik Bulanan Industri Perlombongan Malaysia kepada semua pejabat JMG negeri dan agensi-agensi lain yang berkaitan.

In the year 2012, the Minerals and Geoscience Department (JMG) provided information and analysis of mineral commodities involving the collection, collation and distribution of information related to exploration, mining, quarrying, mineral production, commercial investment and the development status of mineral-based industries. As in previous years, JMG continued with the publication of the Malaysian Minerals Yearbook, Industrial Mineral Production Statistics and Directory of Producers in Malaysia, Malaysian Mining Industry, Malaysian Mineral Trade Statistics and Review of Mineral-based Industries in Malaysia. Apart from these routine activities, JMG also conducted a mineral commodity study for iron ores under the First Rolling Plan (2011/2012) of the 10th Malaysian Development Project.

For the year 2012, JMG continued to provide periodical inputs on the status of minerals to the Ministry of Natural Resources and Environment (NRE) and other government agencies such as the Malaysian Tin Board, Treasury Department, Central Bank of Malaysia, Finance Ministry, Department of Statistics, Pusat Tenaga Malaysia, MIDA and MITI. The inputs were used among others to calculate the calculation of the mineral sector to the country's economy as well as in the formulation of the national energy balance. JMG have distributed 720 copies of the Monthly Statistics Report on the Mining Industry in Malaysia to state JMG offices and other relevant agencies.

JMG juga merupakan pusat rujukan bagi harga komoditi mineral. Tahun 2012 telah memberi cabaran kepada JMG dalam kompilasi harga komoditi mineral di mana harga komoditi mineral sentiasa berubah terutamanya harga emas. Selain menerima pertanyaan dari pihak luar, JMG juga menyediakan laporan mingguan harga komoditi mineral yang untuk pembentangan dalam Mesyuarat Pasca-Kabinet bersama Kementerian Sumber Asli dan Alam Sekitar.

Peranan JMG dalam menyalurkan input berkaitan industri mineral meliputi peringkat antarabangsa di mana input-input telah disediakan bagi membantu kerajaan dalam pelbagai mesyuarat, perjanjian dan misi pelaburan seperti dalam forum Perjanjian Dagangan Bebas, Pertubuhan Dagangan Dunia, dagangan dua hala dan hubungan antarabangsa. Dalam hubungan ini sejumlah 7 ikhtisar negara telah disediakan dalam tahun 2012. Di peringkat ASEAN, dua orang pegawai kanan telah menghadiri mesyuarat Kumpulan Kerja Teknikal ASOMM Ke-9 pada 25-28 September 2012 dan juga mesyuarat ASOMM Ke-12 (ASEAN Senior Officials Meeting in Minerals) pada 5-6 Disember 2012 dan kedua-dua mesyuarat ini telah diadakan di Brunei Darussalam. Malaysia telah membentangkan dua kertas kerja teknikal dalam mesyuarat tersebut.

Dalam hubungan kerjasama dua hala Malaysia-Indonesia, JMG bertindak sebagai urusetia dalam pengajuran mesyuarat dan kelancaran pelaksanaan program-program teknikal yang telah dipersetujui. Beberapa pegawai JMG telah menghadiri mesyuarat Kerjasama Saintifik dan Teknikal dalam bidang Geologi dan Sumber Mineral antara Malaysia dan Indonesia yang telah diadakan di Kota Kinabalu, Sabah pada 3-6 Julai 2012. JMG juga telah terlibat dalam pelaksanaan aktiviti-aktiviti seperti kerja lapangan korelasi geologi yang telah diadakan dalam tahun yang sama.

JMG continued to play its role as the reference centre for prices of mineral commodities. 2012 has been a challenging year for JMG in the compilation of information on mineral commodity prices due to constant market fluctuations especially in the price of gold. Other than public enquiries, JMG also prepared weekly data on mineral commodity prices which were traded in the Kuala Lumpur Tin Market (KLTM) and London Metal Exchange (LME) for the presentation by the Director General in post-cabinet meetings with the Ministry of Natural Resources and Environment.

JMG played its contributory role in the global arena where mineral industry inputs prepared by the Department were used by the Malaysian government in various meetings, agreements and trade investment missions and in forums such as the Free Trade Agreement (FTA), World Trade Organisation (WTO), bilateral trade and international cooperation. In this context, a total of seven country briefs were prepared in 2012. At the ASEAN level, two senior JMG officers attended the 9th ASOMM (ASEAN Senior Officials Meeting in Minerals) Working Group Meeting and the 12th ASOMM Senior Official Meeting which was held from 25-28th September 2012 and from 5-6th December 2012 respectively in Brunei Darussalam. Malaysia presented two technical papers in the meetings.

In the Malaysia-Indonesia bilateral scientific cooperation programme, JMG acted as the secretariat to oversee the organisation of steering committee meetings and the smooth implementation of technical programmes that have been agreed upon by both countries. A number of JMG officers attended the Malaysia-Indonesia meeting on Scientific and Technical Cooperation in the field of Geology and Mineral Resources held in Kota Kinabalu, Sabah on 3-6th July 2012. JMG was also involved in the implementation of field work on the geological correlation which was also held in the same calendar year.

JMG secara berterusan membantu dan memberi kerjasama kepada Kementerian Sumber Asli dan Alam Sekitar (NRE) dalam urusan berkaitan pembangunan mineral. Dalam Mesyuarat Majlis Tanah Negara 2012, JMG telah menyediakan satu kertas kerja. JMG telah menghadiri 67 mesyuarat Jawatankuasa Permit Eksport Mineral (JAPEM). Jawatankuasa ini diketuai oleh NRE bertanggungjawab mengeluarkan permit eksport mineral. Pegawai JMG juga adalah ahli Pasukan Petugas Pasir Kebangsaan (National Sand Task Force) yang diterajui NRE bagi menangani isu pergerakan pasir di dalam dan ke luar negara. JMG juga terlibat dalam Jawatankuasa Teknikal Bagi Menjadikan Industri Mineral sebagai salah satu sektor National Key Economic Area (NKEA).

Dalam menjalinkan hubungan jabatan dengan pihak industri, pegawai-pegawai JMG berterusan melakukan lawatan-lawatan kerja ke lombong-lombong dan juga industri-industri berasaskan mineral. Lawatan ini juga adalah salah satu cara JMG memperolehi maklumat dan maklumbalas berkaitan dengan pembangunan, penggunaan bahan mineral dan produk-produk hiliran berasaskan mineral yang dihasilkan terutamanya industri-industri baru. Dalam tahun 2012, lawatan telah dilakukan ke enam industri berasaskan mineral, 27 lombong dan dua kuari. Dalam tempoh yang sama JMG juga telah menerima sejumlah 127 pertanyaan berkenaan mineral dari dalam dan luar negara.

JMG continued to assist and cooperate with the Ministry of Natural Resources and Environment (NRE) in matters pertaining to the development of minerals. In the 2012 National Land Council meeting, JMG have presented one technical paper. JMG have also attended 67 Minerals Export Permit Committee meetings during the year. The committee headed by NRE is responsible in issuing mineral export permits. JMG is also a member of the National Sand Task Force responsible in handling issues related to sand movement within and out of the country. JMG was also involved in the Technical Committe to include mineral industry as one of National Key Economic Area (NKEA).

To establish close rapport with industry, JMG officers continually made working visits to various mines and mineral-based industries in the country to collect information related to the development and utilization of minerals, as well as the production of value-added downstream mineral products. For the year 2012, JMG officers visited six mineral-based industries, 27 mines and two quarries. For the same period, JMG received and processed a total of 127 enquiries on minerals from within the country and also from abroad.

Lawatan ke lombong bijih besi Syarikat Limemax, Kota Tinggi, Johor.  
Visit to iron ore mine Limemax Company, Kota Tinggi, Johor.

Lawatan ke Kuari Hap Seng, Tawau, Sabah.  
Visit to Hap Seng Quarry, Tawau, Sabah.

## Khidmat Nasihat Mineral Mineral Advisory Services

Berbagai khidmat nasihat telah diberikan kepada Pihak Berkuasa Negeri dan pihak swasta berkenaan dengan guna tanah dan pembebasan mineral. Pertanyaan daripada pelanggan berkaitan maklumat mineral juga telah dilayani sama ada secara lisan atau ulasan bertulis.

Various advisory services were given to State Local Authorities as well as the private sector pertaining to land use and mineral clearance. Enquiries on mineral information from interested parties or individuals were also attended to either verbally or as written.

Tasik Biru yang indah di Bau, Kuching, Sarawak telah terbentuk daripada pit lombong emas dedah. Pit lombong ini yang ber kedalaman 120 m ialah pengeluar emas terbesar dalam sejarah di kawasan perlombongan emas Bau. The picturesque Tasik Biru or literally means 'blue lake' in Bau, Kuching, Sarawak was formed from a open cast gold mining pit. The mining pit, with a depth of 120 m was the biggest historical producer of gold in the Bau gold mining area.

# Aktiviti Lombong dan Kuari Mine and Quarry Activities

## Pembangunan Lombong dan Kuari Mine and Quarry Development

Jabatan juga memberi perkhidmatan teknikal dan kepakaran dalam bidang perlombongan, pengkuarian dan pemprosesan mineral. Perkhidmatan pakar seperti penyediaan garis panduan dan peraturan mengenai keselamatan, pemulihan tanah lombong dan pengendalian bahan letupan dan bahan toksik dilaksanakan oleh Cawangan Perkhidmatan Lombong dan Kuari di Bahagian Perkhidmatan Teknikal. Ini termasuk mengendalikan latihan kepada pegawai dan kakitangan dalaman serta juga agensi-agensi kerajaan lain. Selain itu cawangan itu juga bertanggungjawab sebagai Urusetia bagi pengendalian peperiksaan pembedil jabatan. Ini melibatkan penyediaan dan menyemak soalan peperiksaan serta menjalankan ujian amali di lapangan dengan kerjasama pejabat JMG negeri.

The department also provides technical and expert services in the fields of mining, quarrying and mineral processing. Expert services such as the formulation of guidelines and regulations pertaining to safety, rehabilitation of mining land and handling of explosive and toxic materials are carried out by the Mine and Quarry Services Section of the Technical Services Division. This includes organising training for staff in the department as well as for other government agencies. The section also acted as the secretariat for the department shotfirer examination. This involves the preparation and reviewing of examination papers and conducting practical tests at sites in collaboration with the JMG State Offices.

### Perundangan dan garis panduan

Dalam tahun 2012, JMG telah terlibat dalam penyediaan menggubal peraturan baru, menyediakan draf garis panduan dan menyemak draf peraturan seperti berikut:

- menggubal satu peraturan baru, Peraturan Peraturan Pembangunan Mineral (Pemprosesan Mineral)
- menyediakan dua draf garis panduan Pemantauan Habuk Terampai menggunakan alat ‘High Volume Sampler (HVS)’ dan Persampelan Habuk Termendap menggunakan alat ‘Dustfall Deposition Gauge (DDG)’
- menyemak dua draf peraturan iaitu Peraturan-Peraturan Pembangunan Mineral (Efluen) dan Peraturan-peraturan Pembangunan Mineral (Peletupan)

### Legislation and guidelines

In the year 2012, JMG was involved in the drafting of amendments to laws and guidelines with regards to mining and quarrying as follows:

- drafting a new regulation, Mineral Development Regulations (Mineral Processing)
- drafting two guidelines on Suspended Dust Monitoring using ‘High Volume Sampler (HVS)’ and Sampling of Deposited Dust using ‘Dustfall Deposition Gauge (DDG)’
- reviewing two draft regulations namely Mineral Development Regulations (Effluent) and Mineral Development Regulation (Blasting)

## Urusetia peperiksaan pembedil jabatan

Tujuan peperiksaan pembedil jabatan adalah untuk menilai tahap kompetensi bakal pembedil di dalam industri perlombongan dan pengkuarian negara. Peperiksaan ini menguji aspek teori dan amali. Hanya mereka yang lulus kedua-dua peperiksaan teori dan amali sahaja diiktiraf telah mencapai tahap kompetensi minima sebagai pembedil dan melayakkannya menjalankan kerja-kerja peletupan di lombong dan kuari.

Peperiksaan teori pembedil telah dijalankan sebanyak 3 siri iaitu pada bulan April, Julai dan Oktober dan melibatkan seramai 138 orang calon. Bagi peperiksaan amali pula, Bahagian Perkhidmatan Teknikal dengan kerjasama pejabat JMG negeri telah mengendalikan 5 ujian amali bagi menilai 26 orang calon.

## Secretariat for department shotfirer examination

The Department shotfirer examination was conducted to assess the competency of potential shotfirers in the mining and quarrying industry. Only those who pass both the theoretical and practical examinations are deemed to have achieved the minimal competency level to be a licensed shotfirer and qualified to do blasting works in mines and quarries.

Three series of shotfirer examinations (theory) were carried out in April, July and October and involved a total of 138 candidates. For the shotfirer practical exam, the Technical Services Division in collaboration with the state JMG offices conducted 5 practical tests to evaluate 26 candidates.

### Peperiksaan Pembedil (Teori) Explosive Examination (Theory)

Peperiksaan Pembedil (Teori) Explosive Examination (Theory)	Pusat peperiksaan Examination centre	Bilangan calon Number of candidates	Lulus Passed
Session 1/2012 (5 April 2012)	7	43	32
Session 2/2012 (12 July 2012)	3	49	25
Session 3/2012 (11 October 2012)	8	46	29

## Pengauditan kepatuhan

Dua pengauditan kepatuhan kepada penggunaan borang-borang pemeriksaan lombong dan kuari telah dijalankan di JMG Selangor dan JMG Negeri Sembilan dan Melaka. Pengauditan kepatuhan dijalankan adalah untuk menilai kesesuaian penggunaan borang-borang pemeriksaan lombong dan kuari. Borang pemeriksaan ini adalah untuk merekodkan tahap keselamatan serta pengawalan alam sekitar di lombong dan kuari.

## Compliance auditing

Two compliance audits were done on the use of mine and quarry inspection form at JMG Selangor and JMG Negeri Sembilan and Melaka. Compliance auditing was done to assess the suitability of the usage of mine and quarry inspection forms. The forms are used as a means to record the occupational safety and health level as well as the environmental control in mines and quarries.

## Latihan

JMG telah memberi latihan bagi mempertingkatkan pengetahuan dan kemahiran pegawai terutamanya dalam aspek pengawalseliaan dan penguatkuasaan lombong dan kuari. Dalam tahun 2012, empat kursus / bengkel telah dijalankan.

Kursus / Bengkel Course / Workshop	Tarikh & Tempat Date & Venue	Peserta Participants
Bengkel Perlaksanaan Peraturan Pembangunan Mineral (Skim Pengendalian Melombong, Buku Rekod dan Pelan) <b>Implementation of Mineral Development Regulation (Mining Operational Scheme, Record Books and Plan)</b>	16 -18 April 2012 Kuala Lipis, Pahang	21 orang Pegawai Galian dari pejabat JMG seluruh Malaysia. <b>21 Mine Officers from all JMG offices.</b>
Kursus Penguatkuasaan/Pemantauan Mineral dan Bahan Batuan yang dieskpot <b>Course on Enforcement/Monitoring of Mineral and Rock Material export</b>	5-7 June 2012 Johor Bahru, Johor	28 orang Penolong Pegawai Galian, Pembantu Galian dan kakitangan JMG Johor yang terlibat dengan tugas pemeriksaan di CIQ. <b>28 Assistant Mine Officers, Mine Assistants and JMG Johor staff who involved in CIQ inspection.</b>
Kursus Penutupan Lombong <b>Mine Closure Course</b>	3-6 September 2012 Lumut, Perak	23 orang Pegawai Galian dan Pegawai Penyelidik dari semua pejabat JMG. <b>23 Mine Officers and Research Officers from all JMG offices.</b>
Kursus Persampelan Efluen <b>Effluent Sampling Course</b>	9-11 October 2012 Ipoh, Perak	29 orang Pembantu Galian dan Pembantu Penyelidik. <b>29 Mine Assistants and Research Assistants.</b>

## Pemantauan kualiti udara

Dalam tahun 2012, sebanyak 62 kerja pengukuran kualiti udara telah dijalankan. Kerja-kerja pemantauan habuk telah dilaksanakan di kuari-kuari, loji pemprosesan mineral, kawasan perumahan dan pelupusan sisa industri dan tapak binaan di sekitar negeri Perak. Jumlah kutipan hasil bagi kerja itu adalah sebanyak RM15,500. Kerja pemantauan ini dijalankan atas permintaan daripada pihak industri dan juga konsultan alam sekitar sebagai memenuhi syarat kelulusan EIA.

Di samping kerja-kerja pemantauan kualiti udara, enam analisis ke atas sampel air yang mengandungi habuk telah dijalankan bagi pihak jurutera perunding. Sampel habuk ini diperolehi melalui kaedah Dustfall Deposition Gauge yang dikendalikan oleh pihak jurutera perunding itu sendiri ke atas kilang Pahang Cement di Kuantan, Pahang dan juga kuari Imerys Minerals (M) Sdn Bhd, Ipoh. Nilai kutipan hasil yang telah diperolehi bagi khidmat analisis yang telah dijalankan ialah sebanyak RM480.

## Trainings

JMG also provides training to increase knowledge and expertise of officers, especially in the monitoring and enforcement activities. In the year 2012, four courses/ workshops were conducted.

## Air quality monitoring

In the year 2012, 62 air quality measurements were carried out. These dust monitoring works were carried out in quarries, mineral processing plants, housing and industrial waste disposal areas and construction sites. The total revenue collected for these works were RM15,500. The monitoring works were conducted upon request by the industry and environmental consultants in order for them to fulfil the approval conditions of EIA.

In addition to the work of the air quality monitoring, six analyses on water samples containing the dust from engineering consultants were also conducted. The Deposition Dustfall Gauge samples were collected by the consultants from Pahang Cement plant in Kuantan, Pahang and Imerys Minerals (M) Sdn Bhd Quarry, in Ipoh, Perak. The total revenue collected for these analysis works was RM480.

### Hasil Kerja Work Output

## Kawalseliaan dan Penguatkuasaan Monitoring and Enforcement

Industri perlombongan dan pengkuarian terus menunjukkan prestasi yang memberangsangkan dalam tahun 2012. Terdapat sebanyak 178 buah lombong, 312 kuari serta 120 peniaga bijih dan loji pemprosesan mineral beroperasi pada akhir tahun 2012.

Antara fungsi jabatan adalah untuk menentukan aktiviti perlombongan mineral dan aktiviti berkaitan dijalankan secara selamat, efisien dan memenuhi standard alam sekitar dan amalan kejuruteraan terbaik. Ini termasuk membuat pemeriksaan ke atas operasi perlombongan dan pengkuarian, pengeluaran kelulusan operasi dan lesen di samping memberi perkhidmatan khidmat nasihat serta kepakaran.

### Pemeriksaan Teknikal Operasi Lombong dan Kuari

Tugas penguatkuasaan undang-undang dan kawalseliaan operasi perlombongan, pengkuarian dan pemprosesan mineral melibatkan pemeriksaan di lapangan. Ia bertujuan memastikan pematuhan syarat-syarat lesen atau kelulusan berkaitan keselamatan dan penjagaan alam sekitar. Pemeriksaan ini juga adalah sebahagian daripada proses penyediaan laporan untuk permohonan-permohonan tenemen mineral, kerja peletupan dan sebagainya seperti aduan atau kejadian kemalangan di lombong dan kuari.

The mining and quarrying industry continue to show a vibrant performance during the year 2012. There were a total of 178 mines, 312 quarries as well as 120 ore dealers and mineral processing plant operating at the end of 2012.

Among the functions of the department is to ensure that mining of minerals and related activities are carried out safely, efficiently and conforming to the environmental standards and best engineering practices. This includes inspection of mine and quarry operations, issuance of operational approvals and licences as well as providing advisory and expert services.

### Technical Inspections of Mine and Quarry Operations

Technical inspection of mining, quarrying and mineral processing operations is to ensure compliance of the conditions stipulated in the licences or approvals with regard to the safety and the protection of the environment. The field inspection or investigation is also a prerequisite for the preparation of report pertaining to the application for mineral tenements, blasting works approval, complaints and mine or quarry accidents.

Dalam tahun 2012, sejumlah 2,882 pemeriksaan teknikal telah dilaksanakan meliputi sebanyak 1,325 pemeriksaan ke atas operasi perlombongan, 1,202 pemeriksaan ke kuari, 172 pemeriksaan ke kilang amang (hasil samping perlombongan bijih timah) dan loji pemprosesan mineral, dan 183 pemeriksaan ke atas urusniaga pemegang lesen bijih mineral dan emas mentah.

Tambahan kepada pengawalseliaan ke atas kerja peletupan yang dijalankan di lombong dan kuari, pihak JMG juga dirujuk oleh Pihak Berkuasa Tempatan untuk membantu menilai serta memantau kerja-kerja peletupan yang dijalankan dalam kawasan pembangunan. Sebanyak 255 kerja peletupan projek pembangunan telah diperiksa dan dinilai sepanjang tahun. Kebanyakan pemeriksaan teknikal tapak peletupan selain kuari ini adalah di Selangor, Pulau Pinang, Sabah dan Perak.

## Pemantauan dan Kawalseliaan Aktiviti Perlombongan dan Pengkuarian

Tugas pemantauan dan pengawalseliaan yang dijalankan ke atas aktiviti perlombongan dan pengkuarian adalah untuk memastikan aktiviti perlombongan dan pengkuarian dijalankan secara teratur dan sistematik, mengikut amalan kejuruteraan terbaik dan mematuhi peruntukan perundangan. Aspek keselamatan operasi perlombongan adalah tertakluk di bawah Akta Pembangunan Mineral 1994 dan Enakmen atau Ordinan Perlombongan Negeri manakala bagi operasi pengkuarian pula adalah tertakluk kepada Peraturan Kuari Negeri.

Operasi perlombongan dan pengkuarian pada lazimnya akan memberi kesan kepada alam sekitar. Oleh itu, adalah penting operasi tersebut melaksanakan langkah secukupnya untuk menangani kemungkinan pencemaran terhadap air dan udara serta kesan gegaran bumi dan kebingitan bunyi akibat kerja peletupan. Justeru itu bagi memastikan aktiviti perlombongan dan pengkuariaan dijalankan dengan baik, kerja pemantauan berkala telah dilakukan. Sepanjang tahun 2012, sebanyak 50 persampelan efluen lombong dan 399 kerja pemantauan gegaran dan peletupan telah dijalankan.

In 2012, a total of 2,882 technical inspections were carried out which cover 1,325 inspections on mining operations, 1,202 on quarries, 172 inspections on amang (tin mining by-product) and mineral processing plant operations and 183 on mineral ores and raw gold licence holders.

In addition to the supervision of the blasting works carried out in mines and quarries, the state JMG offices were also referred to by the Local Authorities to assist in the evaluation and monitoring of blasting activities in development areas. A total of 255 development project blasting works were assessed and evaluated during the year. Most of the blasting sites inspected were in Selangor, Pulau Pinang, Sabah and Perak.

## Monitoring and Supervision of Mine and Quarry Activities

The task of monitoring and supervising mine and quarry activities is to ensure that these activities are carried out in an orderly and systematic manner in accordance to best engineering practices and in compliance with the provisions of the laws and regulations. Safety aspects of mining operations come under the purview of the Mineral Development Act 1994 and State Mining Enactments or Ordinances while quarry operations come under State Quarry Rules.

Mine and quarry operations usually will have an impact on the environment. Therefore it is important for such operations to implement adequate measures to mitigate potential water and air pollution as well as the impact of ground vibration and air blast (noise) due to blasting. Thus, to ensure that mine and quarry activities are carried out properly, periodic monitorings were conducted. A total of 50 mine effluent samplings and 399 vibration and blast monitorings were conducted during 2012.

Pihak jabatan amat mengambil perhatian terhadap aduan pihak awam berkaitan aktiviti perlombongan dan pengkuarian. Semua aduan yang diterima akan disiasat dan diberikan perhatian sewajarnya dengan segera. Sejumlah 69 aduan telah diterima dan disiasat manakala sebanyak 43 perintah dan arahan telah dikeluarkan kepada pengusaha.

## Pelesehan

Di bawah Akta Pembangunan Mineral (APM) 1994, pemegang pajakan melombong hendaklah mengemukakan dan mendapatkan kelulusan bagi suatu skim pengendalian melombong daripada Pengarah Galian sebelum sebarang operasi pembangunan dan perlombongan dilaksanakan. Dalam tahun 2012, pihak jabatan telah meluluskan sejumlah 175 Skim Pengendalian Melombong di bawah APM dan 154 Surat Kebenaran Pengkuarian di bawah Peraturan Kuari Negeri. Negeri yang telah menguatkuasakan Peraturan Kuari ialah Perak, Selangor, Pahang, Kelantan, Terengganu dan Negeri Sembilan.

Lesen Bijih Mineral dan Lesen Pembeli Emas yang dikeluarkan di bawah Enakmen Bijih Mineral dan Enakmen Pembeli Emas Mentah membenarkan pemegangnya untuk membeli, menjual, menyimpan dan memproses bijih mineral dan emas mentah masing-masingnya. Lesen ini dikeluarkan secara tahunan dan luput pada akhir tahun kalendar. Sebanyak 251 Lesen Bijih Mineral, 7 Lesen Pembeli Emas telah dikeluarkan sepanjang 2012. Selain itu pihak jabatan juga telah mengeluarkan sebanyak 171 Permit Mengangkut Bijih Padat Timah bagi tujuan mengangkut konsentrat timah dari lombong, kedai pembeli bijih atau loji pemprosesan amang ke kilang pelebur timah, Malaysia Smelting Corporation, di Pulau Pinang.

Seperti diperuntukkan dalam Peraturan Kuari, pemegang permit / lesen kuari hendaklah melantik seorang pengurus kuari berkelayakan dan pembedil kompeten untuk bertanggungjawab ke atas operasi dan kerja peletupan di kuari. Seseorang yang dilantik sebagai pengurus perlu lulus ujian Pengurus Kuari yang dijalankan oleh jabatan. Dalam tahun 2012, sebanyak 7 ujian Pengurus Kuari telah dilaksanakan.

Public complaints on mine and quarry operations are of concern to the department. All complaints received would be investigated and appropriate actions would be taken promptly. A total of 69 complaints were received and investigated while a total of 43 orders and directives were issued to the operators.

## Licensing

Under the Mineral Development Act (MDA) 1994, a mining lease holder need to submit and obtain approval from the Director of Mines for an operational mining scheme before any development and mining operation commences. For the year 2012, the department approved a total of 175 operational mining schemes under the MDA and 154 Letters of Authority to Quarry under the state Quarry Rules. The states enforcing the Quarry Rules are Perak, Selangor, Pahang, Kelantan, Terengganu and Negeri Sembilan.

The Mineral Ores and Gold Buyers Licences issued under the Mineral Ores Enactment and Gold Buyers Enactment authorise licence holders to buy, sell, store and treat mineral ores and raw gold respectively. These licences are issued annually and they expire at the end of each calendar year. A total of 251 Mineral Ores Licences, 7 Raw Gold Buyers Licences were issued during 2012. Apart from that the department also issued a total of 171 Tin Ore Concentrate Transport Permits for the purpose of transporting tin concentrates from the mines, tin ore dealers or amang processing plants to the tin smelter, Malaysia Smelting Corporation, in Pulau Pinang.

As stipulated in the Quarry Rules, a quarry permit / licence holder shall need to appoint a qualified quarry manager and competent shotfirer to be responsible for the operation and blasting work in a quarry. The person appointed as a manager needs to pass the Quarry Manager test conducted by the department. In 2012, a total of 7 Quarry Manager Tests were conducted.

Adalah menjadi objektif jabatan untuk memastikan semua kerja peletupan di lombong, kuari dan juga projek pembangunan di bawah kawal seliaan jabatan dijalankan dengan selamat. Justeru, untuk mencapai hasrat itu pihak jabatan juga menjalankan Ujian Pembedil Amali kepada calon yang telah lulus Peperiksaan Pembedil Teori. Hanya calon yang lulus kedua-dua ujian akan dikeluarkan Sijil Pembedil sebagai pembedil berkelayakan dan dibenarkan menjalankan kerja peletupan. Dalam tahun 2012, pihak jabatan telah menjalankan sebanyak 20 Ujian Amali Pembedil dan mengeluarkan sejumlah 12 Sijil Pembedil baru dan 67 pembaharuan sijil kepada pemohon yang layak. Sehingga akhir tahun 2012, terdapat sejumlah 503 pemegang Sijil Pembedil di seluruh negara.

Daripada rekod jabatan, pengeluaran mineral tempatan telah menunjukkan peningkatan sejak lima tahun yang lalu. Sebahagian mineral yang dihasilkan ini dieksport ke luar negara. Bagi tujuan mengeksport bahan mineral dan batuan, pengeksport memerlukan permit eksport yang dikeluarkan oleh Kementerian Sumber Asli dan Alam Sekitar (NRE). Setiap permohonan permit eksport hendaklah disertai surat penilaian teknikal yang disediakan oleh JMG. Sebanyak 818 dan 1115 surat penilaian teknikal untuk eksport mineral dan bahan batuan masing-masingnya telah disediakan dalam tahun ditinjau.

Kursus pembedil anjuran bersama Institut Kuari Malaysia (IQM), Persatuan Kuari Sarawak (SQA) dan JMG Malaysia di Kuching, Sarawak.

The shotfirer course jointly-organised by the Institute of Quarrying Malaysia (IQM), Sarawak Quarry Association (SQA) and JMG Malaysia in Kuching, Sarawak.

It is the objective of the department to ensure that all blasting works in mines, quarries and other development projects under the supervision of the department are carried out in a safe manner. Thus, to achieve that the department also conducted Shotfirer Practical Tests for candidates who had passed their Shotfirer Theory Examination. Only candidates who have passed both tests will be issued Shotfirer Certificates as qualified shotfirers and allowed to carry out blasting work. During the year 2012, the department conducted 20 Shotfirer Practical Tests and issued a total of 12 new Shotfirer Certificates and 67 renewed certificates to qualified applicants. As of the end of 2012, there were a total of 503 shotfirer certificate holders in the country.

The department's record indicates an increase in the local mineral production over the past five years. Some of the minerals produced were exported. For the purpose of exporting minerals and rock material, an exporter needs to have an export permit issued by the Ministry of Natural Resource and Environment (NRE). Every application has to be accompanied by a technical assessment report prepared by JMG. During the year, a total of 818 and 1115 technical assessment reports were prepared for the export of minerals and rock material respectively.

Peperiksaan amali pembedil di Pagoh Quarry, Pagoh, Johor. Shotfirer practical examination at Pagoh Quarry, Pagoh, Johor.

## Khidmat Nasihat Lombong dan Kuari Mine and Quarry Advisory Services

Disamping menjalankan pengawalseliaan dan pemantauan ke atas operasi perlombongan dan pengkuarian, JMG juga berperanan memberi khidmat nasihat dan kepakaran kepada pihak Berkuasa Negeri, agensi kerajaan serta pihak swasta berkaitan dengan pembangunan industri mineral. Khidmat yang diberikan merangkumi penyediaan laporan bagi permohonan tenemen mineral, permohonan tapak kuari dan memberi ulasan kepada laporan kajian Impak Alam Sekitar (EIA).

Sepanjang tahun 2012, sejumlah 1,388 permohonan baru dan pembaharuan untuk Lesen Carigali / Lesen Penjelajahan dan Pajakan Melombong, 51 permohonan untuk tapak kuari, 29 ulasan (EIA) dan 168 laporan teknikal lain kepada pelbagai agensi disediakan. Sejumlah 560 laporan pembebasan mineral telah disediakan bertujuan membantu pihak berkuasa membuat keputusan perancangan yang lebih baik untuk mengelakkan pemajiran enapan mineral. Di samping itu pihak jabatan juga menerima sebanyak 1,586 pertanyaan berkaitan aktiviti perlombongan dan pengkuarian.

Apart from overseeing and monitoring mine and quarry operations, JMG also provides advisory and expert services to State Authorities, government agencies and the private sector related to development of the mineral industry. Services provided include preparation of reports for mineral tenement application, application for quarry sites and providing comments and inputs for Environmental Impact Assessment (EIA) reports.

During the year 2012, a total of 1,388 new and renewal applications for Prospecting / Exploration Licences and Mining Leases, 51 quarry land applications, 29 EIA reports and 168 other technical reports for various agencies were processed. A total of 560 mineral clearance reports were prepared to assist the relevant authority make better planning decision and avoid sterilization of mineral deposits. Apart from that the department also received a total of 1,586 enquiries on mine and quarry activities.

## Aktiviti-aktiviti lain

Sesi dialog, seminar dan pameran merupakan wadah jabatan bagi meningkatkan kesedaran pihak awam terhadap industri mineral serta juga untuk menyelesaikan masalah yang dihadapi penduduk berkaitan dengan aktiviti perlombongan dan pengkuarian. Sejumlah 23 sesi perjumpaan dan penerangan sedemikian telah diadakan di negeri-negeri sepanjang tahun 2012.

JMG telah menganjurkan dialog bersama pengusaha kuari negeri Perak pada 4hb Disember 2012. Objektif utama dailog itu adalah untuk memaklumkan pihak industri mengenai dasar-dasar kerajaan negeri terkini yang berkaitan aktiviti pengkuarian. Seramai 76 peserta dari syarikat kuari dan 16 peserta dari syarikat jurutera perunding telah hadir.

## Other Activities

The department conducted dialogues, seminars and exhibitions to increase public awareness on the mineral industry as well as, to solve issues and problems faced by the public pertaining to mining and quarrying activities. A total of 23 engagements and education sessions were held in the states during 2012.

JMG conducted a dialogue with quarry operators in Perak on 4th December 2012. The main objective of the dialogue was to inform the operators on the latest state government policy pertaining to the quarry industry. A total of 76 participants from quarry companies and 16 from consultant companies attended the dialogue session.

# Penyelidikan & Pembangunan Research & Development

Penyelidikan dan Pembangunan (R&D) Jabatan Mineral dan Geosains Malaysia dilaksanakan di Pusat Penyelidikan Mineral (PPM).

## Objektif R&D adalah

- Untuk menggalak dan mempelbagaikan penggunaan sumber mineral tempatan bagi menyumbang kepada pembangunan sektor perindustrian negara melalui R&D
- Untuk menggalak pengusahahasilan sumber mineral secara mampan melalui R&D

## PPM berfungsi untuk

- Menjalankan R&D berdasarkan mineral tempatan supaya dapat menghasilkan bahan mula dan bahan tambah nilai untuk digunakan oleh industri
- Membangun teknologi pemprosesan mineral dan kitar semula yang bersesuaian
- Menjalankan penyelidikan bersama Institusi Pengajian Tinggi, agensi R&D yang lain serta pihak industri dalam bidang mineral
- Mengkomersil hasil R&D yang signifikan melalui pemindahan teknologi kepada pihak yang berminat
- Berperanan sebagai penasihat dan pusat rujukan dalam perkara-perkara yang berkaitan dengan penyelidikan mineral tempatan
- Menjalankan R&D berkaitan pengusahahasilan mineral, impak alam sekitar dan pemulihan serta menyediakan perkhidmatan sokongan kepada jabatan dalam menangani masalah yang berkaitan

Selaras dengan kehendak kerajaan bagi memajukan teknologi berdasarkan mineral, JMG menjalankan projek-projek R&D berkaitan teknologi berdasarkan lempung, silika, batuan dan bahan termaju. Untuk menggalak pengusahahasilan sumber mineral secara mampan, R&D berkaitan teknologi pemprosesan mineral, perlombongan, pengkuarian dan pemulihan lombong dan kuari dijalankan.

The research and development (R&D) activities of Minerals and Geoscience Department (JMG) are conducted in Mineral Research Centre (PPM).

## The objectives of R&D are

- To encourage and diversify use of local mineral resources so as to contribute towards the development of the country's industrial sector through R&D
- To encourage the development of mineral resources in a sustainable manner through R&D

## The functions of PPM are

- To carry out R&D on local minerals in order to produce starting and value added materials for industrial use
- To develop suitable mineral processing and recycling technologies
- To carry out collaborative research with institutes of higher learning, other R&D agencies and industries in the field of minerals
- To commercialise significant R&D results through technology transfer to interested parties
- To assume advisory role and act as a reference centre in areas related to research in local minerals
- To undertake R&D in mineral extraction, environmental impact and rehabilitation as well as providing support services to the department in overcoming related problems

In line with the government's aspiration to develop the mineral based industry, JMG carried out projects related to clay-based, silica-based, rock-based and advanced material technology. To encourage the development of mineral resources in a sustainable manner, R&D on mineral processing, mining, quarrying and rehabilitation technology were carried out.

# Teknologi Berasaskan Lempung

## Clay-based Technology

Bil. No.	Aktiviti / Projek R&D R&D Activity / Project	Hasil / Penemuan / Catatan Output / Finding / Remarks
1	R&D penghasilan bebola seramik untuk bahan sokongan pemangkin dalam industri petro-kimia menggunakan lempung tempatan dan bahan seramik lain. <b>R&amp;D on the development of ceramic balls as catalyst support materials in the petrochemical industries using local clay and other ceramic raw materials.</b>	Sebanyak 13 formulasi jasad bebola seramik telah dihasilkan. Dua formulasi jasad telah digunakan dalam kerja-kerja pra-pengkomersilan di kilang di Pahang. Sebanyak 200 kg jasad bebola seramik yang telah diproses telah diujiguna dalam penghasilan bebola seramik. Maklumbalas dari pihak kilang adalah positif. <b>A total of 13 formulations of ceramic ball bodies have been developed. Two of the formulations had been used in pre-commercialization testing at a factory in Pahang. About 200 kg ceramic ball body formulation was prepared for the testing. A positive feedback was received from the factory.</b>
2	R&D penghasilan jasad tembikar putih (tembikar tanah dan tembikar batu) menggunakan lempung tempatan – Usahasama JMG(PPM) dan Perbadanan Kemajuan Kraftangan Malaysia, Cawangan Perak. <b>R&amp;D on the development of whiteware bodies (earthenware and stoneware) using local clay and other ceramic raw materials resources – R&amp;D collaboration project between JMG(PPM) and Perbadanan Kemajuan Kraftangan Malaysia, Cawangan Perak.</b>	Lapan formulasi jasad tembikar telah dihasilkan. Empat formulasi jasad (2 tembikar tanah & 2 tembikar batu) telah diujiguna oleh pihak Kraftangan Perak dan diterima sebagai produk baru kraftangan. <b>Eight formulations of whiteware bodies have been developed. Four of the formulations have been tested by Perbadanan Kemajuan Kraftangan Malaysia, Cawangan Perak and accepted as new potential products for commercialisation.</b>

## Teknologi Berasaskan Silika Silica-based Technology

Bil. No.	Aktiviti / Projek R&D R&D Activity / Project	Hasil / Penemuan / Catatan Output / Finding / Remarks
1	R&D penyediaan dan pencirian jubin kaca seramik tersinter dari kaca kitar semula <i>R&amp;D on the preparation and characterisation of sintered glass-ceramic tiles from recycled sheet glass</i>	Jubin kaca seramik tersinter yang dihasilkan telah menunjukkan kualiti yang setanding dengan spesifikasi standard ISO 13006 untuk jubin seramik. Oleh kerana kos pembuatan dan pengeluaran yang rendah, kaca-seramik yang dihasilkan ini dapat digunakan dalam industri pembinaan terutamanya sebagai jubin lantai dan dinding. <i>The sintered glass ceramic tiles produced showed quality comparable to the specifications of ISO 13006 standard for ceramic tiles. Due to low manufacturing and production cost, the glass ceramic produced can be used in the construction industry, particularly as floor and wall tiles.</i>
2	R&D penghasilan kaca lembut daripada pasir silika tempatan <i>R&amp;D on the production of soft glass from local silica sand</i>	Kaca lembut termasuk di dalam kumpulan kaca soda-kapur-silika (SLS) yang terkenal dalam industri penghasilan kaca kraf yang menggunakan teknik 'lamp working'. Ia dihasilkan dengan meleburkan kaca pasir silika dan bahan-bahan kimia tertentu. Rod kaca yang dihasilkan ini berpotensi untuk dibuat beberapa produk dengan kawalan suhu <i>torch</i> yang bersesuaian oleh pembuat kaca yang berpengalaman. <i>Soft glass is one of the soda-lime-silicate (SLS) glass which is well-known in the craftware industry using lamp working technique. It is produced by melting local silica sand and certain chemicals. The glass rod has the potential to be made into a number of products with appropriate temperature control torch by experienced glass maker.</i>

## Sistem Pengurusan Kualiti MS ISO 9001:2008 bagi ujian batu dimensi

Makmal Seksyen Teknologi Berasaskan Batuan, Pusat Penyelidikan Mineral (PPM) telah dianugerahkan sijil MS ISO 9001:2008 untuk perkhidmatan ujian batu dimensi. MS ISO 9001:2008 adalah satu set piawaian dan keperluan dalam pembangunan sistem pengurusan kualiti untuk mempastikan kehendak dan keperluan pelanggan sentiasa dipenuhi. Pemiawaian ini juga membantu PPM membangunkan satu mekanisma untuk membuat penambahbaikan berterusan dalam memberikan perkhidmatan.

## Management Quality System of MS ISO 9001:2008 for dimension stone tests

The Rock-based Technology Section, Mineral Research Centre (PPM) was awarded MS ISO 9001:2008 certification for the testing of dimension stones. MS ISO 9001:2008 is a set of standards and requirement for the development of a quality management system to ensure the expectations of customers are met. The standardisation also enables PPM to develop mechanisms for continual improvement of services.

## Teknologi Pemprosesan Mineral Mineral Processing Technology

Aktiviti penyelidikan yang dijalankan tertumpu kepada kajian teknologi hijau dalam pemprosesan mineral dan kajian rawatan sisa sianida. Selain itu, terdapat juga aktiviti penyelidikan kontrak yang telah dijalankan atas permintaan dari pihak industri.

Untuk kajian teknologi hijau dalam pemprosesan mineral, aktivitinya tertumpu kepada mendapatkan kaedah pemprosesan alternatif untuk bijih timah primer yang lebih cekap dan mesra alam. Dua kajian yang telah disiapkan ialah yang berkaitan:

- a) pengasingan mineral sulfida dengan kaedah pengapungan sampel bijih kompleks
- b) pencirian, pembebasan mineral dan prosesan awal untuk sampel bijih kompleks yang mengandungi kasiterit bersaiz halus.

Kajian rawatan sisa sianida, masih bertumpu untuk menghasilkan sistem penyokong silika untuk pemangkin titanium. Penyokong aerogel yang dihasilkan telah menunjukkan sifat hydrophobic yang amat baik namun ianya masih mengalami retakan. Ini terjadi kerana proses pengeringan aerogel yang dibuat dengan menggunakan reagen masih belum mencapai tahap kesesuaiannya.

Antara penyelidikan kontrak yang telah dijalankan ialah proses pengasingan magnetit untuk sampel yang diperolehi dari Pulau Sumbawa, Indonesia dan kajian prosesan bijih timah untuk sampel aluvium dari Kuala Langat, Selangor bagi membantu rekabentuk loji pemprosesan.

Research activities carried out focus on the study of green technology in mineral processing and cyanide wastewater treatment. In addition, contract research activities were also carried out based on request from the industry.

For the study of green technology in mineral processing, activities were focused on developing more efficient and environmentally friendly alternative processing methods for primary tin. Two completed studies were related to:

- a) the separation of sulphide minerals from complex ore samples by froth flotation process
- b) characterisation studies, mineral liberation and preliminary processing studies for complex ore samples containing fine-sized cassiterite.

For cyanide wastewater treatment, research focused on the production of silica support systems for titanium catalyst. The aerogel silica support produced showed very good hydrophobic characteristics. However the aerogel silica support still experienced cracking. This occurred because the right parameters for the drying of aerogel using reagent have not been determined.

The contract research carried out were on the separation of magnetite samples obtained from the island of Sumbawa, Indonesia and on studies of alluvial tin sample from Kuala Langat, Selangor for designing the processing plant.

# Teknologi Perlombongan dan Pengkuarian Mining and Quarrying Technology

## Kajian potensi AMD di kawasan lombong aktif

Kajian mengenal pasti potensi saliran asid lombong (AMD) telah dijalankan di lombong emas di Pahang dan lombong timah di Perak. Sampel kajian diperolehi daripada kawasan longgokan hampas kering dan sisa loji pemprosesan. Hasil kajian mendapati sesetengah sampel berpotensi menghasilkan AMD jika tidak dirawat dan dibuang dengan kaedah yang betul. Di samping itu, kajian ini juga bertujuan menguji dan menambahbaik kaedah ujian-ujian yang dipraktikkan untuk mengenalpasti potensi AMD seperti ujian statik dan kinetik.

## Kajian rawatan arsenik dalam air sisa lombong emas menggunakan zeolit, clinoptilolite, abu terbang batu arang (coal fly ash) dan schwertmannite

Zeolit A, clinoptilolite dan abu terbang batu arang telah diuji untuk penyingkiran arsenik dari air sisa lombong emas. Keputusan menunjukkan bahawa prestasi zeolit A lebih baik dalam mengurangkan arsenik dalam air sisa lombong berbanding clinoptilolite dan abu batu arang terbang. pH adalah faktor utama bagi menentukan kecekapan penyingkiran arsenik daripada air sisa lombong. Ujian keberkesanan schwertmannite sebagai penjerap arsenik daripada air sisa lombong emas dibuat dengan menggunakan kaedah kolumn aliran menegak. Ujian dengan schwertmannite mampu mengurangkan paras arsenik kepada kepekatan  $\leq 0.10$  mg/l dan ini menunjukkan potensi schwertmannite sebagai bahan penjerap untuk merawat arsenik dalam air sisa lombong.

## Projek AMD di kawasan bekas Lombong Tembaga Mamut

Projek ini adalah projek usahasama antara JMG-MIRECO (Mine Reclamation Corporation. Korea). Jangkamasa projek ini adalah selama 2 tahun. Pada tahun ini projek ini tertumpu kepada pengumpulan data, maklumat dan kerja-kerja makmal untuk penentuan bahan peneutralan yang sesuai digunakan untuk rawatan AMD di kawasan bekas Lombong Tembaga Mamut.

## Study on potential AMD at active mine sites

The study of Acid Mine Drainage (AMD) potential was conducted in gold mines in Pahang and tin mines in Perak. Samples were collected from dry dumps and processing plant tailings. The study indicated that some samples have the potential to generate AMD if they are not treated and disposed in the correct way. In addition, the study also aims to improve on the static and kinetic test methods that have been practised to identify AMD potential.

## Treatment of arsenic in gold mine wastewater using zeolites, clinoptilolite, coal fly ash and schwertmannite

Zeolite A, clinoptilolite and coal fly ash had been tested for the removal of arsenic (As) from gold mine wastewater. The results showed that zeolite A performs better in reducing As concentration in the mine wastewater than clinoptilolite and coal fly ash. pH is the key factor in determining the efficiency of As removal from the mine wastewater. Arsenic removal from gold mine wastewater by using schwertmannite as adsorbent was tested using vertical flow column experiments. This study indicates that schwertmannite is able to reduce the concentration of arsenic to  $\leq 0.10$  mg/l and has potential as adsorbent for the treatment of arsenic in mine wastewater.

## AMD project at ex-Mamut Copper Mine area

This project is a collaborative project between the JMG-MIRECO (Mine Reclamation Corporation. Korea). The project period is 2 years. This year the project focused on the collection of data, information and laboratory work for the determination of suitable neutralisation materials for the treatment of AMD in ex-Mamut Copper Mine area.

## Pembangunan Indeks Pencemaran Partikulat Kuari (QPPI)

JMG telah menjalankan kajian keatas dua pencemar partikulat debu iaitu debu bersaiz halus ( $PM_{10}$ ) dan debu bersaiz kasar ( $PM_{30}$ ) dan kaedah kombinasi yang kolektif untuk membangunkan satu indeks baru iaitu Indek Pencemar Partikulat Kuari (QPPI). Indek baru QPPI menggunakan model kombinasi agregat. Satu perisian baru yang dikenali sebagai QPPIs V1.0 (Quarry Particulate Pollution Index Software) juga telah berjaya dihasilkan. QPPI ini sesuai untuk mengenal pasti punca debu dan menganggarkan pencemaran di sekitar kuari. Ia akan dapat membantu kawalan pencemaran debu di kuari-kuari.

## Pengurusan Maklumat Information Management

### Infrastruktur, Keselamatan dan Aplikasi ICT

Pada awal tahun 2012, JMG telah mula merancang untuk membangunkan Sistem Pengurusan Keselamatan Maklumat (*Information Security Management System* - ISMS) MS ISO/IEC 27001:2007 dengan bimbingan dari Unit Pemodenan Tadbiran dan Perancangan Pengurusan Malaysia (MAMPU) dan Kementerian Sumber Asli dan Alam Sekitar (NRE). Dalam proses pembangunan ISMS ini, satu Jawatan kuasa Pelaksana ISMS JMG telah diwujudkan pada bulan September 2012.

Skop “Sistem Pengurusan Keselamatan Maklumat (ISMS)” JMG merangkumi operasi dan pengurusan Pusat Data temasuk Sistem MINGEOSIS dan portal rasmi Jabatan Mineral dan Geosains Malaysia. Persijilan ISMS dijangka boleh diperolehi pada pertengahan tahun depan sekiranya pihak JMG dapat melepassi tiga audit yang akan dijalankan oleh badan persijilan bertauliah.

Di samping itu, JMG juga terlibat dengan projek *Government Data Centre-2* (GDC-2) yang dikendalikan oleh pihak MAMPU. JMG merupakan salah satu agensi yang terpilih daripada 48 agensi kerajaan bagi menyertai projek GDC-2 ini.

GDC-2 menawarkan dua perkhidmatan yang utama, iaitu:

- i. *Data Centre Hosting*; and
- ii. *Disaster Recovery Centre Services*

### ICT Infrastructure, Security and Application

In early 2012, JMG initiated development of the Information Security Management Systems (ISMS) MS ISO/IEC 27001:2007 under the guidance of the Administrative Modernization and Management Planning Unit of Malaysia (MAMPU) and the Ministry of Natural Resources and Environment (NRE). JMG ISMS Implementation Committee was set up in September 2012 to conduct the ISMS development process.

JMG’s scope of the “Information Security Management System (ISMS)” covers the operation and management of the Data Centre including MINGEOSIS and the official Minerals and Geoscience Department Malaysia web portal. ISMS certification is expected to be achieved in the middle of next year if JMG passes three audits conducted by the appointed certification body.

In addition, JMG is also involved in the Government Data Centre-2 (GDC-2) project which is being developed and implemented by MAMPU. JMG is among 48 government agencies selected to participate in GDC-2.

GDC-2 offers two major services namely:

- i. *Data Centre Hosting*; and
- ii. *Disaster Recovery Centre Services*

JMG terlibat dalam kedua-dua perkhidmatan ini. JMG akan mengambil bahagian dalam enam aplikasi dalam Disaster Recovery Centre. Lebih dari 15 aplikasi JMG akan dimigrasikan ke GDC-2. Projek ini dijangka siap pada akhir tahun 2013.

Kelajuan *bandwidth* talian Internet di Bahagian Perkhidmatan Teknikal (BPT), Ipoh telah dinaik taraf dari 4 Mbps kepada 20 Mbps untuk dikongsikan oleh 320 orang pengguna di Kompleks JMG Ipoh dan mempercepatkan capaian ke atas maklumat MINGEOSIS. Indeks Ketersediaan Perkhidmatan Rangkaian di Pusat Data JMG BPT telah berjaya dikekalkan pada tahap 99.3% setiap bulan.

## Pengurusan Data Berkomputer

Program Operasi *Key-in Data* (OPS KID) telah dijalankan di pejabat negeri untuk mengenalpasti masalah sistem MINGEOSIS samada dari segi pengguna, perisian, perkakasan dan infrastruktur. Selain itu, OPS KID juga merupakan persediaan terhadap pengauditan sistem MINGEOSIS yang dijalankan oleh Unit Audit Dalam NRE. Unit Audit Dalam telah membuat lawatan tapak ke Kompleks Ipoh, JMG Kedah / Perlis / P.Pinang, Pahang, Terengganu dan Sabah dalam tempoh bulan September hingga November 2012. Hasil penemuan akan dibentangkan pada tahun 2013.

Beberapa aktiviti penyelenggaraan dan pengukuhan sistem MINGEOSIS telah dijalankan seperti berikut:

- i. Penyelenggaraan HYDROdat
- ii. Peningkatan METALdat
- iii. Pengukuhan MINGEOSIS
- iv. Pelaporan Statistik MINEdat dan QUARRYdat

## Aplikasi Sistem Maklumat Geografi dan Kartografi Berdigit

Penyediaan peta geologi digital, penghasilan peta tematik, perkongsian data spatial, percetakan peta, pengumpulan data spatial dan bantuan sokongan teknikal merupakan aktiviti sepanjang tahun 2012. Di samping itu kerja-kerja kartografi dengan menggunakan perisian grafik masih diteruskan untuk menghasilkan rajah-rajah yang sesuai dengan keperluan pelanggan.

JMG is involved in both of these services. JMG will take part in six applications of the Disaster Recovery Centre. JMG will migrate more than 15 applications to the GDC-2. The project is expected to be completed by the end of 2013.

Internet connection bandwidth speeds in the Technical Services Division (BPT), Ipoh, has been upgraded from 4 Mbps to 20 Mbps for the 320 users in Ipoh JMG Complex. The upgrading also facilitated the accelerated access to MINGEOSIS information. The Network Service Availability Index of the Data Centre has been consistently at the level of 99.3% per month.

## Computerised Data Management

Operation Key-in Data (OPS KID) was carried out at several state offices to identify problems and issues related to MINGEOSIS with regards to users, software, hardware and infrastructure. OPS KID was also held to prepare for MINGEOSIS system auditing conducted by the NRE's Internal Audit Unit. The Audit Unit made site visits to several offices such as Ipoh Complex, JMG Kedah / Perlis / Penang, JMG Pahang, JMG Terengganu and JMG Sabah in the period from September to November 2012. The findings of the audit will be presented in 2013.

A number of maintenance activities and upgrading of MINGEOSIS system were also conducted as follows:

- i. HYDROdat maintenance
- ii. Upgrading of METALdat
- iii. Reinforcement of MINGEOSIS
- iv. Statistical reporting for QUARRYdat and MINEdat

## Geographical Information System and Digital Cartography

Activities for the year 2012 include the preparation of digital geological maps, thematic map production, spatial data sharing, printing of maps, spatial data collection and providing technical support. In addition cartographic works to produce diagrams and figures using graphics software were continued.

Di Ibu Pejabat, sebanyak 13 draf pertama peta geologi digital berdasarkan skala 1:63,360 telah disiapkan.

At the Headquarters, a total of 13 draft digital geological maps of scale 1:63,360 were completed.

Bil. No.	Nombor Syit Sheet Number	Tajuk Title
1	29	Geological Map of Kulim
2	44	Geological Map of Kuala Betis
3	46	Geological Map of Sungai Aring
4	56	Geological Map of Gunung Bedong
5	67	Geological Map of Kuala Medang
6	75	Geological Map of Changkat Jong
7	97	Geological Map of Tasik Bera
8	98	Geological Map of Sungai Jeram
9	109	Geological Map of Padang Endau
10	117	Geological Map of Sungai Selai
11	133	Geological Map of Kukup
12	150	Geological Map of Pulau Langkawi
13	153	Geological Map of Alor Setar

Selain itu, kerja-kerja pengumpulan dan kompilasi data digital mineral dan geosains yang dibekalkan oleh JMG negeri terus dipergiatkan. Data-data berkenaan dikompilasi dan disediakan dalam format GIS sebagai memenuhi keperluan stake holder dan pelanggan.

Bahagian Perkhidmatan Teknikal (BPT) telah melakukan suntingan bagi 10 unit peta digital termasuk enam peta geologi dan empat peta fotogeologi. Sebanyak 1,275 unit gambarajah dan peta kecil pelbagai skala telah disediakan menggunakan perisian grafik dan sejumlah 103 peta pelbagai skala telah dimbas.

Di JMG Sabah, sebanyak 14 peta tematik berbagai skala telah siap didigit dan dikemaskinikan. Manakala di JMG KPP, sejumlah tujuh kerja-kerja GIS telah dilakukan yang meliputi penghasilan peta dan pelan serta pengumpulan data geospasial. Di samping itu, sebanyak 30 peta / rajah telah disiapkan melalui kerja-kerja kartografi. Di JMG Johor, sebanyak 39 peta dan rajah telah dihasilkan melalui kerja-kerja kartografi digital. Manakala di JMG Pahang, satu peta geologi digital bagi kawasan Pasir Mas telah disiapkan.

In addition, compilation of mineral and geoscience digital data from state JMG offices were intensified. These data were compiled and prepared in GIS format in order to meet the requirement of the stakeholders and customers.

The Technical Services Division has completed editing of 10 digital maps that included six geological maps and four photo-geological maps. A total of 1,275 diagrams and small maps of various scales were prepared using graphics software and a total of 103 maps of various scales were scanned.

For JMG Sabah, 14 thematic maps of various sizes were digitised and updated. At JMG KPP, a total of seven GIS assignments has been carried out which include production of maps and plans, and compilation of geospatial data. In addition, a total of 30 cartographic maps/diagrams were completed. In JMG Johore, a total of 39 cartographic maps and diagrams were prepared. At JMG Pahang, a digital geological map of the Pasir Mas area was completed.

Bagi JMG Selangor, kerja-kerja tertumpu kepada penyediaan peta kesesuaian pembinaan dan geologi bagi ulasan EIA untuk projek pembangunan. Untuk memenuhi permintaan berkenaan, sejumlah 206 peta telah disediakan. Di samping itu data-data digital juga disediakan kepada pelajar IPT untuk tujuan penyelidikan.

Bagi Negeri Kelantan, kerja-kerja pendigitan peta bagi tahun 2012 lebih banyak tertumpu kepada penyediaan peta pembebasan mineral di samping peta taburan sumber mineral Negeri Kelantan. Sejumlah 18 unit peta telah dihasilkan.

## Penyuntingan dan Perpustakaan

Untuk mencapai salah satu fungsi JMG yang penting iaitu mengumpul, menganalisis dan menyebarkan data dan maklumat berkaitan mineral dan geosains, JMG telah menerbitkan hasil penemuan dan kajiannya dalam berbagai laporan teknikal dan peta, dan penerbitan-penerbitan ini disebarluaskan melalui perpustakaan-perpustakaan JMG di seluruh Malaysia.

Pada tahun 2012, satu laporan peta telah diterbitkan iaitu “Geologi dan Sumber Mineral Kawasan Kuala Tembeling, Pahang Darul Makmur” (Laporan Peta No.23). Sebanyak tiga garis panduan juga telah diterbitkan iaitu Garis Panduan Pensampelan Bahan Batuan dan Mineral, Garis Panduan Eksplorasi Biji Timah Primer dan Garis Panduan Eksplorasi Arang Batu. Disamping itu, satu Prosedur Operasi Standard – Siasatan Bencana Tanah Runtuh juga telah diterbitkan.

JMG telah menerima kedatangan seramai 3,725 orang pelawat yang membuat rujukan, penyelidikan serta membeli laporan dan peta di perpustakaan. Penjualan peta, laporan dan lain-lain bahan terbitan jabatan telah menghasilkan kutipan hasil sebanyak RM146,532.

JMG Selangor focused on the preparation of construction and geological suitability maps for Environment Impact Assessment (EIA) review of development projects. To meet the demand, a total of 206 maps were prepared. In addition digital data were also prepared for the university students conducting research.

For JMG Kelantan, the main focus was digitization of mineral clearance maps and mineral resources map of Kelantan with the production of 18 maps.

## Editing and Library

One of the important functions of JMG is to collect, analyse and disseminate data and information pertaining to minerals and geoscience. In fulfilling this important role, JMG publishes its findings and research results in various technical reports and maps, and also disseminates these publications through its libraries in various states in the country.

In 2012, a map report titled “Geologi dan Sumber Mineral Kawasan Kuala Tembeling, Pahang Darul Makmur” (Map Report No. 23) was published. Three guidelines namely: Guideline on Rock and Mineral Material Sampling (JMG.GP.02), Guideline on Primary Tin Ore Exploration (JMG.GP.07) and Guideline on Coal Exploration were also published. One Standard Operation Procedure – Landslide Investigation was also published.

JMG has recorded a slight increase in the total number of visitors coming to JMG Libraries compared with the previous year. A total of 3,725 visitors called at the libraries for reference, research and the purchase of reports and maps. The sales of maps, reports and other departmental publications have also shown a slight decrease compared to the previous year. The overall total revenue collected from sales for the year was RM146,532.00.

## Perkhidmatan Geofizik Geophysical Services

### Semenanjung Malaysia

Perkhidmatan geofizik yang telah diberikan adalah meliputi survei-survei keberintangan 2-D, transient elektromagnet, seismos dan pengelogan geofizik.

Survei keberintangan 2-D telah dilaksanakan di 13 lokasi meliputi sejumlah 17,700 meter-garis untuk kajian air bawah tanah dan siasatan tapak. Survei transient elektromagnet telah dilaksanakan di satu lokasi dengan jumlah pencerapan sebanyak 71 stesen. Survei ini dijalankan untuk kajian air bawah tanah. Survei seismos telah dijalankan di satu lokasi meliputi sejumlah 780 meter-garis untuk kajian tapak. Siasatan dengan menggunakan kaedah pengelogan geofizik telah dijalankan di enam telaga di empat lokasi.

### Peninsular Malaysia

Geophysical services provided include 2-D resistivity, transient electromagnetic, seismic and geophysical logging surveys.

2-D resistivity surveys were carried out for groundwater study and site investigation at 13 locations covering 17,700 line-metres. Transient electromagnetic survey was carried out at one location for groundwater study with a total of 71 observation stations. The survey was conducted for groundwater study. A seismic survey for site investigation was conducted at one location covering 780 line-metres. Investigation using geophysical logging method was conducted at six wells in four locations.

*Preparation of resistivity survey line in Kuala Baram, Miri, Sarawak.*

## Sabah

Siasatan Geofizik telah dijalankan melibatkan kaedah *Resistivity 2D Imaging* di kawasan Pinangah dan Kuala Penyu. Siasatan geofizik termasuk pemprosesan data untuk ekplorasi batu arang telah dijalankan di kawasan Pinangah. Siasatan yang terdiri daripada 5 garisan siasatan dengan jumlah keseluruhan panjang 1000 m ini bertujuan untuk mengesan unjuran lapisan batu arang. Hasil dari siasatan ini, beberapa tapak penggerudian telah dicadangkan.

Menjalankan kerja lapangan geofizik termasuk pemprosesan data untuk projek Kebakaran Gambut, Aktiviti Hidrogeologi di kawasan sekitar Kuala Penyu. 3 garisan siasatan telah dilakukan di mana jumlah keseluruhan sepanjang 1300 m. Hasil yang diperolehi berjaya mengesan anomali air bawah tanah dengan nilai resistiviti yang berbeza mengikut geologi sesuatu kawasan dan beberapa tapak penggerudian telah dicadangkan.

## Sabah

Geophysical survey consisting of 2D resistivity imaging was carried out at the Pinangah and Kuala Penyu areas. Geophysical field survey including data processing for coal exploration was carried out at the Pinangah area. The survey consisted of 5 lines with a total length of 1000 m to trace the extension of coal seams. As a result of this survey, a few drilling sites have been proposed.

A geophysical field survey including data processing was carried out around Kuala Penyu area. The survey consisted of 3 lines with a total length of 1300 m. The geophysical results assisted in the detection of anomalies in the groundwater resource with varying resistivity values related to the geology of the area. A few drilling sites have been proposed.

# Mineralogi dan Petrologi

## Mineralogy and Petrology

### Semenanjung Malaysia

Kerja rutin yang dijalankan mencapai 3,896 unit kerja dengan nilai kerja RM 119,964. Kerja-kerja tersebut dijalankan untuk jabatan, agensi-agensi kerajaan lain dan juga pelanggan swasta.

### Peninsular Malaysia

A total of 3,896 units of routine work valued at RM 119,964.00 were completed for the department, other government agencies and private sectors.

#### Senarai khidmat analisis yang dijalankan oleh Unit Mineralogi dan Petrologi, Bahagian Perkhidmatan Teknikal Details of analytical services carried out by the Mineralogy and Petrology Unit, Technical Services Division

	Untuk industri mineral For the mineral industry		Untuk agensi kerajaan For government agencies

Jumlah kecil / <i>Sub-total</i>	873	55,034.00	3023	64,930.00
Jumlah unit kerja <i>Total number of work units</i>	3,896	Jumlah nilai kerja <i>Total value of work</i>		119,964.00

## Sarawak

Pada tahun 2012, JMG Sarawak telah melaksanakan 624 unit kerja rutin dengan nilai sebanyak RM15,760. Kerja-kerja yang dilakukan merangkumi penyediaan slaid keratan nipis batuan, pengenalan batuan dan penyediaan laporan petrografi. Kebanyakan kerja tersebut adalah atas permintaan sektor swasta.

## Sabah

Sepanjang tahun 2012, Aktiviti Mineralogi dan Petrologi, di bawah Unit Geosains JMG Sabah, telah melaksanakan tugas dan kerja-kerja termasuklah menyedia, menganalisa dan membuat keratan nipis batuan, pengenalan contoh batuan / mineral dan menyediakan fotomikrograf. Sebanyak 1,348 kerja berkaitan mineralogi dan petrologi dengan nilai kerja sebanyak RM23,345 telah dilaksanakan.

Antara kerja-kerja permintaan luaran yang dilaksanakan ialah analisis batuan / mineral dari segi jenis, dan analisa geokimia / XRD / XRF untuk sampel batuan / mineral.

## Sarawak

Routine work totalling 624 units with a work value of RM15,760 was carried out by JMG Sarawak in 2012. The works carried out includes the preparation of rock thin-sections, petrographical examinations and the preparation of petrographic reports. Most of the work was carried out upon the request by the private sectors.

## Sabah

Throughout the year 2012, the Mineralogy and Petrology Activity under the Geoscience Unit JMG Sabah, has performed various work which include preparation and petrographical analysis of rock thin sections, rock sample identification, as well as preparation of photomicrograph. A total of 1,348 mineralogy and petrology related studies, including geochemical analysis, XRF and XRD, with a work value of RM23,345.00 were completed.

Among the various external requests carried out include rock / mineral type identification, and geochemical, XRF and XRD analyses for rock / minerals.

### Kerja yang dijalankan oleh Unit Mineralogi dan Petrologi, JMG Sarawak dan Sabah Work carried out by the Mineralogy and Petrology Activity, JMG Sarawak and Sabah

Tugas / Task	Jumlah unit / Number of units	
	Sarawak	Sabah
Penyediaan keratan nipis / Rock thin-section preparation		
a. Dari permintaan dalaman (JMG) / Internal request	18	45

# Makmal Kimiabumi Geochemical Laboratory

## Perkhidmatan analisis geokimia

Makmal-makmal Kimiabumi di Ipoh, Kuantan, Kuching dan Kota Kinabalu menyediakan perkhidmatan analisis kimia/ujian fizikal berkualiti serta khidmat nasihat kepada pelanggan dalam Jabatan, agensi-agensi kerajaan lain dan pelanggan swasta untuk membantu pembangunan sektor mineral, industri berdasarkan mineral, aktiviti kitar semula logam dan eksplorasi/pembangunan sumber air bawah tanah di Malaysia. Dalam tahun 2012 sejumlah 56,930 analisis telah disiapkan dengan nilai kerja keseluruhan RM1,617,312.00 di mana 4,268 daripada analisis tersebut telah diselesaikan untuk pelanggan swasta dengan kutipan hasil bernilai RM174,544.00.

## Sistem pengurusan makmal MS ISO/IEC 17025:2005 dan akreditasi makmal

Dalam tahun 2012, keempat-empat Makmal Kimiabumi di Ipoh, Kuantan, Kuching dan Kota Kinabalu berjaya melaksana dan mengekalkan sijil akreditasi MS ISO/IEC 17025:2005 setelah audit dilaksanakan oleh Jabatan Standard Malaysia di makmal masing-masing. Di samping itu, Jabatan Standards Malaysia juga telah meluluskan permohonan Makmal Kimiabumi Ipoh untuk menambahkan lagi 14 ujian ke dalam skop akreditasi seperti berikut:-

- *Determination of SiO<sub>2</sub>, Fe<sub>2</sub>O<sub>3</sub>, TiO<sub>2</sub>, CaO and MgO in Silica Sand by XRF - 5 ujian;*
- *Determination of CaO MgO, SiO<sub>2</sub>, Fe<sub>2</sub>O<sub>3</sub>, TiO<sub>2</sub>, Al<sub>2</sub>O<sub>3</sub>, K<sub>2</sub>O, P<sub>2</sub>O<sub>5</sub> and MnO in Limestone by XRF- 9 ujian*

## Geochemical analytical services

The respective Geochemical Laboratories in Ipoh, Kuantan, Kuching and Kota Kinabalu provide testing and consultancy services to officers of the Department, other government agencies and the private sector, to assist development of the mineral and mineral-based industries, metal recycling activities and ground water exploration/development in Malaysia. For the year 2012, a total of 56,930 analyses were completed with a total work value of RM1,617,312.00 of which 4,268 analyses were completed for the private sector with a revenue collection of RM174,544.00.

## MS ISO/IEC 17025:2005 Laboratory Management System and Accreditation

For the year 2012, all the four Geochemical Laboratories in Ipoh, Kuantan, Kuching and Kota Kinabalu successfully implemented and retained their MS ISO/IEC 17025 accreditation certificate after assessment audits were conducted by the Department of Standards, Malaysia in the respective laboratories. In addition, the Department of Standards has approved the Ipoh Geochemical Laboratory's application to increase the scope of accreditation by 14 tests as follows:-

- *Determination of SiO<sub>2</sub>, Fe<sub>2</sub>O<sub>3</sub>, TiO<sub>2</sub>, CaO and MgO in Silica Sand by XRF - 5 tests;*
- *Determination of CaO MgO, SiO<sub>2</sub>, Fe<sub>2</sub>O<sub>3</sub>, TiO<sub>2</sub>, Al<sub>2</sub>O<sub>3</sub>, K<sub>2</sub>O, P<sub>2</sub>O<sub>5</sub> and MnO in Limestone by XRF- 9 tests*

**Persijilan Akreditasi MS ISO/IEC 17025:2005**

Nota:- SAMM :- Skim Akreditasi Makmal Malaysia (*Malaysian Laboratory Accreditation Scheme*)

Di samping itu, audit dalaman antara makmal serta mesyuarat kajian semula pengurusan berjadual terus diadakan mengikut jadual yang ditetapkan untuk memantau dan memastikan sistem pengurusan MS ISO / IEC 17025 dilaksanakan dengan berkesan.

Bagi memenuhi keperluan mandatori standard pengurusan MS ISO / IEC 17025:2005 dan usaha berterusan untuk meningkatkan lagi kualiti perkhidmatan analisis kepada pelanggan Jabatan, ketiga-tiga makmal di Ipoh, Kuching dan Kota Kinabalu telah berjaya mengelolakan dan / ataupun mengambil bahagian dalam program-program ujian kecekapan/ perbandingan antara makmal. Ketiga-tiga Makmal

Jabatan telah menunjukkan prestasi baik dan kecekapan teknikal dalam semua program ujian kecekapan / perbandingan antara makmal yang disertai.

In addition, interlaboratory internal audits and management review meetings were conducted regularly as scheduled to monitor and ensure the effective implementation of the MS ISO / IEC 17025 management system.

As part of mandatory requirements for compliance with the MS ISO / IEC 17025:2005 management standard and continuous effort to further improve the quality of testing services provided to the Department's customers, the 3 laboratories in Ipoh, Kuching and Kota Kinabalu successfully organised and / or participated in several Proficiency Testing (PT) / Interlaboratory Cross-check programmes.

The Department's laboratories have demonstrated good performance and competency in all the Proficiency Testing / Interlaboratory Cross-check programmes participated.

**Penyertaan dalam program PT / Perbandingan di antara Makmal**  
**Participation in PT and Interlaboratory Cross-check Programmes**

No. No.	Nama Program Ujian Kecekapan / Perbandingan di antara Makmal Name of Proficiency Testing (PT) / Interlaboratory X-check programme	Penganjur / Pengelola Program Programme Provider / Organiser
<b>Makmal Ipoh / Ipoh Laboratory</b>		
1	<b>8 PT programme on Water testing:-</b> ENVITEST 2 (Round 2) – Trace metals Al, Cd, Cr & Cu ENVITEST 2 (Round 1) – Trace metals Fe, Mn, Pb, Ni & Zn ENVITEST 4 - Total Solids, Suspended Solids & Total Dissolved solids ENVIEST 5 – Turbidity & Alkalinity ENVITEST 6 - Hg & As WAPAS 1 – Anions-Cl, SO <sub>4</sub> , NO <sub>3</sub> & F WAPAS 5 - Na & K WAPAS 6 – Hardness, Ca & Mg	Jabatan Kimia Malaysia (Chemistry Department Malaysia)
2	Interlaboratory Cross-check on silica sand JMG/2012/SND – SiO <sub>2</sub> , Fe <sub>2</sub> O <sub>3</sub> , TiO <sub>2</sub> , Al <sub>2</sub> O <sub>3</sub> , CaO, MgO, Cr <sub>2</sub> O <sub>3</sub> , K <sub>2</sub> O, NaO and LOI.	Makmal Ipoh

## Penyertaan dalam Pembangunan Standard Malaysia

Pegawai-pegawai Kimiabumi Makmal Kimiabumi, Ipoh terus mewakili Jabatan dalam beberapa Jawatankuasa Teknikal / Kumpulan Kerja SIRIM dan telah menyumbang secara aktif dalam pembangunan piawai-piawai Malaysia baru serta juga kajian semula piawai-piawai lama yang melebihi 5 tahun.

## Participation in the development of Malaysian Standards

Geochemists of the Ipoh Geochemical Laboratory continued to represent the Department in several SIRIM Technical Committees / Working Groups and have contributed actively to the development of new Malaysian Standards as well as revision of Malaysian Standards which were more than five years old.

Bil. No.	Jawatankuasa / Kumpulan Kerja Teknikal Technical Committee/Working Group
1	Industrial Standard Committee B for Chemicals and Materials (ISC B)
2	Working Group for Lime and Lime Products

## Latihan Teknikal

Dalam usaha membangunkan modal insan Jabatan dan selaras dengan polisi Kerajaan untuk pembelajaran berterusan, Makmal Kimiabumi Ipoh telah berjaya mengelola dan melaksanakan tiga kursus teknikal dalam untuk staf makmal.

Bil. / No.	Kursus latihan teknikal dalam / In-house technical training course	Tarikh dan tempat / Date and venue
1.	Kursus "Traceability" dan Kawalan Kualiti Data-data Ujian <i>Course on Traceability and Quality Control of Test Data</i>	03-04 April 2012, Sri Petaling, K. Lumpur
2.	Bengkel "Flame Atomic Absorption Spetrometry"-Teori dan Aplikasi <i>Workshop on "Flame Atmic Absorption Spectrometry- Theory and Applications"</i>	29-30 Mei 2012 Petaling Jaya
3	Bengkel "Proficiency Testing" dalam Sistem Pengurusan Makmal MS ISO/IEC 17025:2005 <i>Workshop on "Proficiency Testing" in the MS ISO/IEC 17025:2005 Laboratory Management System</i>	16-18 Julai 2012, Pulau Pinang

Sepanjang tahun, staf teknikal makmal juga telah menghadiri pelbagai kursus latihan dan bengkel teknikal tempatan yang dianjurkan oleh Institut Kimia Malaysia, Jabatan Standard Malaysia dan SIRIM Training Services untuk meningkatkan pengetahuan dan kompetensi mereka dalam menjalankan analisis makmal serta juga pelaksanaan sistem pengurusan makmal MS ISO/IEC 17025:2005.

Di samping itu, ketiga-tiga Makmal di Ipoh, Kuching dan Kota Kinabalu juga telah memberikan latihan praktikal selama 8-10 minggu kepada lapan orang pelajar dari lima universiti tempatan (UMT, UPM, UNIMAS, USM dan UiTM).

## Technical Training

As part of human resource development in the Department, and in-line with the Government's policy of continuous learning, the Ipoh laboratory successfully conducted three in-house technical training courses for laboratory staff.

Throughout the year, laboratory staff continued to attend various technical training courses / workshops organised by the Malaysian Institute of Chemistry, Department of Standards and SIRIM Training Services to improve their knowledge and competency in laboratory testing as well as implementation of the MS ISO/IEC 17025:2005 management system.

In addition, the laboratories in Ipoh, Kuching and Kota Kinabalu continued to provide 8-10 weeks attachment training programmes to eight undergraduate students from five local universities (UMT, UPM, UNIMAS, USM and UiTM).

## Latihan praktikal untuk pelajar universiti Practical training for university students

Bil. No.	Universiti University	Bilangan Pelajar No. of students	Tempoh Latihan Training duration	Tempat Latihan Training Venue
1	Universiti Malaysia Terengganu [UMT], Kuala Terengganu	3	8 minggu/weeks	Makmal Ipoh (1) dan Makmal Kuching (2)
2	Universiti Pertanian Malaysia [UPM] Serdang, Selangor	2	10 minggu/weeks	Makmal Kota Kinabalu (1) dan Makmal Kuching (1)
3	Universiti Malaysia Sarawak (UNIMAS), Kuching	1	8 minggu/weeks	Makmal Ipoh
4	Universiti Sains Malaysia Pulau Pinang [USM]	1	8 minggu/weeks	Makmal Ipoh
5	Universiti Teknologi MARA [UiTM] Arau, Perlis	1	8 minggu/weeks	Makmal Ipoh

# Makmal Geologi Kejuruteraan

## Engineering Geology Laboratory

Makmal ini menjalankan perkhidmatan ujian penentuan ciri-ciri mekanikal, fizikal dan kekuatan agregat batuan dan tanah. Ia memberi perkhidmatan sokongan geoteknik kepada aktiviti geologi kejuruteraan, perlombongan, pengkuarian dan aktiviti-aktiviti lain jabatan. Makmal ini juga menawarkan perkhidmatan geoteknik kepada agensi-agensi kerajaan dan pihak industri.

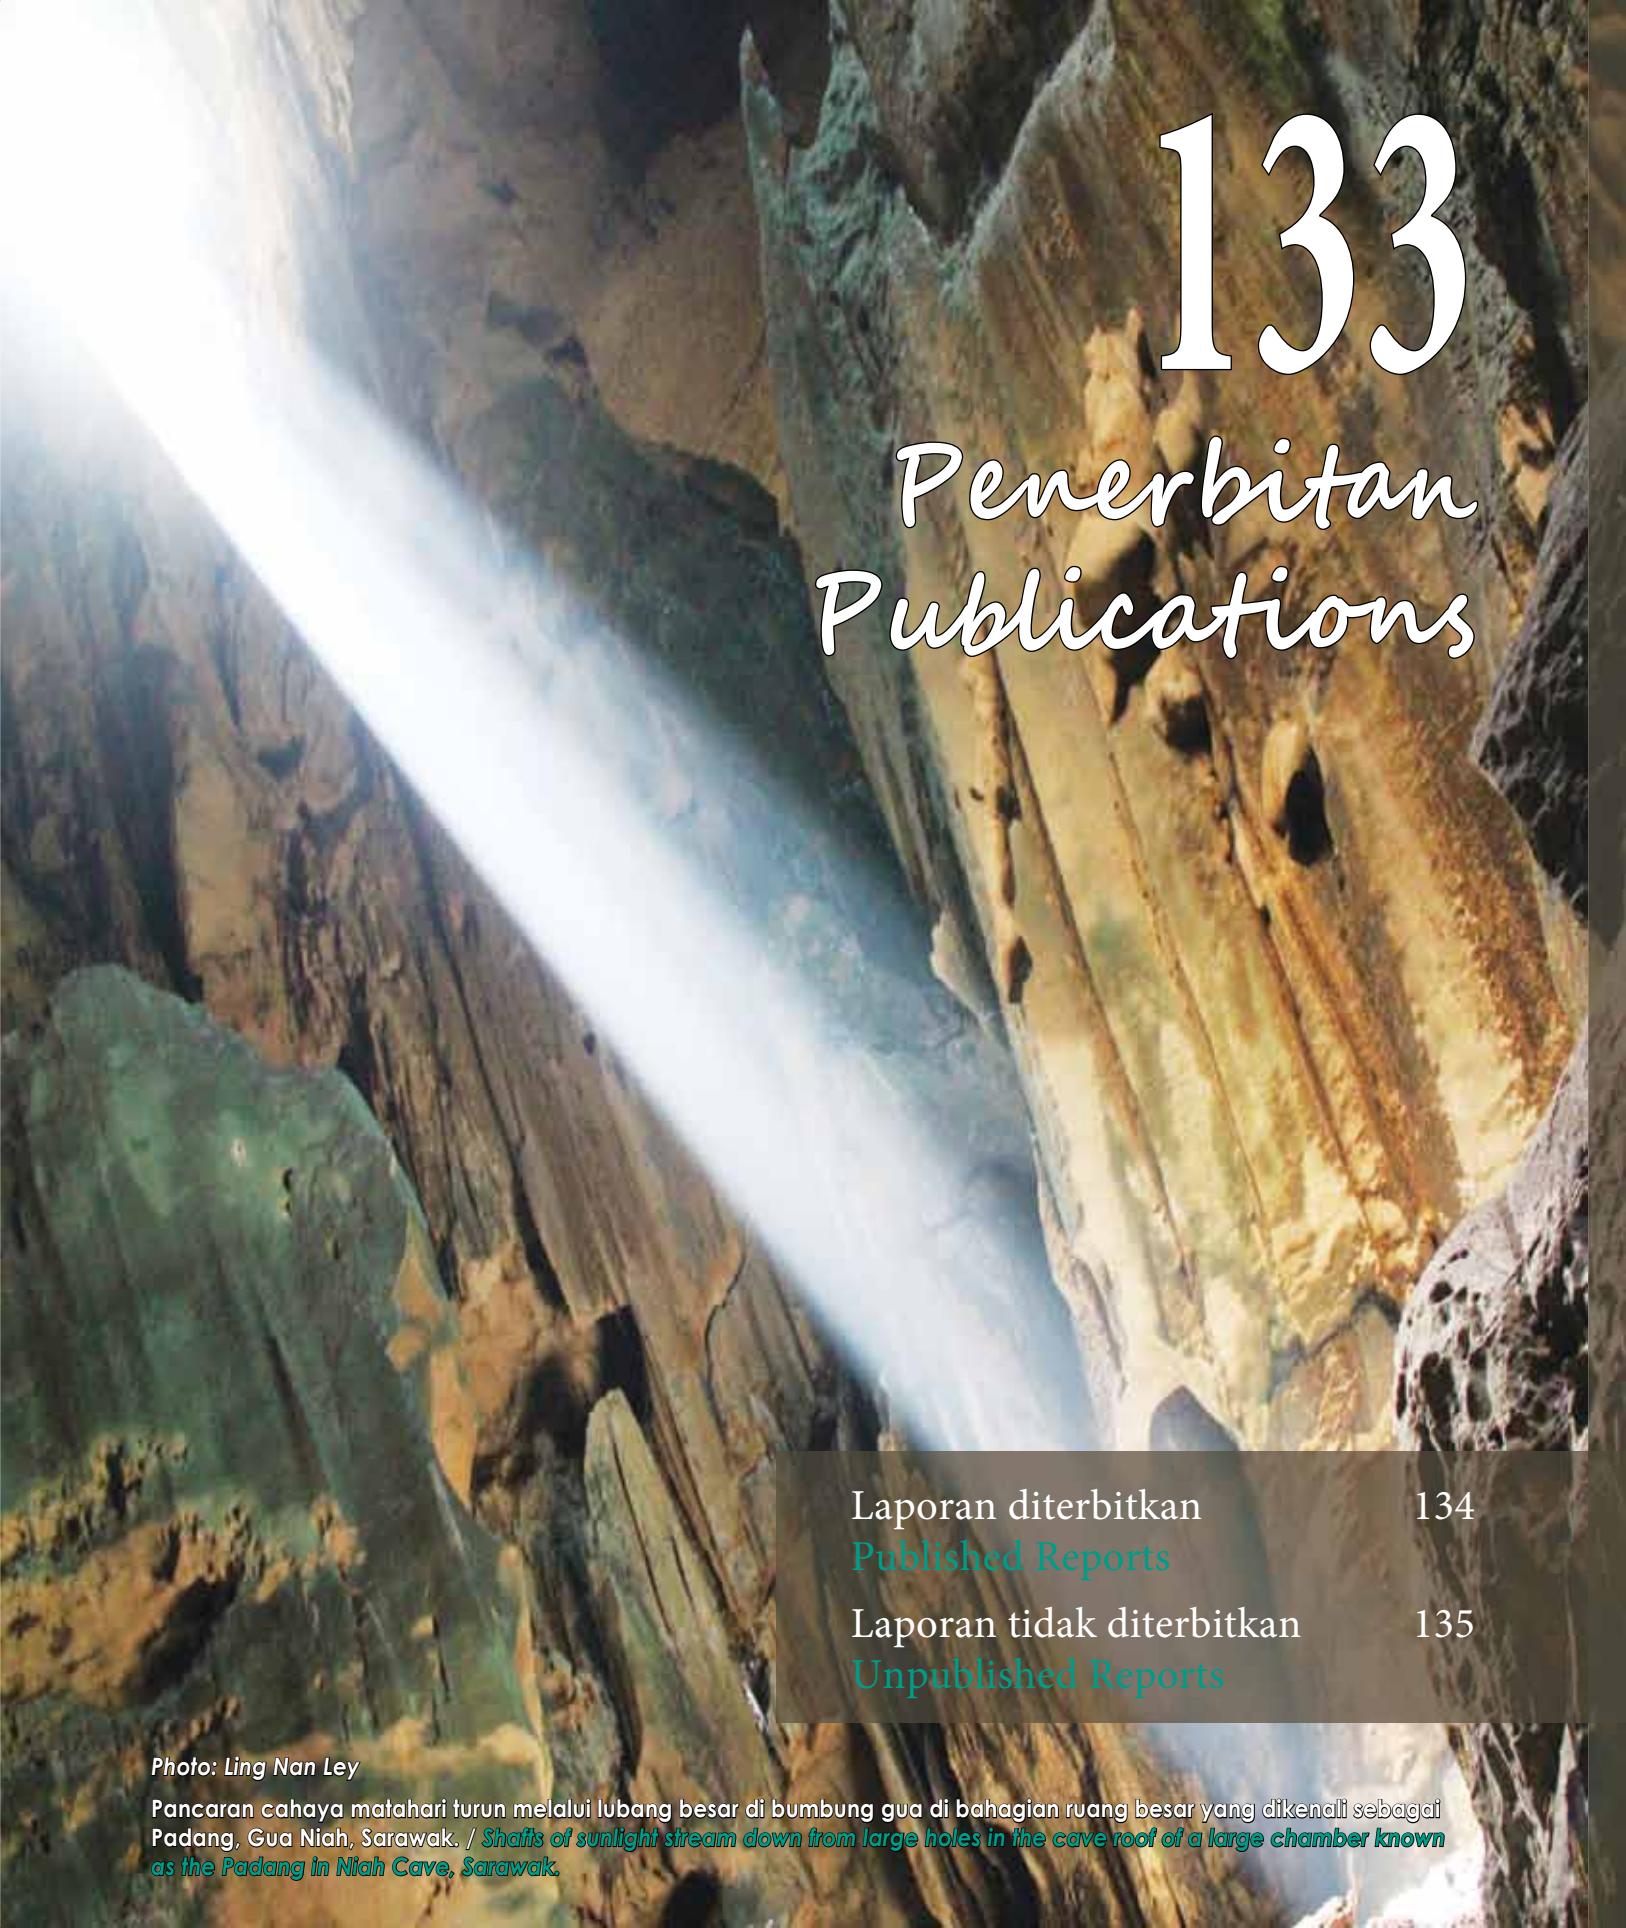

Sebanyak 321 sampel batuan telah diterima manakala sebanyak 471 ujian telah dijalankan dengan nilai kerja sebanyak RM 16,161.00.

The Engineering Geology Laboratory provides tests to determine mechanical and physical properties and strength of rock aggregates and soil. It provides geotechnical support services to the activities of engineering geology, mining, quarrying and other activities of the department. This laboratory also offers geotechnical test services to other government agencies and private sectors.

The Engineering Geology Laboratory received a total of 321 rock samples and carried out a total of 471 tests with the work value of RM 16,161.00.

**Senarai terperinci kerja yang dijalankan oleh Makmal Geologi Kejuruteraan, Semenanjung Malaysia**

6. Mohammed Syahrizal Zakaria & Nizarulikram Abdul Rahim: **Pemetaan geologi terain Bukit Soga, Batu Pahat.** JMG.JHR (GBN) 02/2012.
7. Mohammed Syahrizal Zakaria & Nizarulikram Abdul Rahim: **Pemetaan geologi terain Bukit Banang, Batu Pahat.** JMG.JHR (GBN) 03/2012.
8. Mohammed Syahrizal Zakaria & Nizarulikram Abdul Rahim: **Laporan bersepada projek kajian geobencana Negeri Johor.** JMG.JHR (GBN) 04/2012.
9. Norhazidi Masrom & Nizarulikram Abdul Rahim: **Cadangan tapak sempadan fitur geologi di kawasan Tenggara Johor.** JMG.JHR (PGN) 01/2012.
10. Norhazidi Masrom & Nizarulikram Abdul Rahim: **Laporan program pemantauan air bawah tanah seluruh Negeri Johor Tahun 2011.** JMG.JHR (AS) 01/2012.
11. Noraini Basiri & Nizarulikram Abdul Rahim: **Laporan program pemantauan air bawah tanah seluruh Negeri Johor tahun 2006 hingga 2010.** JMG.JHR (AS) 02/2012.

#### • **Pembangunan Lombong dan Kuari Mine and Quarry Development**

1. Shahar Effendi Abdullah Azizi, Nurul Huda Romli & Abdul Hasibul Jalil Jusoh: **Direktori lombong bagi Negeri Johor Darul Takzim 2012.** JMG. JHR.: (LK) (L) 01/ 2012.
2. Shahar Effendi Abdullah Azizi, Nurul Huda Romli & Anuar Saat: **Direktori kuari bagi Negeri Johor Darul Takzim 2012.** JMG. JHR.: (LK) (L) 02/ 2012.
3. Shahar Effendi Abdullah Azizi, Nurul Huda Romli & Abdul Hasibul Jalil Jusoh: **Direktori pemegang lesen bijih mineral bagi Negeri Johor Darul Takzim 2012.** JMG. JHR.: (LK) (L) 03/ 2012.
4. Shahar Effendi Abdullah Azizi, Nurul Huda Romli & Anuar Saat: **Direktori pengekspor mineral dan bahan batuan bagi Negeri Johor Darul Takzim 2012.** JMG. JHR.: (LK) (L) 04/ 2012.
5. Mohd Hisham Md Nawi & Anuar Saat: **Direktori pemegang sijil pembedil bagi Negeri Johor Darul Takzim 2012.** JMG. JHR.: (LK) (L) 05/ 2012.
6. Shahar Effendi Abdullah Azizi, Mohd Hisham Md Nawi & Abdul Hasibul Jalil Jusoh: **Direktori kedai bijih dan kilang amang bagi Negeri Johor Darul Takzim 2012.** JMG. JHR.: (LK) (L) 06/ 2012.

## Negeri Sembilan / Melaka

#### • **Sumber Mineral / Mineral Resources**

1. Masrita Mohd Aras & Saiful Azwan Kassim: **Statistik pengeluaran dan panduan mineral perindustrian Negeri Sembilan 2011.** JMG.NSM: (SM) 1/2012.
2. Masrita Mohd Aras & Nurul Huda Ismail: **Statistik pengeluaran dan panduan mineral perindustrian Negeri Melaka 2011.** JMG. NSM: (SM) 2/2012.
3. Masrita Mohd Aras & Esy Abdul Rahman: **Statistik hasil pengeluaran dan panduan syarikat berdasarkan mineral perindustrian Negeri Sembilan tahun 2011.** JMG.NSM: (SM) 3/2012.
4. Masrita Mohd Aras & Zamri Abu Samah: **Statistik hasil pengeluaran dan panduan syarikat berdasarkan mineral perindustrian Negeri Melaka tahun 2011.** JMG.NSM: (SM) 4/2012.

#### • **Geosains / Geoscience**

1. Jabatan Mineral dan Geosains: **Leachate distribution and transportation in surface water and groundwater of the Kerubung Landfill, Melaka.** JMG.NSM (SAT) 1/2012.
2. Hisam Ahmad & Asminah Rajuli: **Kajian sumber air bawah tanah di Institusi Pemulihan Dadah, Jelebu, Negeri Sembilan.** JMG.NSM (SAT) 2/2012.
3. Hisam Ahmad & Asminah Rajuli: **Kajian sumber air bawah tanah di Felda Palong 14, Gemas, Negeri Sembilan.** JMG.NSM (SAT) 3/2012.
4. Jabatan Mineral dan Geosains: **Geotechnical assessment of Kerubung Landfill, Kerubung, Melaka.** JMG.NSM (GBN) 1/2012.
5. Jabatan Mineral dan Geosains: **Pemetaan geologi terain, geologi kejuruteraan permukaan dan inventori cerun potongan bagi kawasan seluas 42 km<sup>2</sup> di kawasan Kuala Pilah, Negeri Sembilan Darul Khusus.** JMG.NSM (GBN)2/2012.

## Selangor

- **Sumber Mineral / Mineral Resources**

1. Che Ibrahim Mat Saman, Siti Faridah Yusup & Zakaria Mohamad: **Penilaian sumber lempung marin di kawasan Felcra Kampung Sungai Lang dan PKPS Kampung Olak Lempit, Daerah Kuala Langat, Selangor Darul Ehsan.** *JMG.SWP (MPI) 1/2011.*
2. Che Ibrahim Mat Saman, Siti Faridah Yusup & Zakaria Mohamad: **Penilaian sumber lempung marin di Ladang Sungai Buloh dan Ladang Bukit Talang, Daerah Kuala Selangor, Selangor Darul Ehsan.** *JMG.SWP (MPI) 1/2012.*

- **Geosains / Geoscience**

1. Mazatul Akmar Aros, Mohd Sidi Daud & Zakaria Mohamad: **Penggerudian dan pembinaan piezometer dan sebuah telaga ujian beserta ujian pengeapanan telaga untuk kajian susunan tebing di Bestari Jaya, Selangor.** *JMG.SWP (SAT) 01/2012.*
2. Mazatul Akmar Aros, Mohd Sidi Daud & Zakaria Mohamad: **Penggerudian dan pembinaan telaga tiub kawasan Bukit Cheding, Kuala Langat.** *JMG.SWP (SAT) 02/2012.*
3. Mohd Sidi Daud, & Zakaria Mohamad: **Pemetaan geologi cerun kritisal batuan Pangsapuri Intan, Taman Bukit Permai, Cheras, Negeri Selangor Darul Ehsan.** *JMG.SWP (GBN) 01/2012.*
4. Jabatan Mineral dan Geosains: **Laporan kestabilan tanah di Bukit 387 Wisma Perwira 4 Divisyen, Wangsa Melawati, Kuala Lumpur.** *JMG.SWP (GBN) 05/2012.*
5. Jabatan Mineral dan Geosains: **Laporan siasatan tapak di No. 3132-18, Puchong Housing Estate, Jalan Batu 6 ¼ Puchong, 58200 Kuala Lumpur.** *JMG.SWP (GBN) 02/2012.*
6. Jabatan Mineral dan Geosains: **Laporan awal siasatan geologi kejadian tanah runtuh di Institut Alam Sekitar Malaysia (Eimas), UKM Bangi, Selangor Darul Ehsan.** *JMG.SWP (GBN) 03/2012.*
7. Jabatan Mineral dan Geosains: **Laporan siasatan geologi kejadian gelinciran tanah di Look Out Point (Menara Tinjau), Hulu Langat, Selangor Darul Ehsan.** *JMG.SWP (GBN) 04/2012.*

## Perak

- **Sumber Mineral / Mineral Resources**

1. Azmi Abu Bakar, Azemi Hj. Eki & Kamaludin Hassan: **Statistik pengeluaran bahan mineral industri Negeri Perak tahun 2011.** *JMG.PRK(MPI) 1/12.*
2. Nor Azian Hamzah, Azemi Hj. Eki & Kamaludin Hassan: **Industri berdasarkan mineral perindustrian Negeri Perak tahun 2011.** *JMG.PRK.(MPI) 2/12.*

## Kedah / Perlis / Pulau Pinang

- **Sumber Mineral / Mineral Resources**

1. Fakhruddin Afif Fauzi: **Kajian potensi sumber bijih besi di sekitar Gunung Jerai, Kuala Muda, Kedah.** *JMG.KPP (MPI) 03/2012.*
2. Badrol Mohamad: **Statistics of industrial mineral-based industries in Kedah/Perlis/Pulau Pinang 2011/2012.** *JMG.KPP (SM) 01/2012.*

- **Geosains / Geoscience**

1. Ahmad Zamani Samat: **Potensi air tanah di Sekolah Menengah Agama Nahdah Hasanhah, Melele, Kodiang, Kedah.** *JMG.KPP (SAT) 01/2012.*
2. Zamila Abdul Rahman: **Statistik perusahaan air mineral Negeri Kedah/Perlis/Pulau Pinang 2012.** *JMG.KPP (GS) 01/2012.*
3. Wan Salmi Wan Harun: **Pemetaan geologi terain seluas 50 km<sup>2</sup> di Kulim, Kedah.** *JMG.KPP (GBN) 01/2012.*
4. Muhammad Mustadza Mazni: **Sumber geowarisan dan geopolancongan di sekitar Pembangunan Wilayah Ekonomi Koridor Utara Perlis. Persidangan Geosains Kebangsaan (NGC) Kuching, Sarawak.** *JMG.KPP (WG) 01/2012.*

- **Pembangunan Lombong dan Kuari Mine and Quarry Development**

1. Azihan Mat Arshad & Nopazli Ramzi: **Direktori statistik pengeluaran mineral dan direktori pengeluar di Kedah/Perlis/Pulau Pinang 2011.** *JMG KPP.(LK) 01/2012.*
2. Azihan Mat Arshad & Zamali Abdul Wahab: **Aktiviti carigali dan perlombongan Negeri Kedah/Perlis/Pulau Pinang 2011.** *JMG KPP(LK) 02/2012.*

## Kelantan

- **Sumber Mineral / Mineral Resources**

1. Mohd Yuzlan Yusoff: **Tinjauan sumber mineral kawasan RKT Perasu, Gua Musang, Kelantan.** *JMG.KLT(MPI)1/2012.*
2. Mohd Yuzlan Yusoff: **Tinjauan sumber feldspar kawasan Utara Padang Malim, Gua Musang, Kelantan.** *JMG.KLT(MPI)2/2012.*
3. Mohd Yuzlan Yusoff: **Statistik pengeluaran mineral perindustrian dan direktori pengeluar bagi Negeri Kelantan tahun 2012.** *JMG.KLT(MPI)4/2012.*

- **Geosains / Geoscience**

1. Amir Mizwan Mohd Akhir: **Laporan pemantauan air tanah Negeri Kelantan Bagi tahun 2011-2012.** *JMG.KLT.(SAT)05/2012.*
2. Amir Mizwan Mohd Akhir: **Laporan pengerudian telaga tiub untuk tujuan mengawal kebakaran gambut di Kampung Kual Kecil Bachok, Kelantan.** *JMG.KLT.(SAT)02/2012.*
3. Amir Mizwan Mohd Akhir: **Laporan pengerudian telaga cetek (pemodelan lembangan).** *JMG.KLT.(SAT)01/2012.*
4. Amir Mizwan Mohd Akhir: **Laporan model konsep lembangan Sungai Kelantan.** *JMG.KLT.(SAT)03/2012.*
5. Amir Mizwan Mohd Akhir: **Groundwater modelling for Lower Kelantan River Basin (shallow aquifer).** *JMG.KLT.(SAT)04/2012.*
6. Ahmad Rosli Othman: **Laporan pemetaan geologi terain Blok 292, Jajahan Jeli, Kelantan Darul Naim.** *JMG.KLT.(GBN)02/2012.*
7. Ahmad Rosli Othman: **Laporan pemetaan geologi terain Blok 254 dan 293, Jajahan Jeli, Kelantan Darul Naim.** *JMG.KLT.(GBN)02/2012.*
8. Ahmad Rosli Othman: **Laporan bersepadu projek kajian geobencana Negeri Kelantan Darul Naim.** *JMG.KLT.(GBN)03/2012.*

## Terengganu

- **Sumber Mineral / Mineral Resources**

1. Muhammad Azfar Kamaruddin, Abdul Hadi Abdul Rahman, Abdul Haziq Yusuf & Ideris Muhammad: **Laporan statistik pengeluaran mineral perindustrian dan industri yang berasaskannya serta direktori pengeluar bagi Terengganu, 2011.** *JMG.TGG(MPI)01/2012.*

2. Abdul Hadi Abdul Rahman: **Sumber silika di Terengganu: Cirian, penilaian dan kepelbagaiannya.** *JMG.TGG(MPI)02/2012.*
3. Muhammad Azfar Kamaruddin & Abdul Hadi Abdul Rahman: **Kajian sumber batuan silika di Sungai Mas, Kemaman Terengganu.** *JMG.TGG(MPI)03/2012.*
4. Muhammad Azfar Kamaruddin & Abdul Hadi Abdul Rahman: **Kajian sumber ilmenit di kawasan Tanggul dan Penghulu Diman, Hulu Terengganu, Terengganu.** *JMG.TGG(MPI)04/2012.*
5. Hamzah Zakaria & Abdul Hadi Abdul Rahman: **Penilaian semula timah plaser di Sungai Tebak, Kemaman, Terengganu.** *JMG.TGG(MBL) 01/2012.*
6. Hamzah Zakaria & Abdul Hadi Abdul Rahman: **Penilaian semula timah plaser di Sungai Cenderung, Kemaman, Terengganu.** *JMG.TGG(MBL) 02/2012.*

- **Geosains / Geoscience**

1. Razaidi Shah Abdul Kadir & Hamlee Ismail: **Laporan pemetaan geologi syit 73 dan 85, Kemaman, Terengganu.** *JMG.TGG(PGN)01/2012.*
2. Zahidi Hamzah & Hamlee Ismail: **Pemantauan air bawah tanah Terengganu tahun 2006-2010.** *JMG.TGG(SAT) 01/2012.*
3. Zahidi Hamzah & Hamlee Ismail: **Laporan siasatan sumber air bawah tanah kawasan Kemaman.** *JMG.TGG(SAT) 02/2012.*
4. Hamlee Ismail: **Pemetaan geologi terain, Blok 635, Bukit Kor Marang, Terengganu.** *JMG.TGG(GBN) 01/2012.*
5. Hamlee Ismail: **Siasatan geologi kejadian tanah mendap di kawasan Felda Selasih, Setiu Terengganu.** *JMG.TGG(GBN) 02/2012.*
6. Jabatan Mineral dan Geosains: **Pemetaan geologi terain, Blok 684, Bukit Kor, Marang, Terengganu.** *JMG.TGG(GBN) 03/2012.*

## Pahang

- **Geosains / Geoscience**

1. Mazlan Mohamad Zain: **Pemetaan geologi terain, geologi kejuruteraan permukaan dan inventori cerun potongan yang meliputi kawasan Bandar Raub, Pahang, Daerah Raub, Negeri Pahang Darul Makmur.** *JMG.PHG.(GBN) 3/2012.*
2. Mohd Asnizam Ayub: **Statistik pengeluaran air mineral Negeri Pahang 2011.** *JMG.PHG. (SAT) 1/2012.*

## Sarawak

- **Sumber Mineral / Mineral Resources**

1. Freddy Heward Chinta & Tennent Ahai: **Eksplorasi geokimia kawasan Miri, Sarawak Utara (tinjauan) RMK Ke-9. JMG. SWK.(SGR)06/2010.**
2. Freddy Heward Chinta & Tennent Ahai: **Eksplorasi geokimia kawasan Miri-Baram, Sarawak Utara (tinjauan) RMK Ke-9. JMG.SWK.(SGR)07/2010.**
3. Freddy Heward Chinta & Tennent Ahai: **Eksplorasi geokimia kawasan Baram, Sarawak Utara (tinjauan) RMK Ke-9. JMG. SWK.(SGR)08/2010.**
4. Freddy Heward Chinta & Tennent Ahai: **Eksplorasi geokimia kawasan Limbang, Sarawak Utara (tinjauan) RMK Ke-9. JMG. SWK.(SGR)09/2010.**
5. Freddy Heward Chinta, Khairul Nazri Abd. Ghani & Tennent Ahai: **Eksplorasi geokimia kawasan Lawas, Sarawak Utara (tinjauan) RMK Ke-9. JMG.SWK.(SGR)10/2010.**
6. John Joseph Jinap, Freddy Heward Chinta & Tennent Ahai: **Laporan bersepadu projek geokimia rantau Sarawak. JMG. SWK.(SGR)11/2010.**

- **Geosains / Geoscience**

1. Mohd. Yusop Ramli, Thomson Galin, Anuar Ishak, Mohd. Dahan & Abdul Razak Zainal Abidin: **Geologi kawasan Nanga Budu, Sarawak, Malaysia. JMG.SWK.(PGN)01/2010.**
2. Thomson Galin: **Geologi dan sumber mineral kawasan Nanga Mujong, Sarawak. JMG.SWK.(PGN)3/2010.**
3. Redzuan Ahmad Banjar: **Geologi kawasan Lawas-Kuala Lawas Sarawak, Malaysia (RMK Ke-9). JMG.SWK.(PGN)4/2010.**
4. Mohd. Yusop Ramli: **Laporan bersepadu projek pemetaan geologi Sarawak. JMG.SWK.(PGN)05/2010.**

- **Mineral Tenaga / Energy Mineral**

1. Paulus Godwin: **Laporan bersepadu projek penilaian sumber batu arang Sarawak RMK ke-9. JMG.SWK.(SAB)01/2011.**

## Sabah

- **Sumber Mineral / Mineral Resources**

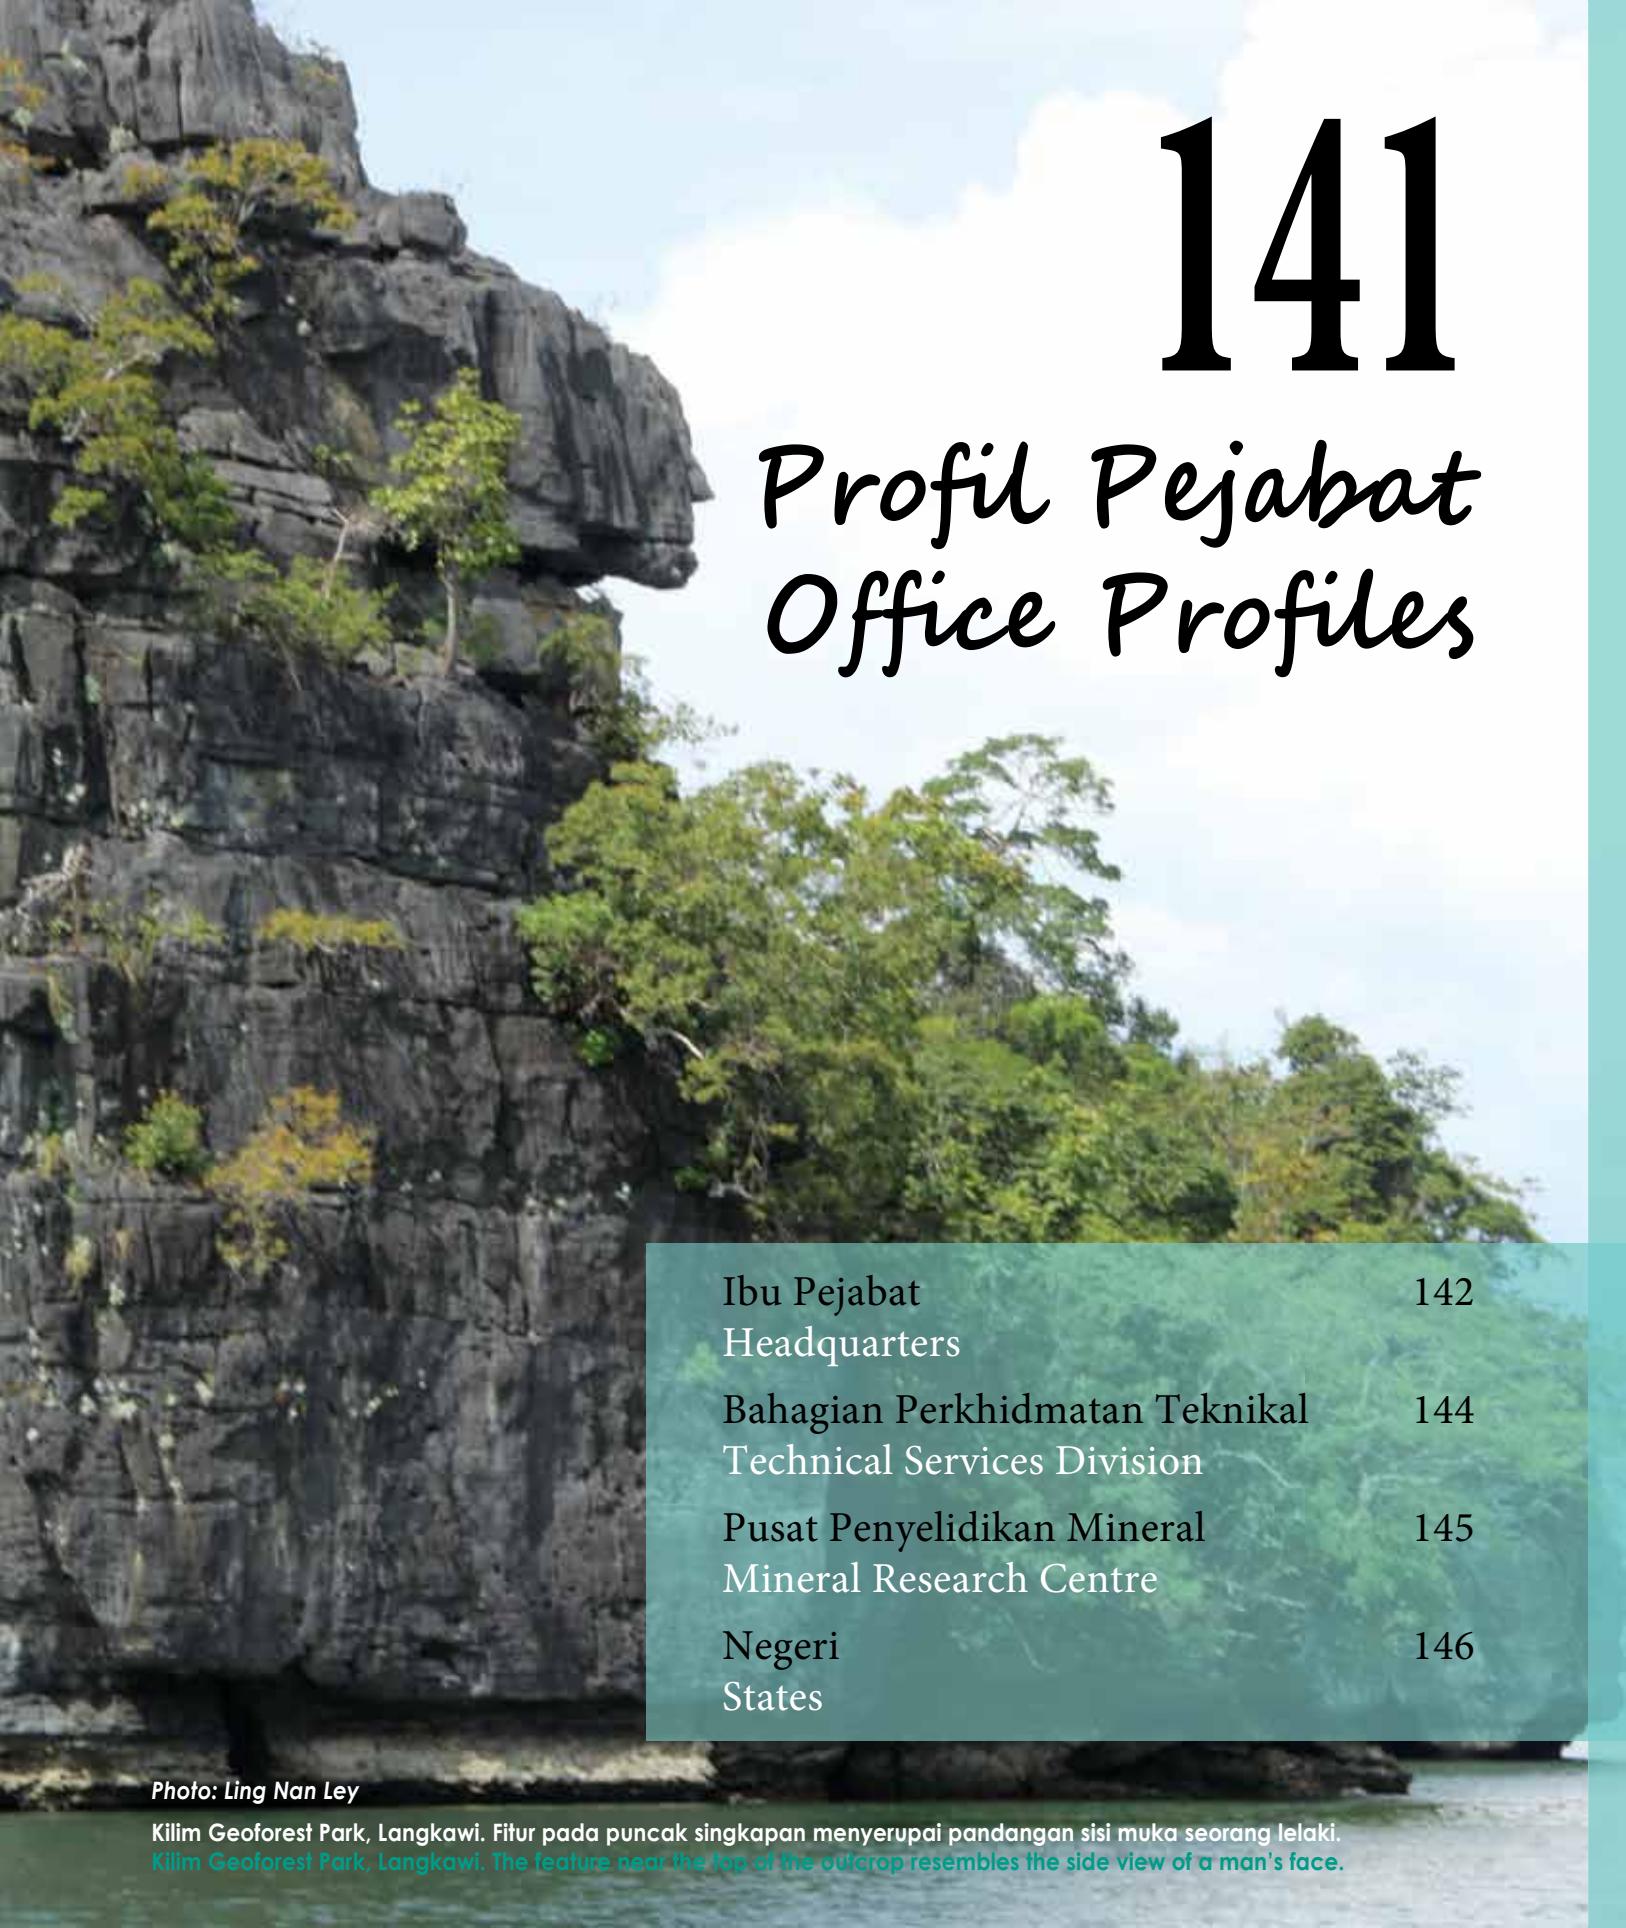

1. Jayawati Fanilla Sahih Montoi & Webster Wong: **Kesesuaian lempung kawasan Segama dan Silabukan, Lahad Datu, sebagai bahan mentah dalam pembuatan seramik. JMG.SBH(MPI) 04/2010.**
2. Jayawati Fanilla Sahih Montoi & Webster Wong: **Potensi sumber montmorilonit di kawasan Mansuli dan Silabukan, Lahad Datu, Sabah. JMG.SBH(MPI) 05/2010.**
3. Webster Wong, Jayawati Fanilla Sahih Montoi, Nor Effendy Norizan & Joanes Muda: **Laporan bersepadu projek penilaian sumber mineral perindustrian Sabah RMK-9. JMG.SBH(MPI) 07/2010.**
4. Jayawati Fanilla Sahih Montoi: **Laporan industri berdasarkan mineral perindustrian Negeri Sabah tahun 2011. JMG. SBH(MPI)02/2012.**
5. Jayawati Fanilla Sahih Montoi & Webster Wong: **Potensi sumber pasir binaan di kawasan Sungai Papar, Daerah Papar, Sabah. JMG.SBH(MPI) 2/2012.**

- **Geosains / Geoscience**

1. Mohamed Asri Omar & Zamri Ramli: **Laporan penyiasatan awal pergerakan tanah di Sekolah Kebangsaan Kauluan, Ranau, Sabah. JMG.SBH/GBN/01/2011.**
2. Mohamed Asri Omar & Zamri Ramli: **Laporan penyiasatan awal pergerakan tanah di Taman Indah Jaya, Sandakan, Sabah. JMG.SBH/GK/02/2011.**
3. Mohamed Asri Omar, Bailon Golutin & Zamri Ramli: **Laporan penyiasatan awal pergerakan tanah di Sekolah Kebangsaan Sri Tanjung Papat 1, Sandakan, Sabah. JMG.SBH/GBN/03/2011.**
4. Bailon Golutin, Joanes Muda, Nightingale Lian, Chung Pit Soon & Zamri Ramli: **Engineering geological assessment of resort/hotels sites in the Kundasang area, Sabah. JMG. SBH(GBN)1/2012.**
5. Tungah Surat: **Projek Warisan Geologi Negara, Kompleks Gunung Kinabalu, Sabah. JMG.SBH(WGN)/01/2010.**

- **Geosains / Geoscience**

1. Fredolin Javino & Ibrahim Amnan: **Isotope and hydrogeochemical investigations for Tawau geothermal prospects, Sabah, Malaysia. JMG.SBH(GS)/04/2010.**

Gua Bewah, Kenyir, Terengganu. / Bewah Cave, Kenyir, Terengganu.

A large, dark, textured rock formation rises from the ocean. The rock is covered in various shades of brown, tan, and black, with some lighter, possibly white or light-colored, patches. It has a rough, craggy texture with many ledges and overhangs. Sunlight reflects off the rock's surface, creating bright highlights that emphasize its three-dimensional form. The base of the rock is partially submerged in the ocean water, which appears blue and slightly choppy.

## Event Highlights

**06-07.01.2012**

- Lawatan kerja rombongan Timbalan Ketua Setiausaha (Sumber Asli) NRE Dato' Dr. Mohd Ali bin Mohamad Nor ke JMG Sabah.
- Working visit by Deputy Secretary General (Natural Resources) NRE Dato' Dr. Mohd Ali bin Mohamad Nor to JMG Sabah.

**17-19.02.2012**

- Program “Annual NRE Management Work Camp Programme, Langkawi” anjuran bersama NRE dan JMG Malaysia.
- Annual NRE Management Work Camp Programme, Langkawi – jointly organised by NRE and JMG Malaysia.

**08-09.02.2012**

- Program Pemimpin Muda Prihatin Air Kebangsaan – Zon Utara, di Pendang Lake Resort, Pendang, Kedah.  
National Water Watch Programme for Young Leaders – North Zone, at Pendang Lake Resort, Pendang, Kedah.

Program dirasmikan oleh Pengarah JMG KPP.  
Opening by the Director of JMG KPP.

Pembinaan model air bawah tanah oleh peserta program.  
The participants constructing a groundwater model.

**13.03.2012**

- Seminar Kesedaran Risiko Batu Runtuh Bukit Batu Kapur di Lembah Kinta.  
Seminar on Awareness of Rockfall Risk at Limestone Hills in Kinta Valley.

Photo: Safaruddin b. Sirim

1. Peserta-peserta seminar anjuran bersama JMG Malaysia dan Majlis Bandaraya Ipoh (MBI) di Dewan Azlan Shah, MBI, Ipoh.  
The participants at the seminar which was jointly organised by JMG Malaysia and Ipoh City Hall (MBI) at Dewan Azlan Shah, MBI, Ipoh.
2. Perasmian penutup oleh YBhg. Dato' Haji Abu Bakar b. Haji Said, Pengarah Unit Perancang Ekonomi Negeri Perak.  
Closing ceremony officiated by YBhg. Dato' Haji Abu Bakar b. Haji Said, Director of Perak State Economic Planning Unit.

**20-22.03.2012**

- Kem Pemimpin Muda Prihatin Air Peringkat Kebangsaan Anjuran UNESCO-IHP di Pusat Eko Pelajaran Hutan Paya Laut, Kuala Sepetang, Taiping, Perak.  
[National Water Watch Programme for Young Leaders organised by UNESCO-IHP at Pusat Eko Pelajaran Hutan Paya Laut, Kuala Sepetang, Taiping, Perak.](#)

Photo: Mohd. Rodzi b. Mat Saman

1. Penerangan kepada pelajar yang melawat pameran jabatan.  
[Briefing to the students visiting the department's exhibition booth.](#)
2. Demonstrasi penggerudian menggunakan kaedah pengejetan kepada pelajar.  
[Demonstration of drilling by the jetting method to the students.](#)

**26.03.2012**

- Seminar Perubahan Aras Laut Kuno – Kefahaman Terhadap Sejarah Pembentukan Bumi anjuran bersama JMG Malaysia, Institut Penyelidikan Hidraulik Kebangsaan Malaysia (NAHRIM) dan Universiti Kebangsaan Malaysia (UKM) di Mini Auditorium, NAHRIM, Serdang, Selangor. / [Seminar on Paleo Sea Level Changes – Understanding the Earth Formation History jointly organised by JMG Malaysia, National Hydraulic Research Institute of Malaysia \(NAHRIM\) and Universiti Kebangsaan Malaysia \(UKM\) at the Mini Auditorium, NAHRIM, Serdang, Selangor.](#)

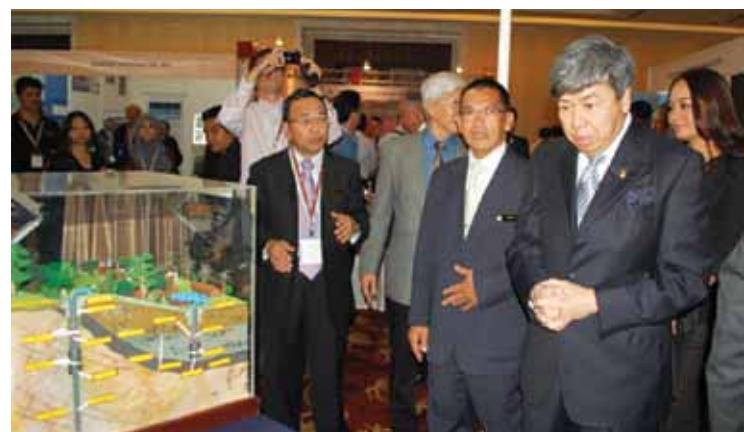

1. Kertas Ucaptama oleh Prof. Emeritus Dr. H. D. Tjae.  
[Keynote Paper by Prof. Emeritus Dr. H. D. Tjae.](#)
2. Peserta-peserta seminar.  
[The seminar participants.](#)

## Program IGM Outreach 2012-2013 – “Conference on Groundwater - Who, Why, Where & How” / IGM Outreach Program 2012-2013 – “Conference on Groundwater - Who, Why, Where & How”

**08-09.05.2012**

- Majlis Perasmian Program IGM Outreach 2012-2013 oleh Duli Yang Maha Mulia Sultan Sharafuddin Idris Shah Ibni Almarhum Sultan Salahuddin Abdul Aziz Shah, Sultan Selangor di One Word Hotel, Kuala Lumpur.  
**Launching of the IGM Outreach Program 2012-2013 by His Royal Highness Sultan Sharafuddin Idris Shah ibni Almarhum Sultan Salahuddin Abdul Aziz Shah, the Sultan of Selangor at One Word Hotel, Kuala Lumpur.**

**12.04.2012**

- Pelancaran Media oleh YB Dato'Sri Douglas Uggah Embas, Menteri NRE.  
**Media Launching by YB Dato' Sri Douglas Uggah Embas, Minister of NRE.**

## Program Kembara Bersama Media NRE 2012 NRE Media Adventure Programme 2012

**17-20.05.2012**

- Kembara Bersama Media NRE Siri 3 & 4 tahun 2012 di Pulau Tanjung Dendang, Kilim Geoforest Park, Langkawi.  
NRE Media Adventure Programme 3rd & 4th series 2012 at Pulau Tanjung Dendang, Kilim Geoforest Park, Langkawi.

**12-15.10.12**

- Kembara Bersama Media NRE Siri ke-7 & ke-8/2012 di kawasan tapak Warisan Geologi Tanjung Balau, Tanjung Balau-Desaru, Johor.  
NRE Media Adventure Programme 7th & 8th series 2012 at Tanjung Balau Geoheritage Site,Tanjung Balau-Desaru, Johor.

Tanjung Balau

**27.05.2012**

- Majlis perasmian telaga tiub di Kg. Biah Skim 1, Keningau telah disempurnakan oleh Timbalan Menteri Sumber Asli dan Alam Sekitar; Y.B Tan Sri Datuk Seri Panglima Joseph Kurup bersama Pembantu Menteri Pelancongan, Kebudayaan dan Alam Sekitar Negeri Sabah, Y.B. Datuk Ellron Angin.

**Tube well commissioning ceremony in Kg.Biah Skim1, Keningau, officiated by the Deputy Minister of Natural Resources And Environment, Y.B Tan Sri Datuk Seri Panglima Joseph Kurup together with the Assistant Minister of Tourism, Culture and Environment Ministry of Sabah, Y.B. Datuk Ellron Angin.**

**19.06.2012**

- Majlis Anugerah Perkhidmatan Cemerlang (APC) 2011 di Pullman Hotel, Kuching Sarawak
- JMG 2011 Excellent Service Award Ceremony at Pullman Hotel, Kuching, Sarawak**

Majlis dirasmikan oleh Yang Berhormat Datuk Amar Hj Awang Tengah bin Ali Hassan, Menteri Perancangan Sumber dan Alam Sekitar II Sarawak.  
The Honourable Datuk Amar Hj Awang Tengah bin Ali Hassan, Minister of Resources Planning and Environment II Sarawak officiating the ceremony.

**20-21.06.2012**

- Persidangan JMG 2012 di Pullman Hotel, Kuching Sarawak.  
2012 JMG Conference at Pullman Hotel, Kuching Sarawak.

**22.06.2012**

- Kerja lapangan pasca Persidangan JMG dan Pra-Persidangan Geosains Kebangsaan di kawasan Bau.  
Post JMG Conference and Pre-National Geoscience Conference Fieldwork at Bau area.

**23-24.06.2012**

- Persidangan Geosains Kebangsaan 2012 di Pullman Hotel, Kuching Sarawak dianjur bersama oleh JMG dan Persatuan Geologi Malaysia.  
**National Geoscience Conference at Pullman Hotel, Kuching, Sarawak jointly organised by JMG and Geological Society of Malaysia.**

**27.06.12**

- "Seminar dan Dialog Pembangunan Tapak Warisan Geologi Pesisir Wilayah KEJORA" anjuran bersama KEJORA, JMG dan UKM.  
**"Seminar and Dialogue on the Development of Coastal Geological Heritage Site in KEJORA Region" jointly organised by KEJORA, JMG and UKM .**

Photo: Asrul Sani Abdullah

**30.06.2012**

- Program Rakan Alam Sekitar mengenai pemuliharaan warisan geologi di Tanjung Tuan, Melaka.  
**Friends of Environment Programme on the conservation of geological heritage at Tanjung Tuan, Melaka.**

**20.09.2012**

- Majlis Perasmian dan Penyerahan Telaga Air Tanah di Institut Pertanian Ayer Hitam, Johor oleh Timbalan Menteri Sumber Asli dan Alam Sekitar, YB Tan Sri Datuk Seri Panglima Joseph Kurup.  
**Inauguration and handing over of tube well at Ayer Hitam Institute of Agriculture, Johore by the Deputy Minister of Natural Resources and Environment, YB Tan Sri Datuk Seri Panglima Joseph Kurup.**

# GEOLOGICAL MAP OF PENINSULAR MALAYSIA

(Modified based on the 8th edition, 1985)

## LEGEND

### SEDIMENTARY ROCKS

- QUATERNARY
- TERTIARY
- JURASSIC - CRETACEOUS
- TRIASSIC
- PERMIAN
- CARBONIFEROUS
- DEVONIAN
- ORDOVICIAN - SILURIAN
- CAMBRIAN

Marine and continental deposits: clay, silt, sand, peat with minor gravel. Basalt of Early Pleistocene age in the Kuantan area.

Isolated continental basin deposits of Late Tertiary age: shale, sandstone, conglomerate and minor coal seams. Volcanics in the Segamat area.

Continental deposits of thick, cross-bedded sandstone with subordinate conglomerate and shale/mudstone. Volcanics are locally present.

Interbedded sandstone, siltstone and shale; widespread volcanics, mainly tuffs of rhyolitic to dacitic composition in Central Peninsular. Limestone prominent in lower part of the succession. Conglomerate and chert are locally prominent.

Phyllite, slate and shale with subordinate sandstone and schist. Prominent development of limestone throughout the succession. Volcanics, mainly rhyolitic to andesitic in composition are widespread.

Phyllite, slate, shale and sandstone; argillaceous rocks are commonly carbonaceous. Locally prominent development of limestone. Volcanics of acid to intermediate composition are locally present.

Phyllite, schist and slate; limestone and sandstone are locally prominent. Some interbeds of conglomerate, chert and rare volcanics.

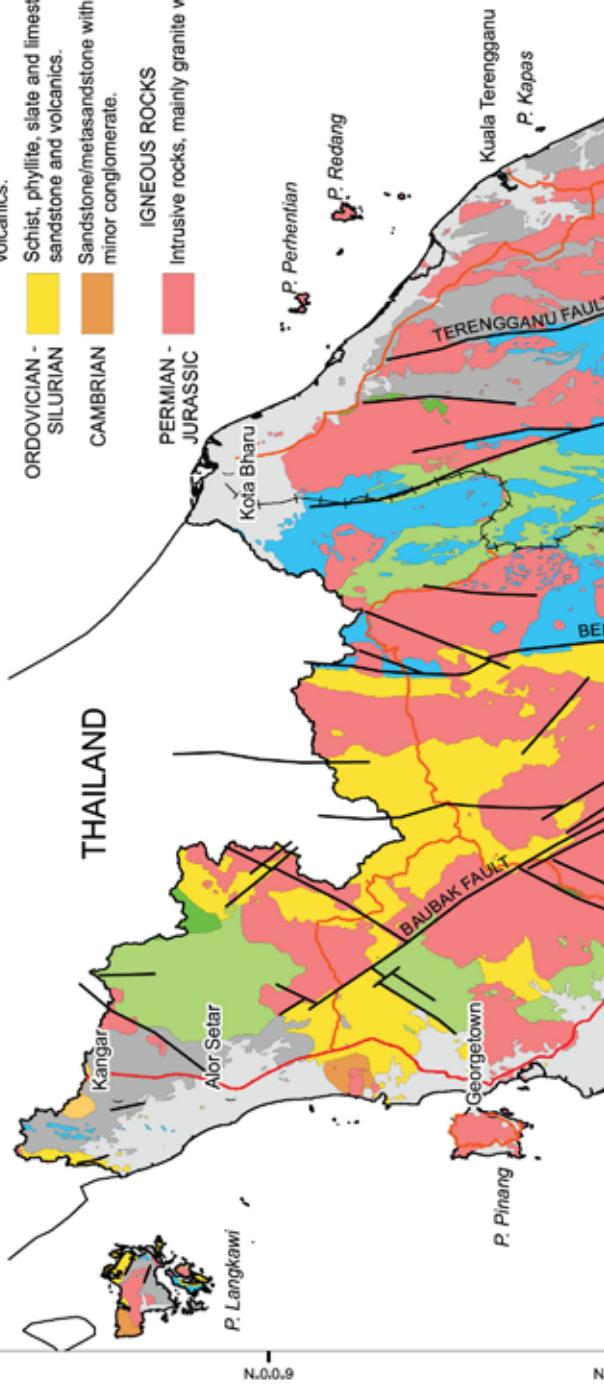

Schist, phyllite, slate and limestone. Minor intercalations of sandstone and volcanics.

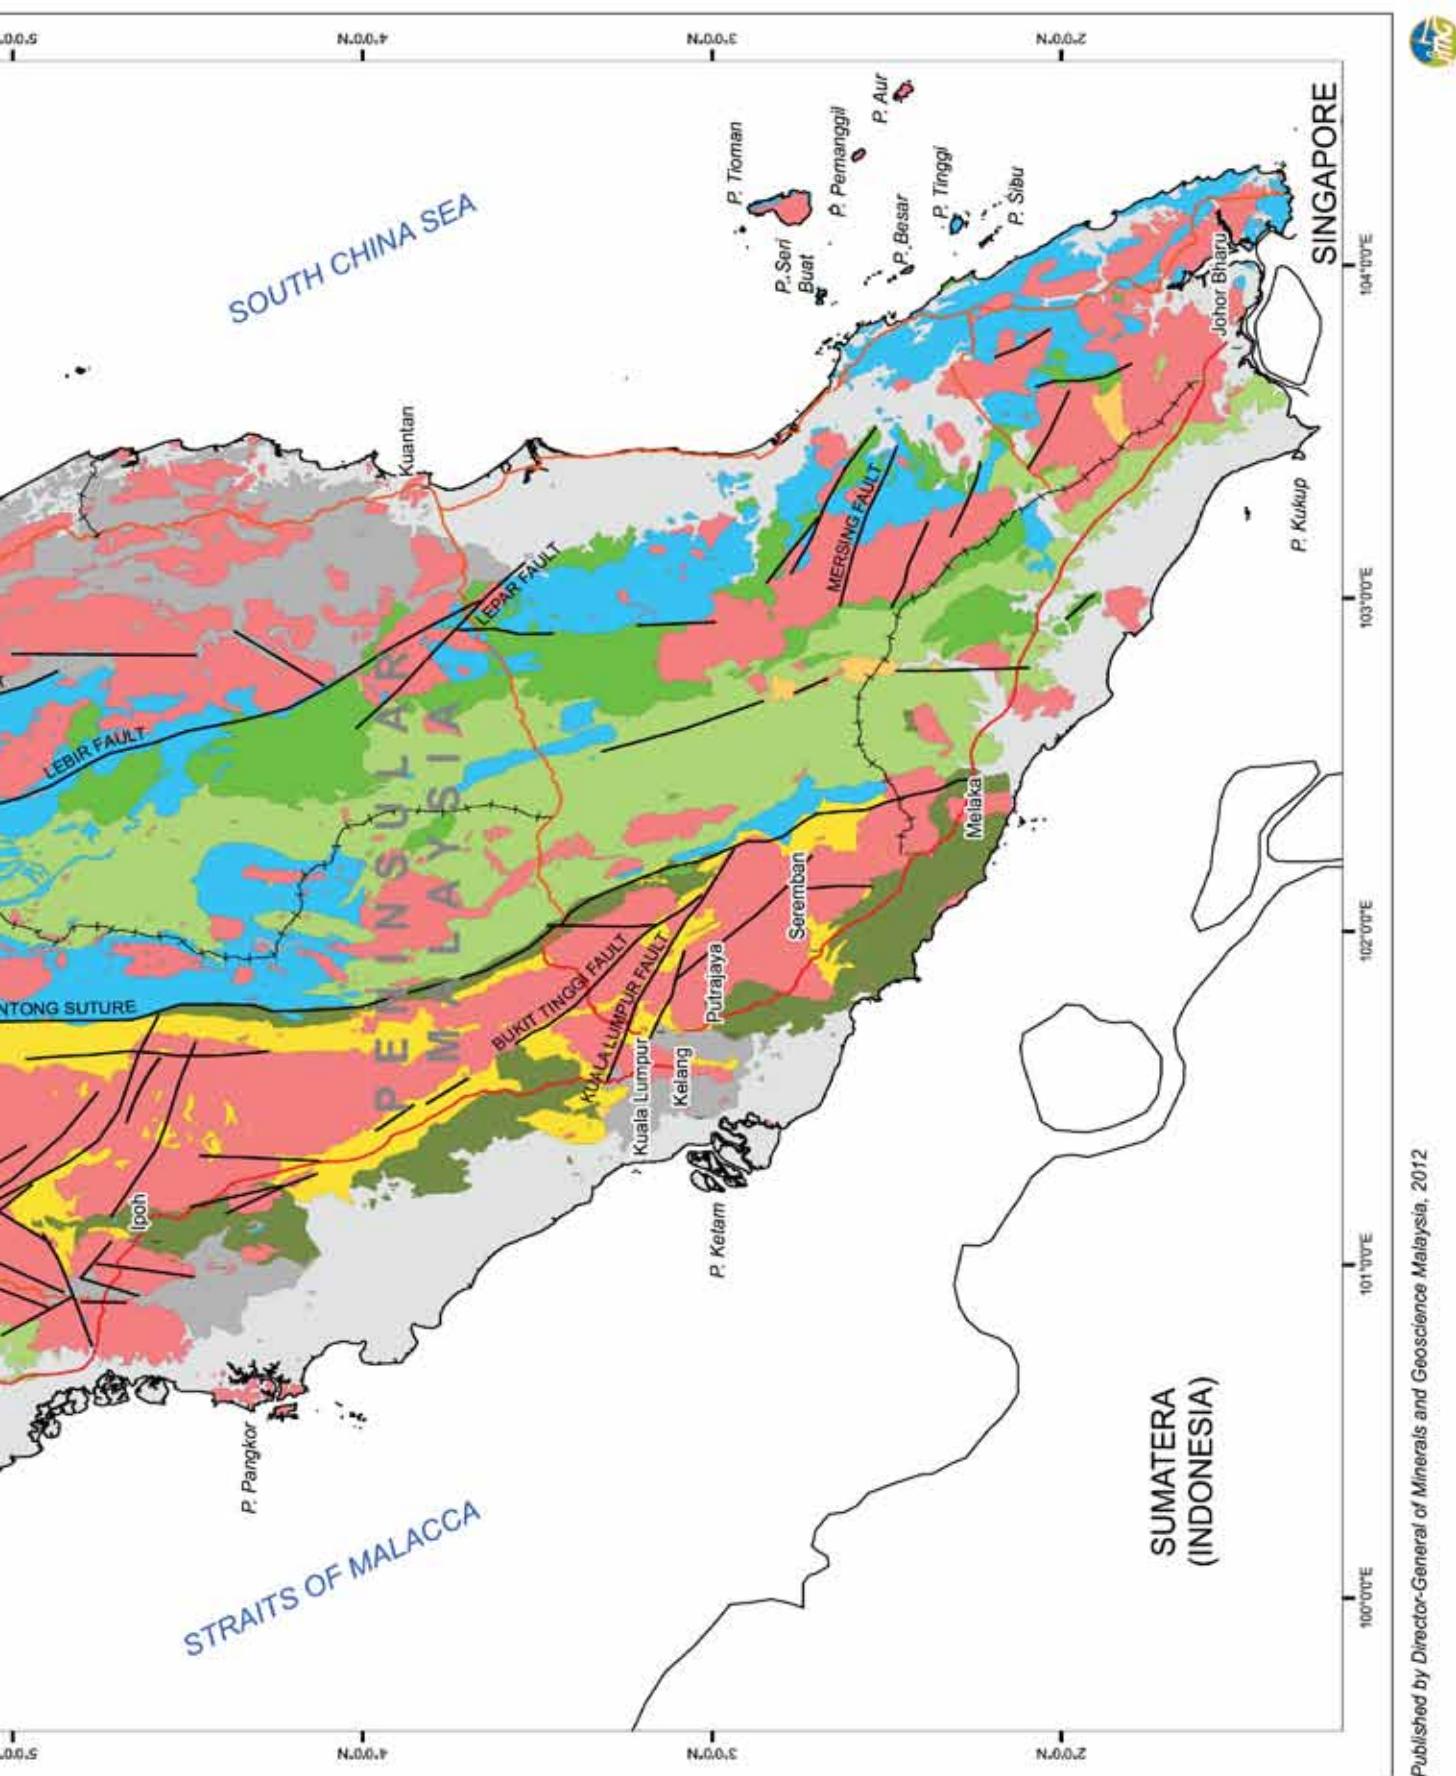

Sandstone/metasediment with subordinate siltstone, shale and minor conglomerate.

### IGNEOUS ROCKS

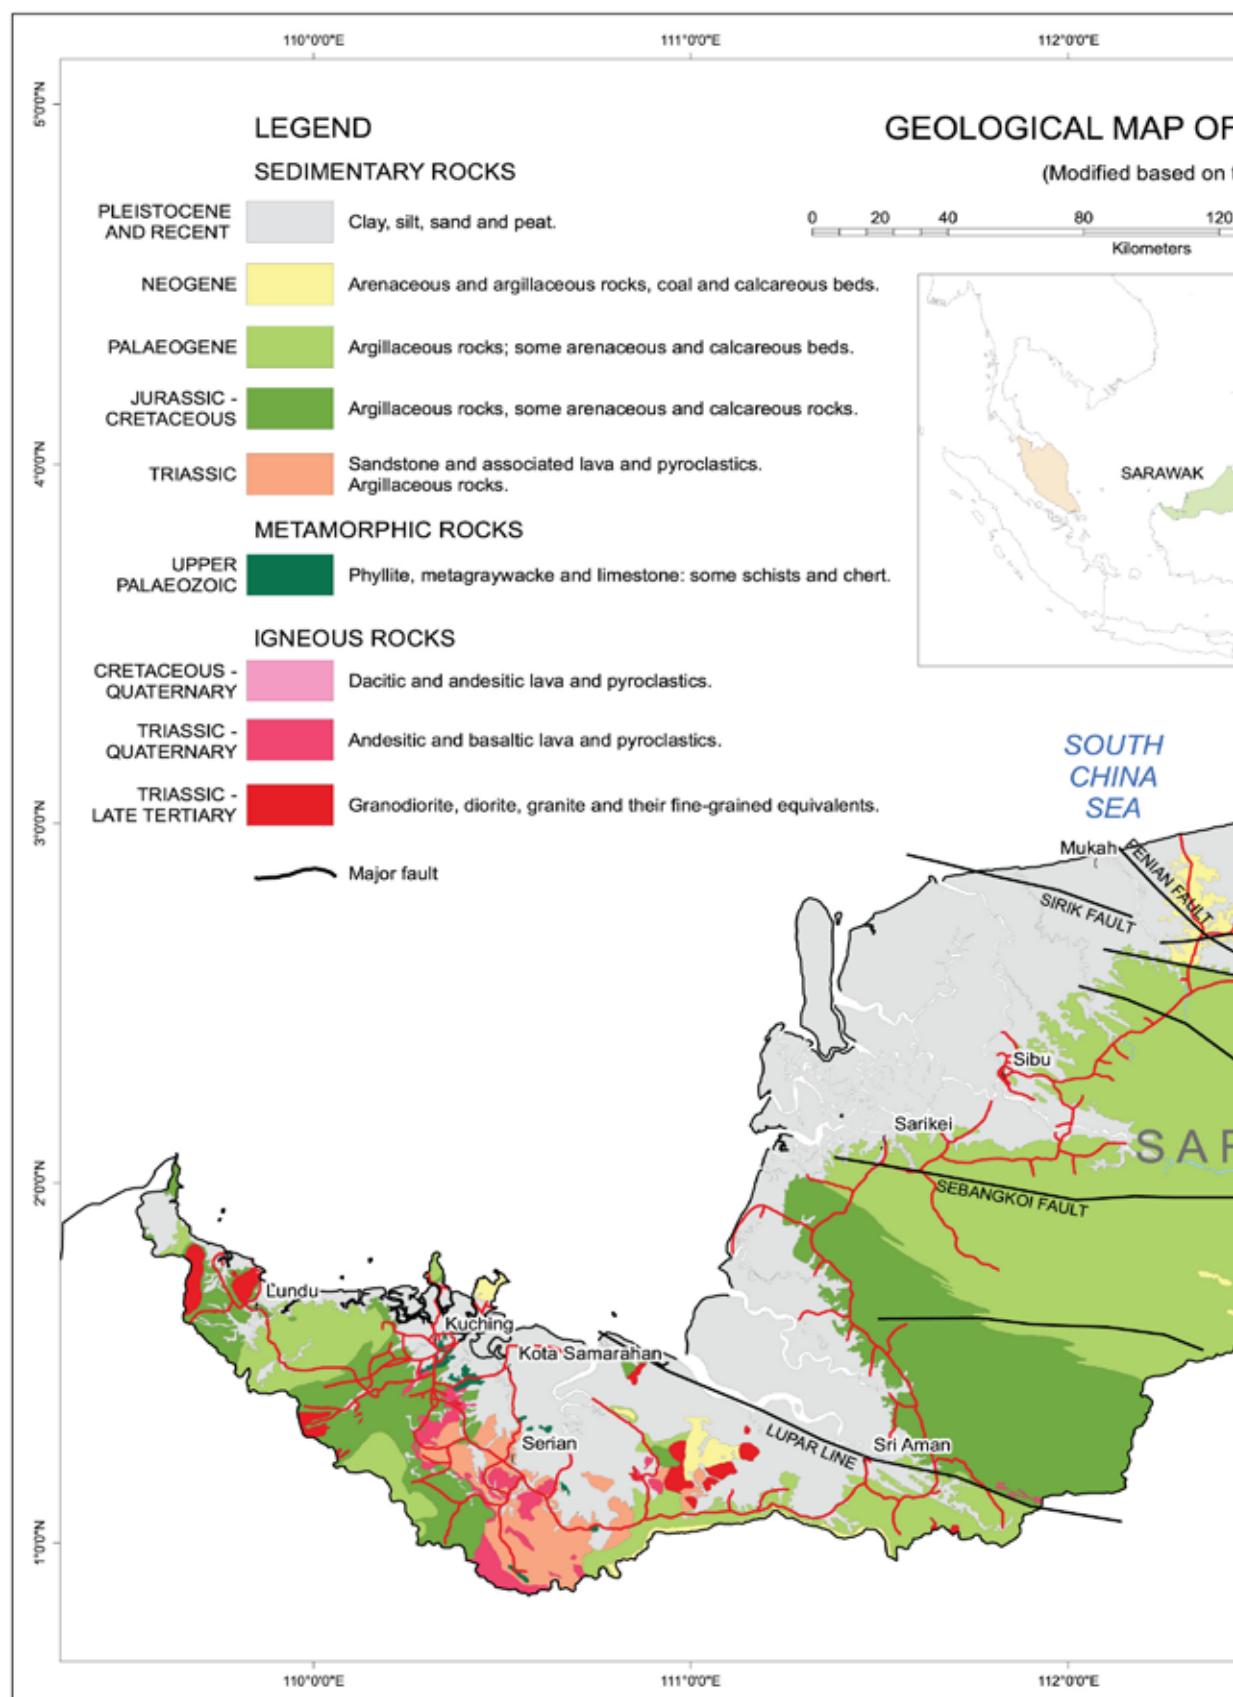

- PERMIAN - JURASSIC

Intrusive rocks, mainly granite with minor granodiorite.

Terletak berdekatan Bukit Larut (Bukit Maxwell), Perak, Taman Tasik Taiping yang masyhur ini dahulunya ialah sebuah lombong bijih timah sebelum ia diwartakan sebagai taman awam dalam tahun 1880.

*The famous Taiping Lake Gardens located near Bukit Larut (Maxwell Hill), Perak was originally a tin mining ground before it was established as a public garden in 1880.*
